Certificate of Occupancies issued in APRIL 2025

0 Issued

Code Enforcement Updates Across Town APRIL 2025

- A. Notices were sent/issued for the following violations:
 - a. Inoperable Vehicle, 1 location
 - b. Nuisance, 2 locations
 - c. Grass Height Violation, 1 location
 - d. No Special Use Permit, 1 location
 - e. Detached sign landscaping violation, 1 location
 - f. Other, 3 locations
 - g. 12 Door hangers issued (1 Inoperable Vehicle, 3 Nuisance, 2 RV in front yard, 3 Boat & trailer/utility trailer parked on right of way, 3 Grass Height Violations.)

PUBLIC WORKS & UTILITIES:

1. Directors Report

▪

Utility Staff performs the following duties monthly

- A. Miss Utility marking
- B. Read meters for billing and to transfer property owners.
- C. Water cut-offs and cut-on
- D. Check sewer pump stations daily.
- E. Install and repair street signs.
- F. Replace and repair broken water meters.
- G. Perform maintenance on town-owned buildings such as Atlantic Contractors installing new hvac units at town hall.

2. Sewer Line Repairs and Maintenance

A.

3. Sewer Pump Station Repairs and Maintenance

- A. Weekly and daily checks on all 27 pump stations.
Performed the following scheduled maintenance at all pump stations.
 - 1. Cleaning of wet-well
 - 2. Alarm testing
 - 3. Sump pump cleaning
 - 4. Check Valve cleaning and repair.
 - 5. Generator check / Godwin pump check
 - 6. Control Panel / Flow monitor check
 - 7. Fence and Grounds inspection
 - 8. Inspected Structure
 - 9. Inspect and clean pumps.
 - 10. Level system check

11. Test limit switches
12. Bar screen cleaning
13. Rain gauge cleaning
14. Head pressure reading at 7 pump stations.

B. Lewis Construction repaired a bent sewer standpipe at Raising Star pump station. The standpipe is used when needing to hook up a Godwin bypass pump at station.

4. **Water Line Repairs and Maintenance.**

A. Public works repaired water leaks at the following addresses:

404 Jordan Dr.
820 Easton Place
928 Church St.
5 Riverside Dr.
205 Middle St.
203 Azalea Dr.

5. **Well Repairs and Maintenance**

A. All wells except 8A and 10 (at RO Plant) are off now that RO plant is running. Upgrades to well houses have been completed to keep wells in operating condition in case of an emergency. Emergency wells are flushed, sampled, and inspected once a month.

6. **Water Treatment Plant**

- A. Operate RO Plant and monitor distribution system.
- B. Daily lab analysis, monthly sampling, and reports for VDH, HRSD, DEQ and RO contractors.
- C. Performed monthly routine tasks including but not limited to:
 1. Daily Inspection of RO Plant and grounds.
 2. Monthly Tank inspections.
 3. Inspect and exercise plant generator monthly.
 4. Fill antiscalant day tank.
 5. Truck Inspections.
 6. Routine service of lime system.
 7. Service online fluoride and chlorine analyzers.
 8. Calibrate online turbidimeter and pH meter.
 9. Check and replace air filters.
 10. Test Alarms.

- Atlantic Heating and cooling fixed AC in the Chemical room

- Virginia controls installed new radios in the Church St. Elevated tank for better distribution communication.
- Va controls fixing controls in CPS pump room.
- De-winterized Plant and storage tanks.

7. **FOG/ Backflow/ Septic Pump Out Program**

A. Implementing the FOG Program to ensure compliance by:

1. Scheduling and meeting with FSE's for routine inspections.
2. Checking FSE's for compliance in record keeping and HRFOG Certifications, trying to get more certifications for education outreach.
3. Inspections to include proper record keeping of pump outs.
4. Inspections include proper record keeping of rendered grease clean out and pick up/throw out.
5. Working with FSE's to get more employees, specifically dishwashers certified by HRFOG.
6. Working to schedule inspections around FSE's clean out/pump out schedule for pump station problem areas.
7. Sending emails/letters to schedule more inspections.
8. Working with select FSE's to schedule inspection during pump out to monitor clean out and pumping is done to compliance.
9. Attendance of the HRFOG meeting via Zoom.

B. Implementing the Cross Connection and Backflow Program to ensure compliance by:

1. Entering reports and filing reports.
2. Conducted backflow inspections for new irrigation installations.
3. Conducted backflow inspections for CO requests.
4. Following up with residents with disconnected systems and/or placed on irrigation well, making letter to inform well drillers of new ordinance change.
5. January mailers' final non-compliance notices sent.
6. Sending out failed device notices as received.
7. July mailers' non-compliance notices sent.
8. Studying to become backflow certified.
9. Providing education to residents installing frost free yard hydrants.
10. Starting 2024 January mailers.

C. Maintaining of the Septic Pump Out Program

1. Sending 2023 non-compliance notices out for the invoices that were not provided by the due date.
2. Sending pump out reminders for 2024 were sent.
3. Sending pump out letters for 2023.

4. Working with the water department to get a complete town sewer list from the water dept to fill in gaps on non-town sewer residents.

8. Miscellaneous or Construction

- A. Maintenance crew provided traffic control on Grace St. for Goodrich to trim trees.

ENGINEERING

- 1.) Blair Brother's Contracting: The contractor started and completed clearing of entrance pipes and re-grading of ditch section along Battery Park Road from its intersection of Nike Park Road to in front of 19501 Battery Park Road. Contractor re-graded the ditch line on Great Spring Road, one area in front of the Cypress Creek Maintenance area and another section across from the Isle of Wight Rescue Squad. The contractor also installed a large asphalt patch in Jersey Park at the intersection of East Street and West Virginia Avenue.
- 2.) Smithfield Lake Dam: Field inspections continue to be held this month involving the Dam. No structural deficiencies were noted this month on the dam site. The Town's engineer and TRC Companies have recently completed a full structural inspection of the dam and have submitted a 2-year recertification application for the dam to DCR. The Town has now installed the water level sensor in the emergency outfall of the dam, and it is currently forwarding to us water level information.
- 3.) The following projects are currently under design and review:
 - a.) Battery Park Road storm pipe replacement near the Villas Subdivision. Plans have been developed to replace the existing 18" storm pipe with twin 48" x 68" elliptical pipes.
 - b.) Battery Park Road culvert outfall and ditch enhancements project which is located near Greenbriar Lane. The site plans are complete and approved.
 - c.) Cedar Street culvert outfall storm pipe extension and shoulder repair. Site plans are complete and approved. Additional drainage easement areas are being acquired.
 - d.) Lewis Constr. and the Town are currently scheduling the replacement of a section of storm water drainage cross drainpipe on Great Spring Road. This schedule will be in conjunction with the Isle of Wight County sidewalk project on Main Street.
- 4.) South Church Street to Nike Park Bike Trail Project:
Site plans are being completed and various sources of funding involving the construction of the project are now being examined.
- 5.) Meetings with VDOT representatives have been held to discuss the reconstruction of Grace Street. VDOT has now determined the corrective

measures required involving the drainage concerns at the intersection of Grace & James Streets. Reconstruction of this intersection has now begun.

- 6.) The developer has requested an inspection of Cypress Creek Phase VI for the acceptance of the streets into the Towns Maintenance system. A second inspection of storm water structures, curb & gutter sections and the installed roadway surface has been completed, and a punch list has been developed. The contractor is currently making corrections to all items noted on this punch list.
- 7.) A review of the proposed engineering site plans continues regarding the Mallory Farms subdivision Phase B.

With respect to Mallory Farms subdivision Phase A, Section 1 field inspections regarding stormwater structures and storm pipe installation, sanitary sewer pipe, manholes and the sanitary sewer pump station; along with the water main and laterals, continue to be performed. The contractor has now installed base asphalt as per approved site plans on Wharf Hill Drive, Wentworth Crossing, Purdie Lane & St. Luke's Lane.

Regarding Battery Park Road the contractor has installed the required base, intermediate and surface asphalt courses. All required line striping has also been installed and completed.

Phase A Section 2 the contractor continued and completed the clearing and grubbing phase of the project along with the installation of sediment basin # 3. Contractor has begun the installation of the storm water structures and storm pipe.

- Tourism Full Time Staff meeting 4/14/25; 4/21/25; 4/28/25.
- Juneteenth Organizing Committee meeting held 4/16/25. Plans are coming along for June 19th event that will be held along Main Street in various venues again this year.

- GMODS (Genuine Merchants of Downtown Smithfield) meeting held 4/15/25. Good attendance. Excellent conversations and information exchanged.
- Director worked on VA250 Commission/VTC grant throughout the month. Submitted 4/23/25. This grant is for \$10,000 and would fund the VA250 Thematic Driving Trail through Smithfield and Isle of Wight County.
- Director and Marketing contractor attended SAFE STREETS FOR ALL meeting 4/16/25. SSFA is a grant awarded to Isle of Wight County for planning and implementation of safer transportation routes.
- Tourism staff attended STOP THE BLEED class 4/17/25.
- Director attended CVTA (Coastal Virginia Tourism Alliance) meeting 4/17/25. Assigned to head nomination committee for upcoming year.
- Board of Supervisors meeting 4/17/25.
- Hosted New Council Tours and Information Sessions 4/21; 4/23; 4/24. Tourism Annual Report reviewed.
- Director and Marketing Consultant met with Blueprint Inc. vendor 4/22/25. Potential partnership.
- Town Staff Meeting held 4/23/25.
- VA250 Committee meeting held 4/23/25. VA250 grant submitted for thematic driving tour, Mobile Museum will be at the IOW Museum for this year's upcoming Arts Festival in May, and many other VA250 events in progress.
- SVAE Board meeting 4/23/25. SWBF event reviewed. 2 Million Dollar May event is coming up May 7th at the Smithfield Center! Director participated in SVAE interviews for Assistant Festival Director position for SVAE. Candidates were excellent and a candidate was selected and offered the position. She will begin in May. This is part of the SVAE Success!(ion) Planning campaign.
- Continued to contract with Stephanie Kensicki (formerly of Smithfield Foods) for part-time marketing services. Will offer her full time employment in the next fiscal year as the Marketing & PR Coordinator as well as Assistant Director of the Department. Several personnel meetings held throughout month with leadership.
- VTC DRIVE Tourism Grant was awarded after the workshop held at the Smithfield Center from 3/7/25 to brainstorm ideas and work through information related to the VTC DRIVE Tourism grant application. Excellent stakeholder attendance and participation! The Tourism Raliegh/Durham marketing initiative will be funded through this grant.

- Director attended Council Committees 4/28/25.
- Director attended HSL (Historic Saint Luke's Church & Museum) Board meeting 4/29/25.
- Director and Marketing Coordinator met with website company regarding the significant update of the www.GenuineSmithfieldVa.com website 4/29/25.
- Salty Southern Route (regional trail featuring pork and peanuts with participating localities: Smithfield/IOW; Surry; Suffolk; Franklin/Southampton; Sussex.) Group continues to work with Visit Widget to create a new website and online trail app. Meeting held 4/29/25.
- Bridge Campaign marketing grant received from VTC (Virginia Tourism Corporation) for additional marketing opportunities to combat loss of visitation and revenue due to prolonged bridge construction.
- VISITOR CENTER open throughout Month. Tourism, County and Town Facebook postings throughout month. Update website events and *Where the Locals Go* event promotion newsletter weekly.

Investigations Memorandum of Understanding	Agreement	4/14/2025

Town of Smithfield

Memorandum

April 28, 2025

TO: Public Safety Committee

FROM: Michael Stallings, Town Manager

SUBJECT: Investigations MOU

The Smithfield PD has continued to pursue leads related to the double homicide that occurred in Jersey Park a year ago. As part of their exhaustive efforts, the PD has asked that the Town consider adopting the enclosed MOU. Below is a brief prepared by the Investigations Lieutenant regarding its purpose.

Purpose:

This memo is to inform you of a Memorandum of Understanding (MOU) established between the Virginia Department of Forensic Science (DFS) and DNA Labs International regarding specialized DNA testing related to an ongoing double homicide investigation.

Background:

As part of the investigation, an *M-Vac* system was used to collect potential DNA evidence. The M-Vac is a forensic collection tool that acts as a "DNA vacuum," allowing for the recovery of trace biological material from porous or challenging surfaces. This advanced collection method increases the likelihood of recovering usable DNA profiles, especially when traditional swabbing methods are insufficient.

Issue:

The filter used in the M-Vac system, which captures the collected DNA material, requires specialized processing that the Virginia DFS is currently not equipped to perform. To address this, DNA Labs International — a private, accredited forensic laboratory — has agreed to conduct the DNA extraction and analysis of the M-Vac filter.

MOU Purpose:

The MOU allows DNA Labs International to perform the necessary testing and, if a DNA profile is developed, to return those results to DFS. DFS will then upload any qualifying profiles to the Combined DNA Index System (CODIS) for comparison against known

offenders and forensic profiles, which may assist in identifying potential suspects or linking cases.

Summary:

This partnership bridges a critical gap in our forensic capabilities by leveraging advanced private-sector resources while still ensuring that any results are validated and processed through official state channels for national database access.

If adopted, the PD would send collected evidence to the lab in Florida for testing. There is a cost associated with this initial testing as well as any follow-up testing that is required. We anticipate the initial testing to be around \$4,500 and if a DNA profile is developed there would be additional cost for genetic genealogy to help build a profile for the subject. There would be additional cost for the genetic genealogy if needed.

MEMORANDUM OF UNDERSTANDING
BETWEEN
THE VIRGINIA DEPARTMENT OF FORENSIC SCIENCE
AND
DNA LABS INTERNATIONAL, INC.
AND
SMITHFIELD POLICE DEPARTMENT
FOR
UPLOAD OF ELIGIBLE DNA PROFILES INTO THE COMBINED DNA INDEX SYSTEM (CODIS)
IN SUPPORT OF CASEWORK FOR SMITHFIELD POLICE DEPARTMENT

This Memorandum of Understanding (hereinafter referred to as the "MOU") is made by and between the Virginia Department of Forensic Science (hereinafter referred to as "DFS") and DNA Labs International, Inc. having its principal place of business at 700 W. Hillsboro Blvd, Building 3, Deerfield Beach, Florida 33441 (hereinafter referred to as "DLI") and the Smithfield Police Department (hereinafter referred to as "SPD").

WHEREAS, the Federal Bureau of Investigation (FBI) sponsors the Combined DNA Index System (CODIS) as a part of a technical assistance program to state and local forensic DNA laboratories which allows the forensic DNA laboratories to store and match DNA records from legally collected samples, offenders, and crime scene evidence;

WHEREAS, DFS is a CODIS participating laboratory processing a sublicense for the CODIS software and contributes DNA records to the National DNA Index System (NDIS) pursuant to a Memorandum of Understanding with the FBI and the NDIS Operational Procedures Manual;

WHEREAS, DLI, as a private laboratory offering contract DNA analysis services, does not have access to CODIS;

WHEREAS, SPD, has retained DLI to perform DNA analysis services for crime scene evidence related to the criminal investigation of crimes occurring within the jurisdiction of SPD;

WHEREAS, DLI, is accredited by the ANSI-ASQ National Accreditation Board (hereinafter referred to as ANAB) ISO/IEC 17025 and is willing to accept SPD cases, pursuant to a contractual agreement for DNA analysis services;

WHEREAS, some SPD cases require the resulting DNA record to be uploaded into CODIS to develop investigative leads;

WHEREAS, DFS agrees to perform the required NDIS case reviews and approvals and to upload the results into CODIS, when eligible, for SPD cases as long as DLI adheres to the procedures established herein;

NOW, THEREFORE, in consideration of the mutual obligations contained herein, it is agreed by and between DFS and DLI and SPD as follows:

1.0 Compliance with Outsourcing Agreement Requirements

Pursuant to Standard 17 of the *Quality Assurance Standards for Forensic DNA Testing Laboratories* (see Attachment A), DLI:

- A. Shall comply with the accreditation requirements of federal law;
- B. Provide to DFS documentation of compliance with the *Quality Assurance Standards for Forensic DNA Testing Laboratories* and federal accreditation requirements of federal law at the request of DFS;
- C. Shall not, if performing forensic DNA analysis for SPD and generating DNA data that may be entered into or searched in CODIS, initiate analysis for a specific case or set of cases for SPD until documented approval has been obtained from DFS's Technical Leader of acceptance of ownership of the DNA data;
- D. Shall cooperate with DFS with any technical review process or verification process DFS may require prior to upload and searching of any DNA data into CODIS;
- E. If submitting DNA data to DFS for entry into and searching in CODIS, shall not enter and search the submitted DNA data in any other DNA data base, other than a quality control database such as a staff index search, whether owned and maintained by DLI or any other entity. If DFS learns that the DNA data has been entered and searched in a non-CODIS data base, DFS will immediately remove the DNA data from CODIS in compliance with NDIS procedures; and
- F. Shall cooperate with an annual on-site visit of DLI by the DFS Technical Leader, or a designated DFS employee who is qualified or previously qualified DNA analyst in the technology, platform and typing amplification kit, used to generate DNA data. In lieu of an on-site visit by the DFS Technical Leader or his/her designee, DFS may, at its option, accept an on-site visit conducted by a designated FBI employee.

2.0 Scope of Activities

- A. During the term of the MOU, DLI shall screen SPD cases for the CODIS eligibility based on DFS's *CODIS Operating Policies and Procedures Manual* (see Attachment B). DFS shall review the *NDIS Laboratory Approval Form* (see Attachment C) completed by DLI prior to any technical processing and submission by DLI to DFS. In conjunction with the *NDIS Laboratory Approval Form*, DLI will provide to DFS the Case Submission Form (see Attachment D) prepared by SPD. DLI will not proceed to process a CODIS case for SPD prior to receiving DFS approval.
- B. After DFS approves the processing of a CODIS case, the technical processing arrangements shall be governed by DLI's standard operating procedures and consistent with their technical procedures. Failure to follow the DLI standard operating procedures and technical procedures shall be grounds for DFS refusal to upload affected samples.
- C. DLI shall provide DFS with a complete copy of DLI's standard operating procedures relating to work performed subsequent to the execution of MOU on or before the date the MOU is signed by the parties. If, during the term of the MOU, DLI's standard operating procedures are altered or changed, DLI shall provide written notice of the alteration or change as well as an updated copy of the new standard

operating procedures relating to the performance of this MOU to DFS at least (10) business days prior to the implementation of any alteration or change.

- D. DLI agrees that its standard operating procedures shall at all times satisfy or exceed the guidelines for quality assurance detailed in the FBI's *Quality Assurance Standards for Forensic DNA Testing Laboratories* (see Attachment A). Failure to comply with the FBI's *Quality Assurance Standards for Forensic DNA Testing Laboratories* shall be grounds for the immediate termination of this MOU.
- E. Once processed, DLI shall provide a copy of all analysis results, as defined in the technical procedures, to DFS for upload to CODIS. DFS has the exclusive right to make a final determination regarding the CODIS eligibility of a DNA profile.
- F. DFS shall report any CODIS hit related to DLI analysis results to SPD. If this hit is an identification hit, the parties agree DFS will not provide additional analysis or testimony regarding any subsequent confirmation.

3.0 Referral to Other Laboratories

DLI agrees that it shall not refer SPD to any other private forensic laboratory or vendor for additional forensic analyses or services without (a) notifying DFS in advance of the referral and (b) providing proper notification to SPD regarding the potential limitations of any data developed from such analyses if the other private forensic laboratory or vendor does not have access to CODIS.

4.0 Term

In addition to the termination provisions set forth above, the term of this agreement shall commence on the date that this MOU is fully executed by all parties and shall extend until any party terminates this MOU, for any reason, with 30-days advance written notice.

5.0 Changes

No changes to the MOU shall become effective unless a formal modification has been issued in writing and signed by an authorized representative of each party. From time to time, however, the parties recognize that *DFS's CODIS Operating Policies and Procedures Manual* and the FBI's *Quality Assurance Standards for Forensic DNA Testing Laboratories* may be revised or changed. The parties agree that DFS shall provide such revisions or changes to *DFS's CODIS Operating Policies and Procedures Manual* or the FBI's *Quality Assurance Standards for Forensic DNA Testing Laboratories* to DLI and that thereafter such revisions or changes shall be incorporated in and made part of this MOU without the need for the parties to re-execute this MOU.

6.0 Limitation of Liability

DLI shall be legally responsible for any demands, claims, action, suits, or proceedings brought by any third party against it that is a consequent of DLI's failure to perform under the standards set forth in this MOU. DLI agrees to indemnify, defend, and hold harmless the Commonwealth of Virginia, DFS, its officers, agency, and employees from and against any and all damages, claims, suits, judgments, expenses, actions, and costs of every name and description caused by any gross negligent act or

omission of following the standards set forth in this MOU in the performance of DLI of the services under this MOU.

7.0 Choice of Law

This MOU shall be governed by, and construed in accordance with, the Constitution and the laws of the Commonwealth of Virginia.

8.0 Notification of Legal Actions

DLI shall notify DFS in writing within (5) business days after initial notification to DLI of any legal actions brought by a third party against DFS or DLI involving SPD cases.

9.0 Notification of Change in Accreditation Status or Adverse Audit/ Inspection Findings

DLI shall notify DFS in writing within (5) business days after initial notification to DLI of any change in its accreditation status issued by its accrediting body and/or any adverse audit or inspection findings, whether resulting from an external or internal audit.

10.0 Confidentiality

Except to the extent required by law, DLI shall not disclose any CODIS Information obtained pursuant to the MOU, including the information contained in the NDIS Laboratory Approval Form, to any individual or entity other than DFS or SPD, unless otherwise authorized in writing by DFS.

11.0 Consolidation Clause

This written MOU represents the entire agreement between the parties regarding the upload into CODIS of results obtained from DNA analyses conducted by DLI for SPD, both oral and written.

DFS, DLI, and SPD hereby express agreement to all of the above and enter into a joint agreement until such time that the parties shall amend or revise said agreement in writing.

TOWN COUNCIL REPORT

ITEM: Motion to Award Contract to Virginia Auction Company for the Collection of Delinquent Taxes

FROM: Finance Committee Chair, Mr. Jeff Brooks

ATTACHMENTS:

Description	Type	Upload Date
Delinquent Tax Collection	Cover Memo	4/18/2025

Delinquent Tax Collection 4/18/25

Our current process:

Personal Property: After 90 days – a delinquent notice is sent.

Delinquent as of 3/24/25 \$365,804 and is due 4/30/25. The majority of these are 2024 however older ones are \$36,000. After five years no collection efforts may be taken.

Real Estate: Delinquent as of 3/24/25 \$376,860.56.

At the present time, we do not take further action on either tax type.

Code of VA regarding delinquent taxes and collections:

§58.1-3934 - Collection of delinquent local taxes or other charges

§58.1-3941 - What may be distrained for taxes

§18.2-101 - Selling, etc., of goods distrained or levied on

§58.1-3965 – When land may be sold for delinquent taxes: notice of sale; owner's right of redemption

Use of collection companies/attorneys that specialize in this type of collection is a best practice. We have proposals from two and both have contracts with municipalities in the area:

TACS www.taxva.com

Prince George County

City of Norfolk

Henry County

Virginia Auction Company www.VaAuctionCo.com

City of Newport News

Isle of Wight

Town of Windsor

Collection Companies:

Service Provided:

- The company scans all data and normalizes placement into the collection system.
- Conduct selected address research on accounts prior to mailing to minimize returned mail.
- Mail preapproved correspondence to a portion of the accounts loaded from the client. This limited mailing permits a live data integrity test prior to performing a full mail drop on client accounts to limit data or integration errors to a controlled environment.
- Responses generated from the mailings are handled by inbound call representatives and correspondence is sorted and managed based upon actions required.
- Notice of large volume mailings are provided to in an effort to coordinate with peak office workloads.
- Follow-up correspondence is initiated on accounts that have not responded and are not mail return accounts.
- Accounts that refuse payment are immediately referred to their staff that handle forced collections action.
- Research returned mail for updated addresses using a variety of skip tracing tools.
- Follow-up correspondence and calls are made to ensure payment.
- Regular management reports are forwarded to the client on a preapproved schedule.
- Regular weekly report and remittance of collections.

Process Overview Personal Property

1. A delinquency letter is mailed to the delinquent taxpayer. The taxpayer is given a time frame 30, 60 or 90 days at the treasurer's discretion to resolve the delinquency.
2. Following the aforementioned deadline, a 72-hour non-restraining warrant is hand delivered to the vehicle or the door by a collection agent.
3. Following the 72-hour non-restraining warrant a "Final Notice" is hand delivered to the vehicle or the door by a collection agent.

a. Vehicle(s) booted at residence or towed or stored at a lot.

b. If payment is not made:

Vehicle(s) auctioned to the highest bidder to cover delinquent taxes.

Process Overview Real Estate

1. A delinquency letter is mailed to the delinquent taxpayer. The taxpayer is given a time frame 30 days to resolve the delinquency. If not resolved:
2. Title search.
3. Lienholders are notified.
4. Pre-litigation notice suit filed with local circuit court.
5. Preparation for auction.
6. Auction.

How this benefits Smithfield:

- Staff does not have to visit taxpayers and do the collection activities
- These companies specialize in collection activities, and they handle taxpayer issues.
- Taxes are collected.

Cost:

20% of what is owed, collected and added to the outstanding bill. If real estate must be sold, there are additional fees depending upon amount of what is outstanding.

Both companies provide the same services, I would like to propose that we use Virginia Auction Company and if we are not satisfied with their services, we can use TACS.

Resolution - Appropriation of Highway Funds	Resolution	4/15/2025

Resolution

A Resolution Appropriating The Sum Of
\$131,394.16 from the Highway Budget Fund
Balance to the 2024/2025 Highway Budget.

WHEREAS, at the end of the 2023/24 fiscal year, there was \$131,394.16 remaining unspent in the Highway Fund Operating Budget, and;

WHEREAS, the Town Council must appropriate these funds into the FY24/25 Highway Fund operating budget so that those funds may be used for various highway projects;

WHEREAS, these shall be expended before the end of the 24/25 fiscal year.

NOW, THEREFORE BE IT RESOLVED by the Council of the Town of Smithfield, Virginia as follows:

Section 1. That the sum of \$131,394.16 is appropriated to the FY 2024/2025 Highway Budget

Section 2. This resolution shall be effective on and after its adoption.

TOWN COUNCIL REPORT

ITEM: Motion to Approve the Subdivision Agreement for Modwash and Cypress Crossing Pump Station

FROM:Public Buildings and Welfare Committee Chair, Valerie Butler

ATTACHMENTS:

Description	Type	Upload Date
Subdiyision Agreement - Modwash and Cypress Crossing Pump Station	Agreement	4/16/2025

SUBDIVISION AGREEMENT
MODWASH AND CYPRESS CROSSING PUMP STATION

THIS SUBDIVISION AGREEMENT, made this ____ day of _____, 2025 by and between _____, LLC, a Delaware limited liability company, of the first part, herein referred to as "Developer"; and TOWN OF SMITHFIELD, a Virginia municipal corporation situate in Isle of Wight County, of the second part, herein referred to as "Town".

WHEREAS, the Developer has proposed the subdivision development of a 4,540 +/- square foot building and a 144 +/- square foot pumping station on a certain tract or parcel of land situate in Town to be known as “HUTTON SMITHFIELD SUBDIVISION LOCATED AT 184403 CYPRESS CROSSING” and desires to have a plat for this development of the subdivision approved by the Town and admitted to record in the Clerk’s Office of the Circuit Court of Isle of Wight County, Virginia (the "Subdivision Plat"); and

WHEREAS, installation of sewer, water, streets lights, entrance signage, and street improvements required by the Subdivision Ordinance of the Town by Developer has not commenced and Developer desires to enter into this Agreement and to furnish the financial assurances required by the Subdivision Ordinance of Town so that the subdivision plat may be approved for recordation, upon Town's assurances that Town will accept such improvements and thereafter operate and maintain same; and

WHEREAS, Developer is required to pay the costs of designing and installing certain sewer lines within the Development.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH: That for and in consideration of the approval of the Subdivision Plat and the covenants and agreements herein contained, it is agreed as follows:

ARTICLE I

1. Town hereby authorizes the necessary Town officials to approve the Subdivision Plat of HUTTON SMITHFIELD SUBDIVISION LOCATED AT 18403 CYPRESS CROSSING for recordation subject to compliance with the design and review standards of the Subdivision Ordinance of the Town and in line with the current Hampton Roads Planning District Commission (HRPDC) Regional Construction Standards along with Town Design Standards. From here on in, any reference to Town Design Standards will also include the current Hampton Roads Planning District Commission (HRPDC) Regional Construction Standards.

2. Within twelve (12) months from the date of approval of the Subdivision Plat for HUTTON SMITHFIELD SUBDIVISION LOCATED AT 18403 CYPRESS CROSSING, Developer agrees to have completed the construction and installation of the sewer, water, and street improvements in the property shown on the plat of HUTTON SMITHFIELD SUBDIVISION LOCATED AT 18403 CYPRESS CROSSING, as required by the Subdivision Ordinance of the Town and Town Design Standards.

3. The sewer system improvements, including certain off-site improvements to the sewer system of the Town as required by the Subdivision Ordinance of the Town ("Sewer Improvements"), water system improvements ("Water Improvements"), and street lights and street improvements ("Street Improvements"), are collectively referred to herein as ("the Improvements"). The design, construction and installation of the improvements shall be in compliance with all requirements of the Town, the State Health Department, the State Water Control Board, and the Virginia Department of Transportation and shall be subject to final approval by Town at all steps of design and construction. No construction of the improvements shall commence until the plans and specifications have been approved by the Town and the financial assurances provided as required by Article II of this Agreement. No changes in the plans and specifications shall be made without further approval by Town. All such plans, as finally approved by Town, shall become part of this Subdivision Agreement, Developer shall dedicate and convey the Improvements to the Town upon as hereinafter, and Town shall accept the same. No buildings shall be connected to the sewer or water improvements prior to acceptance of the Improvements by Town, except that in hardship cases temporary use may be made with the approval of Town and where Developer accepts full responsibility and bears the cost of such operation.

4. Town reserves the right and shall fix, and retain all appropriate sewer and water tap fees for properties connected to the sewer and/or water lines constructed and installed by Developer. The initial water and sewer connection and availability fees for each commercial connection are dependent on meter size. These fees are subject to change from time to time upon the action of Town Council in accordance with the provisions of the Town Code and applicable state law. All connection fees shall be payable to the Town in full when application is made for a zoning permit for that lot or parcel of land. In addition to fees due and owing to the Town of Smithfield, there are connection fees due and owing to the Hampton Roads Sanitation District in connection with connection to the Town's sewer system.

ARTICLE II

1. Developer will, upon execution of this Subdivision Agreement, in order to comply with the Subdivision Ordinance of the Town, provide Town with an unconditional and irrevocable letter of credit in the initial amount of \$ _1,661,228.00__ which shall serve as Developer's bond for performance and shall be calculated at 120% of the total estimated cost of construction of the Improvements, on the itemized cost estimate sheet, as verified by the Department of Public Works and Utilities. The letter of credit and the performance bond, totally \$ _1,661,228.00__ will be conditioned upon the performance of all covenants and provisions of this Subdivision Agreement. The form and substance of the letters of credit shall be subject to the approval of Town's attorney.

2. In the event Developer fails to complete the Improvements provided hereinabove in the time designated, Town may complete or cause the same to be completed, and Developer shall be liable to pay to Town the cost necessary to complete the Improvements up to the amount set forth in paragraph 1 of this Article. Any requests by Developer for an extension in the time for completion shall be delivered to Town in writing no later than forty-five (45) days prior to the date for completion as established by the provisions of Article 1, paragraph 2. of this agreement. Any requests for extensions shall be considered and reviewed by the Town council. In the event that an extension is granted, the Developer shall pay an administrative review fee equal to two and one-half percent (2.5%) of the amount of the surety being extended to compensate Town for its significant administrative costs caused as a result of Developer not completing the improvements within the time period established by this agreement.

3. In the event of default by Developer described above, Town may, at its option, collect the cost for the completion of the Improvements hereof from Developer prior to the actual construction of same. In the event the estimated cost is greater than the cost necessary to complete the Improvements, Town shall refund difference to Developer.

4. Reductions in the amount of the surety held by Town may be made by the Town as construction progresses and is approved by Town, except that in no instance shall the amount of the surety be reduced to less than twenty percent 20% of the cost of construction of the Improvements, as determined by the Department of Public Works and Utilities.

5. If Developer shall faithfully execute each and all requirements of this Subdivision Agreement, then the aforementioned letter of credit shall be released by Town to Developer within 30 days of Town's final inspection and after written notification by the Town to Developer of Town's acceptance of the Improvements.

ARTICLE III

1. Developer will not under any circumstances permit the discharge of sewage originating on any other property or premises, either directly or indirectly, into the Sewer Improvements without the specific prior approval of Town. With the approval of Town, Developer may agree with owners of adjacent properties to construct joint facilities to be connected to the Sewer Improvements.

2. Developer agrees that no structure shall be connected to, and that no effluent shall be discharged into the Sewer Improvements prior to infiltration tests and notification by the Town to Developer of Town's tentative acceptance of the Sewer Improvements or portions thereof.

3. Developer shall pay to Town a fee assessed for the inspection of the Improvements constructed as part of the subdivision, which fee is to be paid prior to the construction of the Improvements and equal to two and one half percent (2.5%) of the estimated construction costs of the Water and Sewer Improvements and one and one half percent (1.5%) of the estimated construction costs of the Road Improvements, as submitted by the Developer on the itemized cost estimate sheet, and verified by the Department of Public Works and Utilities.

4. The execution of this agreement authorizes Town staff entry upon the properties for the purposes of Inspections of the Improvements.

5. Town shall have the right at any and all times to make, connect, or permit the connection of any other sewer or sewer connections or extensions with the Sewer Improvements, at any point or points, and shall have the right to at any and all times to take and dispose of sanitary sewage, through the Sewer Improvements from persons beyond and adjacent to the Development and originating on properties other than that described in this agreement provided the number of connections and capacity necessary for HUTTON SMITHFIELD SUBDIVISION LOCATED AT 18403 CYPRESS CROSSING is reserved.

6. Developer will not under any circumstances permit the flow of water from Town's existing water system into the Water Improvements without the specific prior approval of Town. With the approval of Town, Developer may agree with the owners of adjacent properties to construct joint facilities to be connected to the Water Improvements.

ARTICLE IV

1. Upon completion of the construction of the Sewer Improvements, and the final inspection and acceptance of construction by Town, Developer shall forthwith convey to Town, free and clear of any encumbrances, and in form approved by Town, all of Developer's right, title and interest to the Improvements, including but not limited to sewer and water mains, force mains, laterals, lines, pipes, pumping stations, and other related facilities, street lights and street improvements, and shall grant and convey to Town, with General Warranty of title any lots or sewage pumping station sites, with access or right-of-way and/or easements of which said force main, gravity mains or any other facility is constructed, all without cost to Town. Such transfer and conveyance shall include but not be limited to all facilities capable of serving more than one customer plus laterals up to but outside private property lines. Facilities on private property serving one customer shall become the property of that customer.

2. Developer hereby grants to the Town, the exclusive right to establish and re-establish rates for sewer and water service to be furnished by Town after acceptance of the Improvements by Town. Developer covenants and agrees that any contracts for sewer service which it may enter into with customers in HUTTON SMITHFIELD SUBDIVISION LOCATED AT 18403 CYPRESS CROSSING at any time prior to its conveyance of the Improvements to Town shall incorporate by reference the provisions of this Subdivision Agreement.

3. Developer shall indemnify Town and keep and hold Town free and harmless from any contractual liability to Developer and from all claims on account of injury to Developer or any other person, firm or corporation, or damage to the property of Developer or any other person, firm or corporation arising from or growing out of Developer design, and/or approval, construction and/or installation of the Improvements, and in the event that suit shall be brought against Town, either independently or jointly with such Developer, on account hereof, Developer shall defend the Town in such suit at no cost to Town. In the event of a final judgement being obtained against Town, either independently or jointly with Developer, then Developer shall pay such judgement with all costs and hold the Town harmless therefrom.

4. Developer, or its lessee or purchaser of any property in the aforesaid subdivision hereby waives as against Town, any and all rights or claims which they may now have, or may hereafter have on account of injury or damage to Developer, lessee or purchaser or on account of injury or damage to the property of Developer, lessee or purchaser directly or indirectly resulting from the failure of Town to supply sewer or water service to Developer, lessee or purchaser in whole or in part under this Agreement; provided, however, that this waiver shall not be construed to relieve Town from any of its contractual obligations to Developer under this Subdivision Agreement.

5. The approval of any final plat or plan of this subdivision or any section thereof under this Subdivision Agreement shall not be deemed an acceptance by the Town of the Improvements for their maintenance, repair, or operations. Until accepted in writing by the Town, the Developer shall be fully responsible for maintenance, repairs, and operations of and shall assume all risks and liability associated with the Improvements. The Developer shall pay the costs of repairing or replacing the Improvements because of defects due to inferior materials or faulty workmanship appearing within two (2) years after acceptance by the Town. The Developer shall post a bond or other security (the "Defect Bond") in form approved by the Town's attorney and with surety acceptable to the Town in the amount of twenty percent (20%) of the total construction costs of the Improvements. The Defect Bond shall guarantee the repair of defects in the Improvements due to the inferior materials or faulty workmanship as required by this Subdivision Agreement.

6. The Town agrees to accept, operate and maintain the aforesaid Improvements upon conveyance to the Town by the Developer, provided that all terms and conditions of this Subdivision Agreement are complied with by the Developer, and especially that (1) the

Developer has completed the Improvements in accord with the plans and specifications approved by the Town; (2) the Developer has tendered such appropriate instruments approved by the Town pursuant to Article IV, paragraph 1. of this Subdivision Agreement; (3) satisfactory evidence is provided by the Developer that the Improvements have been paid for in full by the Developer; (4) upon receipt by the Town of five hard copies and PDF versions of "as built" construction plans prepared by the engineering firm which designed the improvements; one copy of CCTV videos, the submission of CAD files; and (5) upon full compliance with the provisions of the Town's street lighting policy and all ordinances relating to street lights in effect at the time of the installation of street lights.

ARTICLE V

1. The Developer shall bear its pro rata share of the cost of upgrading the Town's existing water system, (the off-site systems).
2. The design and construction of the upgrading of the off-site systems shall be performed by the Town at its expense.

ARTICLE VI

1. Upon execution of this Subdivision Agreement it shall be recorded in the Clerk's Office of the Circuit Court of Isle of Wight County at the Developer's expense.
2. Developer agrees to obtain the full release of any deed of trust lien on its land in so far as it shall apply to the Improvements and any and all land and easements to the Improvements and any and all land referred to in Article IV, Paragraph 1. of this Agreement, and Town shall not be required to accept the Improvements or connect them to Town facilities until such release has been obtained.
3. Developer and its lessee or purchaser of any property in the aforesaid subdivision hereby agrees that any such property remaining or becoming subject to any existing or subsequent easements, including any scenic easement heretofore or hereafter recorded, shall continue to be subject to such to the extent provided for by the provisions of said easement of record. Developer specifically agrees to reserve unto itself and unto the Town the right of entry upon the lots being conveyed, an easement of entry upon the property for the purpose of removing any obstructions to

the drainage easements, ditches and other drainage structures and facilities located upon the property.

4. Developer and its Lessee or purchaser of any property in the aforesaid subdivision hereby recognizes that no buffer component of a Resource Preservation area in aforesaid Subdivision shall be disturbed, cleared or mowed in contravention of any Federal, State or Municipal law or regulation to which the Resource Preservation Area is then legally subject and shall include a covenant to this effect in its declaration of restrictions and conditions.

5. This Subdivision Agreement shall not be assignable or transferable by Developer without the prior consent of Town.

6. This Subdivision Agreement shall be binding upon Developer's successors and assigns.

NOTICE OF PUBLIC HEARING
TOWN COUNCIL OF THE TOWN OF SMITHFIELD
PROFFER AMENDMENT

Notice is hereby given that the Town Council of the Town of Smithfield, Virginia will hold a public hearing at the regular meeting of the Town Council at the Smithfield Center, 220 N Church St, Smithfield, VA 23430, on Tuesday, May 6th, 2025 at 6:30 PM to consider the application of Development Logistics and Consulting, LLC, applicant on behalf of Cottages At Battery, LLC, owner, C/O Brian Mullins for a proffer amendment application under the provisions of Article 5.I.5. of the Zoning Ordinance of the Town of Smithfield, Virginia, adopted Tuesday, September 1st, 1998, and as amended thereafter.

The property which is the subject of this proffer amendment application is located at TPIN 21A-01-511 and is currently zoned Multifamily Residential (MFR) and Entrance Corridor Overlay (ECO).

Copies of the current Zoning Ordinance of the Town of Smithfield, Virginia, adopted Tuesday, September 1st, 1998, and all amendments thereto, along with copies of the current official zoning map and the applicant's proffer amendment application, are on file and may be examined in the Community Development & Planning Department, 310 Institute St, Smithfield, VA 23430. Any person desiring to be heard in favor of, in opposition to, or to express his or her views with respect to the aforesaid revisions and amendments may appear and be heard.

TOWN OF SMITHFIELD, VIRGINIA

Lesley G. King, Clerk

Publish: Wednesday, April 16th, 2025, and Wednesday, April 23rd, 2025.

NOTICE OF PUBLIC HEARING
TOWN COUNCIL OF THE TOWN OF SMITHFIELD
SPECIAL USE PERMITS

Notice is hereby given that the Town Council of the Town of Smithfield, Virginia will hold a public hearing at the regular meeting of the Town Council at the Smithfield Center, 220 N Church St, Smithfield, VA 23430, on Tuesday, May 6th, 2025 at 6:30 PM to consider the application of Development Logistics and Consulting, LLC, applicant on behalf of Cottages At Battery, LLC, owner, C/O Brian Mullins for Special Use Permit (SUP) applications under the provisions of Article 3.E.I.10.A.1., of the Zoning Ordinance of the Town of Smithfield, Virginia, adopted Tuesday, September 1st, 1998, and as amended thereafter, for the following:

Relief from Article 3.E.I.2.B, as no recreational vehicle parking is provided.

Relief from Article 3.E.I.6.B, not more than 2 units will be attached.

The property which is the subject of this SUP application is located at TPIN 21A-01-511, which is located on the south side of Battery Park Road and contains 18.25 +/- acres. The parcel's current zoning designation is Multifamily Residential (MFR) and Entrance Corridor Overlay (ECO).

Copies of the current Zoning Ordinance of the Town of Smithfield, Virginia, adopted Tuesday, September 1st, 1998, and all amendments thereto, along with copies of the SUP applications, are on file and may be examined in the Community Development & Planning Department, 310 Institute St, Smithfield, VA 23430.

**TOWN COUNCIL STAFF REPORT: PUBLIC HEARING: PROFFER AMENDMENT &
2 SPECIAL USE PERMITS
TUESDAY, MAY 6TH, 2025, 6:30 PM**

Applicant	Development Logistics and Consulting C/O Nathan Diehl & Brian Mullins 1885 Governor’s Pointe Drive Suffolk, VA 23436
Owner	Cottages at Battery LLC 5859 Harbour View Blvd STE 300 Suffolk, VA 23435
Property	TPIN 21A-01-511 18.25 ac S side Battery Park Road 340’ from the corner of S Church & Battery Park Road
Zoning	Multi-Family Residential (MF-R) & Entrance Corridor Overlay (ECO)
Adjacent Zoning	Highway Retail Commercial (HRC), Suburban Residential (SR), Neighborhood Residential (NR), MFR & ECO
Project Description	<p>The applicants are seeking a proffer amendment for the construction of 104 single family-attached condominium dwellings in accordance with SZO Article 3.F.B.2. These units would have zero lot line dwellings as attached residential and feature some units with attached rear detached garages. Each lot would conform to the required setbacks, lot widths and minimums, as if lot lines existed. The zoning district will remain MFR (Multi-Family Residential). The development will feature a clubhouse and pool, along with sidewalks connecting to Battery Park Road and Colonial Ave. The applicants are providing 7.3 acres of common open space and 2.3 acres of active recreation open space.</p> <p>In order to facilitate this project, the applicants have applied for the following:</p> <p>1st Special Use Permit: Relief from Article 3.E.I.2.B, which requires 1 recreational vehicle parking space per 4 dwelling units. No RV parking is provided.</p> <p>2nd Special Use Permit: Relief from Article 3.E.I.6.B, which requires not fewer than 3 attached units. The applicants are attaching not more than two units.</p> <p>This application was tabled at the November 2024 Planning Commission meeting and favorably recommended to Town Council at the April Planning Commission meeting, with 1 dissenting vote.</p>
Zoning Recommendation	<p>This project reduces the number of previously approved units by 46 units and provides additional housing within Town.</p> <p>We treat condominium units in the Zoning Ordinance through SUPs if they do not comply with the Attached Residential requirements.</p>
Enclosures	1. IOW County Museum

Re: Cottages at Battery Park – Traffic Evaluation

Cottages at Battery Park – Traffic Evaluation

Introduction

The Cottages at Battery Park is a proposed 18.3-acre residential development located southeast of the Battery Park Road and S Church Street (US258) intersection in Smithfield, Virginia. A Traffic Impact Analysis (TIA) was performed for this site in 2019 (Battery Park Multifamily TIA), and a separate TIA in 2023 (Smithfield DMV TIA) was performed to analyze the updated commercial outparcel within the site. The residential site traffic outlined in the Battery Park Road TIA were incorporated in the background traffic analysis for the Smithfield DMV TIA as an approved development. Vanasse Hangen Brustlin (VHB), Inc. was retained by AES-Consulting Engineers to prepare a low-level traffic impact evaluation to reevaluate previously recommended improvements for the Cottages at Battery development with minor changes to the proposed residential unit type and density.

Both the Battery Park Multifamily TIA and Smithfield DMV TIA identified the following recommendations:

Battery Park Road / Site Driveway 1 (*Intersection 4*)

- Maintain Existing Lane Configuration:
 - Battery Park Road (Eastbound): one left turn lane, one through lane, and one right turn taper
 - Battery Park Road (Westbound): One Shared through-right turn lane
 - Site Driveway (Northbound): One Channelized right turn lane
 - John Rolfe Drive (Southbound): One exclusive left turn lane, one exclusive right turn lane

Battery Park Road / Site Driveway 2 (*Intersection 5*)

- Maintain Existing Lane Configuration:
 - Battery Park Road (Eastbound): one through lane, and one exclusive right turn lane
 - Battery Park Road (Westbound): One exclusive left turn lane and one through lane
 - Site Driveway (Northbound): One shared left turn-right turn lane

The 2023 Smithfield DMV TIA additionally recommended the following improvement:

S Church Street / Williams Street (*Intersection 2*)

- Restrict westbound approach to prohibit outbound left-turns onto S Church Street

S Church Street / Mercer Street (*Intersection 3*)

- Construct the westbound approach to provide one inbound and one outbound lane
- Construct a northbound right-turn taper

Supplemental analysis is being performed to verify that the recommendations from both studies can support the current development plan provided by AES, dated February 20th, 2024, which is included in **Attachment A**. The 2019 Battery Park Multifamily TIA is an approved residential development that included 150 condominium units. The February 2024 site plan includes only 130 condominium units, an overall 20-unit reduction from the previous site plan. This memorandum summarizes the associated traffic impacts of the development with updated unit counts and subsequent reduction in site generated traffic.

Figure 1 illustrates the proposed development location and surrounding roadway network. Site access is granted via two driveways along Battery Park Road with additional shared access along S Church Street at Williams Street and the DMV Driveway / Mercer Street intersection.

Figure 1: Study Area

Trip Generation

Traffic generated by the proposed development was determined using trip generation methodology contained in the *Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition, 2021* and are illustrated in **Table 1**. Previously reported site generated traffic included in the 2019 Battery Park Multifamily TIA are included for comparison. ITE land use code 220 was used for both scenarios to provide a consistent approach.

Table 1: Trip Generation

Trip Generation	Land Use (Code)	Units	Daily		AM Peak		PM Peak	
			In	Out	In	Out	In	Out
Previous TIA	Multifamily Housing (Low Rise) (220)	150	549	549	16	53	53	31
			1098		69		84	
Updated	Multifamily Housing (Low Rise) (220)	130	454	455	15	48	48	28
			909		63		76	
Net Difference		-20	-95	-94	-1	-5	-5	-3
			-189		-6		-8	

As shown in **Table 1**, the updated density for the Cottages at Battery Park development has the potential to generate 63 and 76 trips during the AM and PM peak periods, respectively. The revised layout will generate fewer trips than those presented within the 2019 TIA, reducing daily traffic by 189 trips.

Site Trip Distribution and Traffic Assignment

Directional distribution and assignment of trips generated by the proposed development is based on the methodologies presented within the Battery Park Multifamily TIA. However, as part of the Smithfield DMV TIA, the westbound left-turns at the S Church Street and Williams Street intersection were prohibited. This requirement was a stipulation from the initial site plan approval when a full-movement access was requested at Mercer Street. With the restricted access at Williams Street, existing and proposed traffic destined to southbound S, Church Street were shifted to DMV Driveway / Mercer Street intersection.

As noted previously, the Smithfield DMV TIA analyzed the new commercial developments as well as the Battery Park Multifamily development. Detailed trip distribution for the proposed development is illustrated in **Figure 2** and reflects the changes in access at the Williams Street intersection.

Given the recent approval of the Smithfield DMV which included the Battery Park Multifamily as well as the revised roadway connection, the trip generation for this comparison includes the net reduction in site trips based on the previously applied distribution and are illustrated in **Figure 3**.

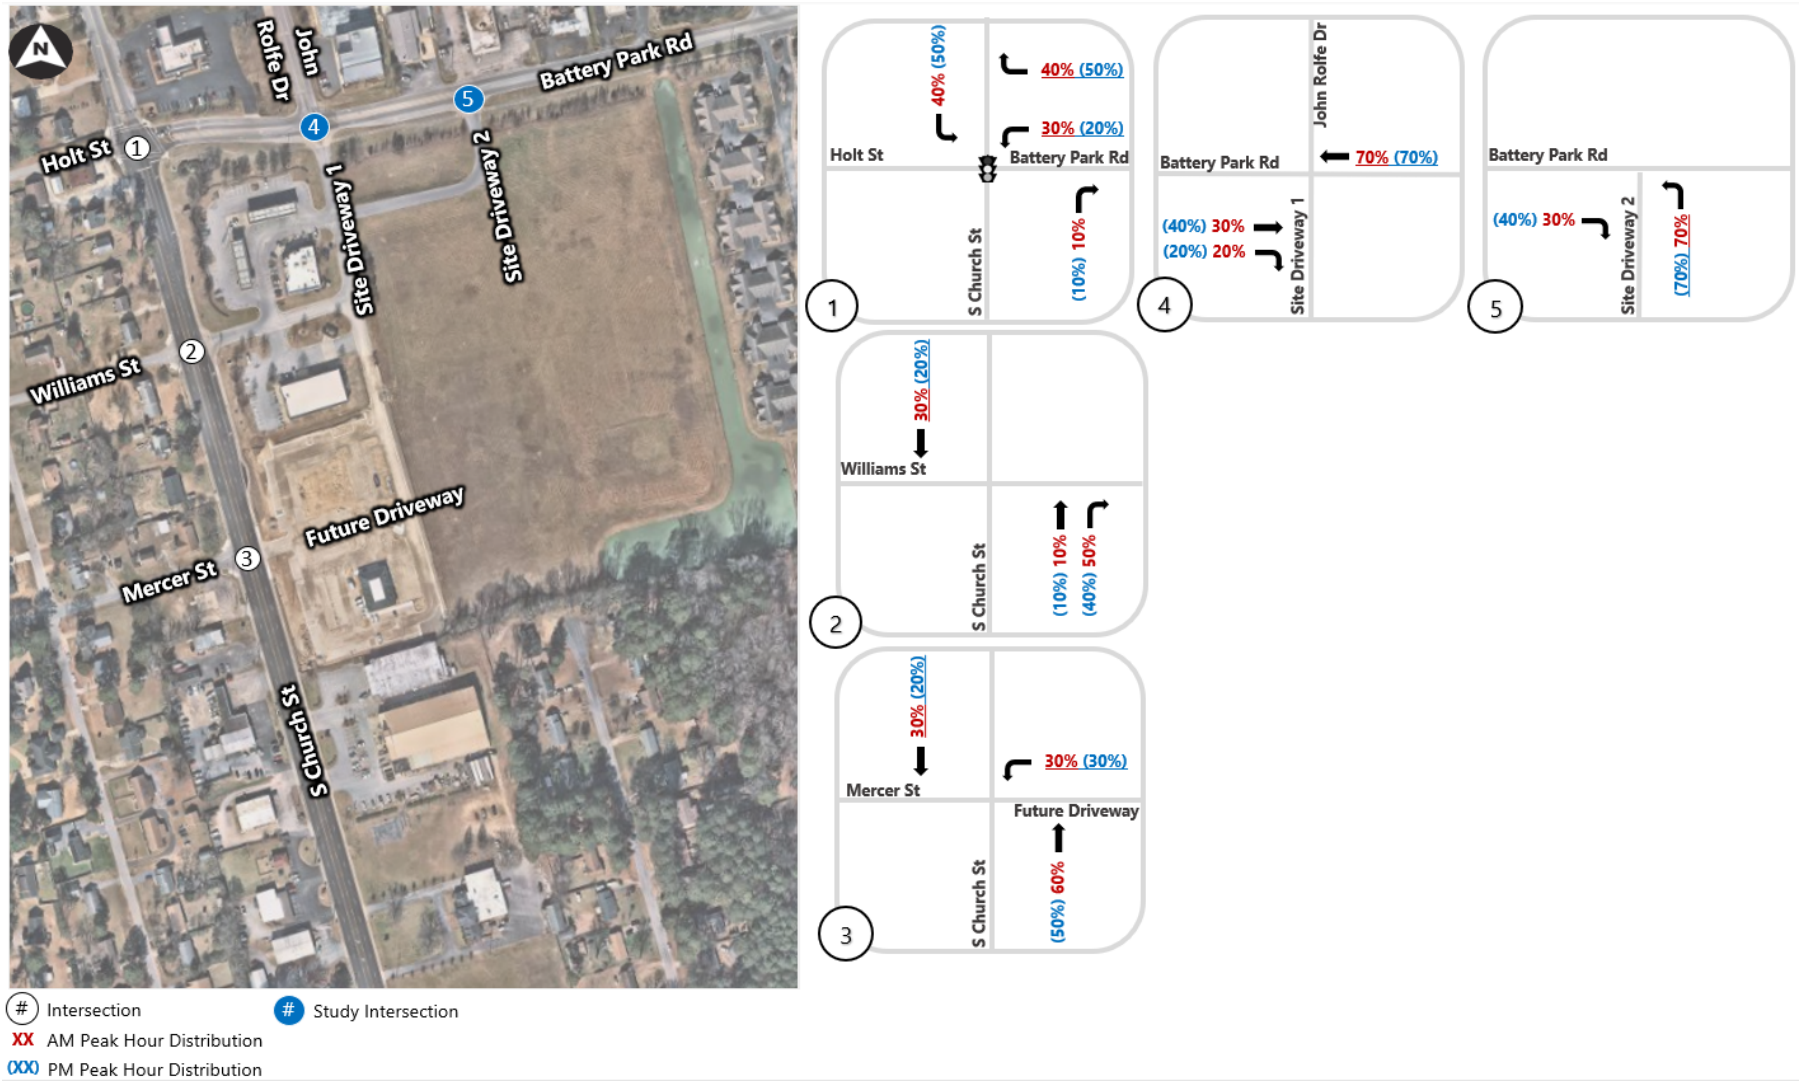

Figure 2: Updated Site Distribution

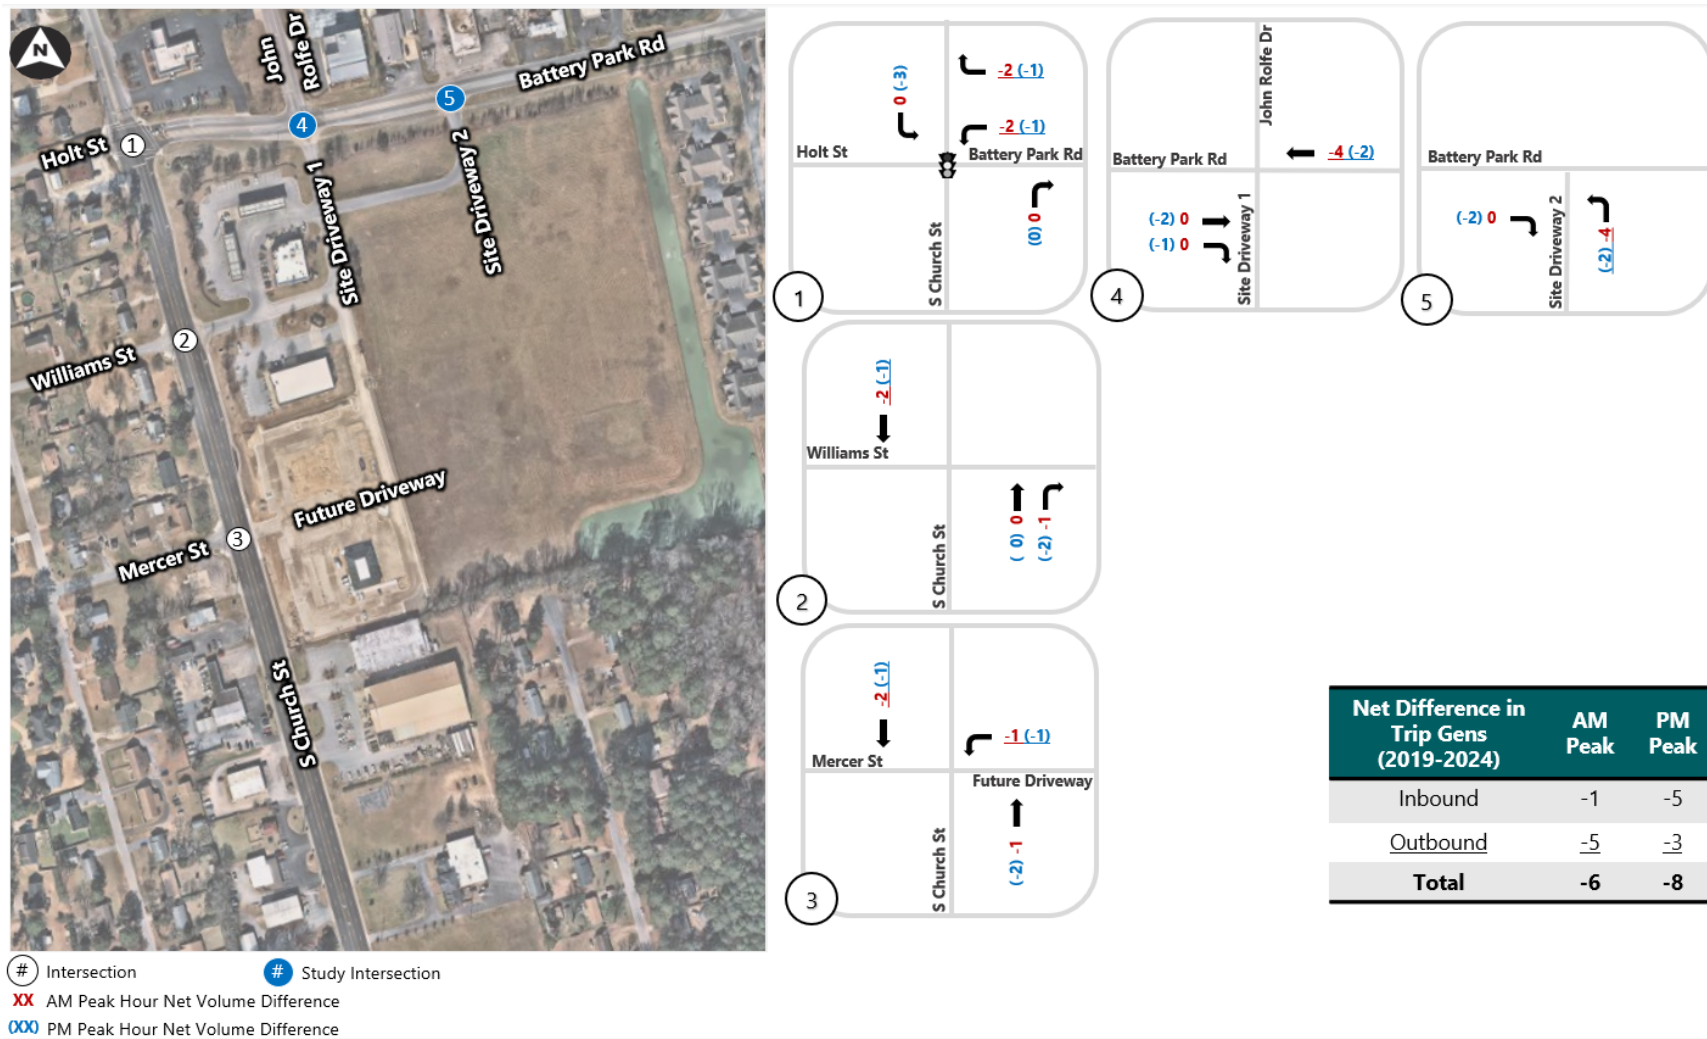

Figure 3: Net Difference in Site Trips

Build Traffic Conditions

The 2029 Horizon Build peak hour traffic volumes from the Smithfield DMV TIA account for the site trips in the Battery Park Multifamily TIA and the site trips generated by the commercial outparcel. As such, the horizon build condition within the Smithfield DMV TIA reflects the most accurate projection for the full build out traffic conditions within the study area. The Horizon Build peak hour volumes from the Smithfield DMV TIA are included in **Attachment B**.

Figures 5 & 6 illustrate the updated total horizon build traffic in the AM and PM peak periods. These traffic volumes were generated using the 2029 horizon build volumes from the Smithfield DMV TIA and applying the net reduction in trips from the Battery Park Multifamily illustrated in **Figure 3**.

Turn Lane Warrant Analysis

This supplemental memo is intended to reevaluate previously recommended improvements at the two site driveways along Battery Park Road as a part of the Cottages at Battery Park development. Turn lane warrant analysis was performed for the eastbound right turn at the intersection of Battery Park Road and Site Driveway 1 is included in **Attachment C**.

Results of the turn lane warrant analysis indicate that a right-turn lane taper is required based on the PM conditions, however the existing lane configurations at the driveway include a right-turn taper of 100 feet, therefore no additional improvements are required.

Intersection # Study Intersection
 XX (XX) [XX] 2029 Horizon Build-Smithfield DMV TIA (Net Difference) [New Build]

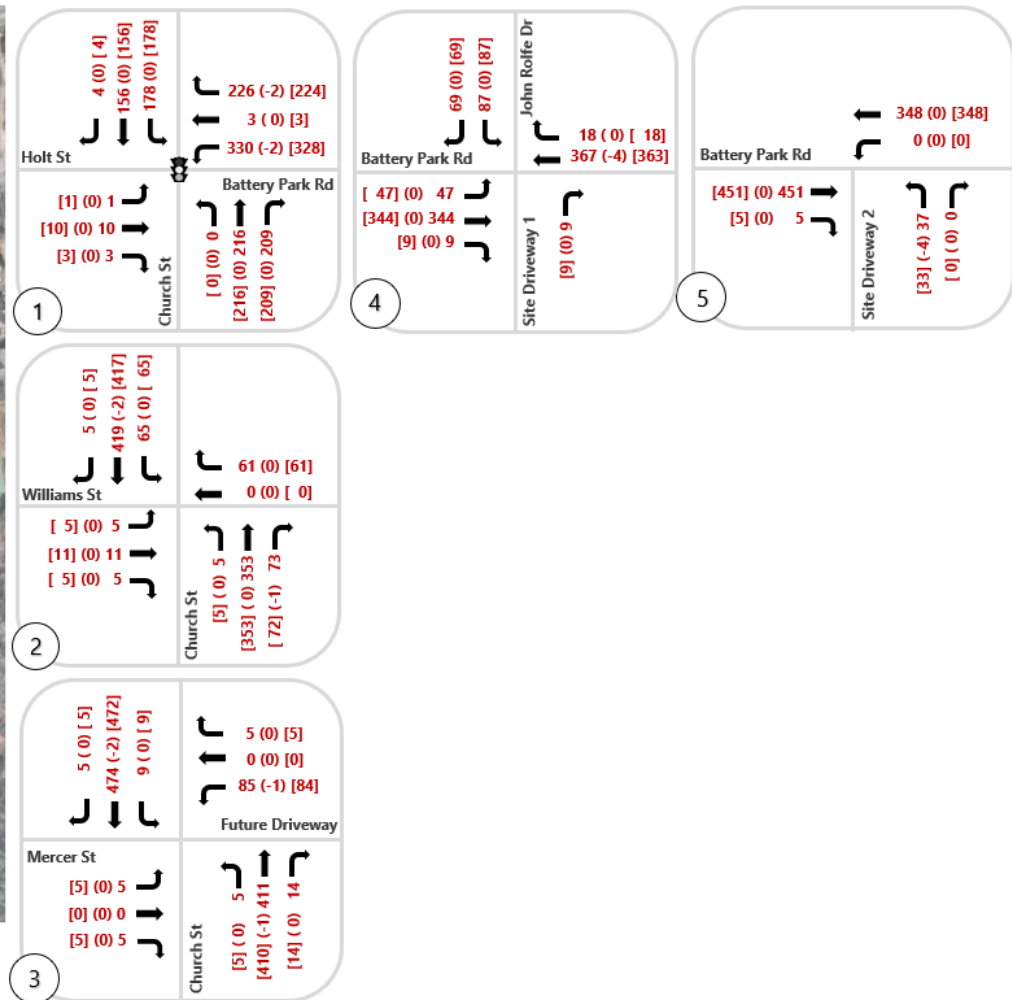

Figure 4: Updated Build AM Peak Hour 2029 Conditions

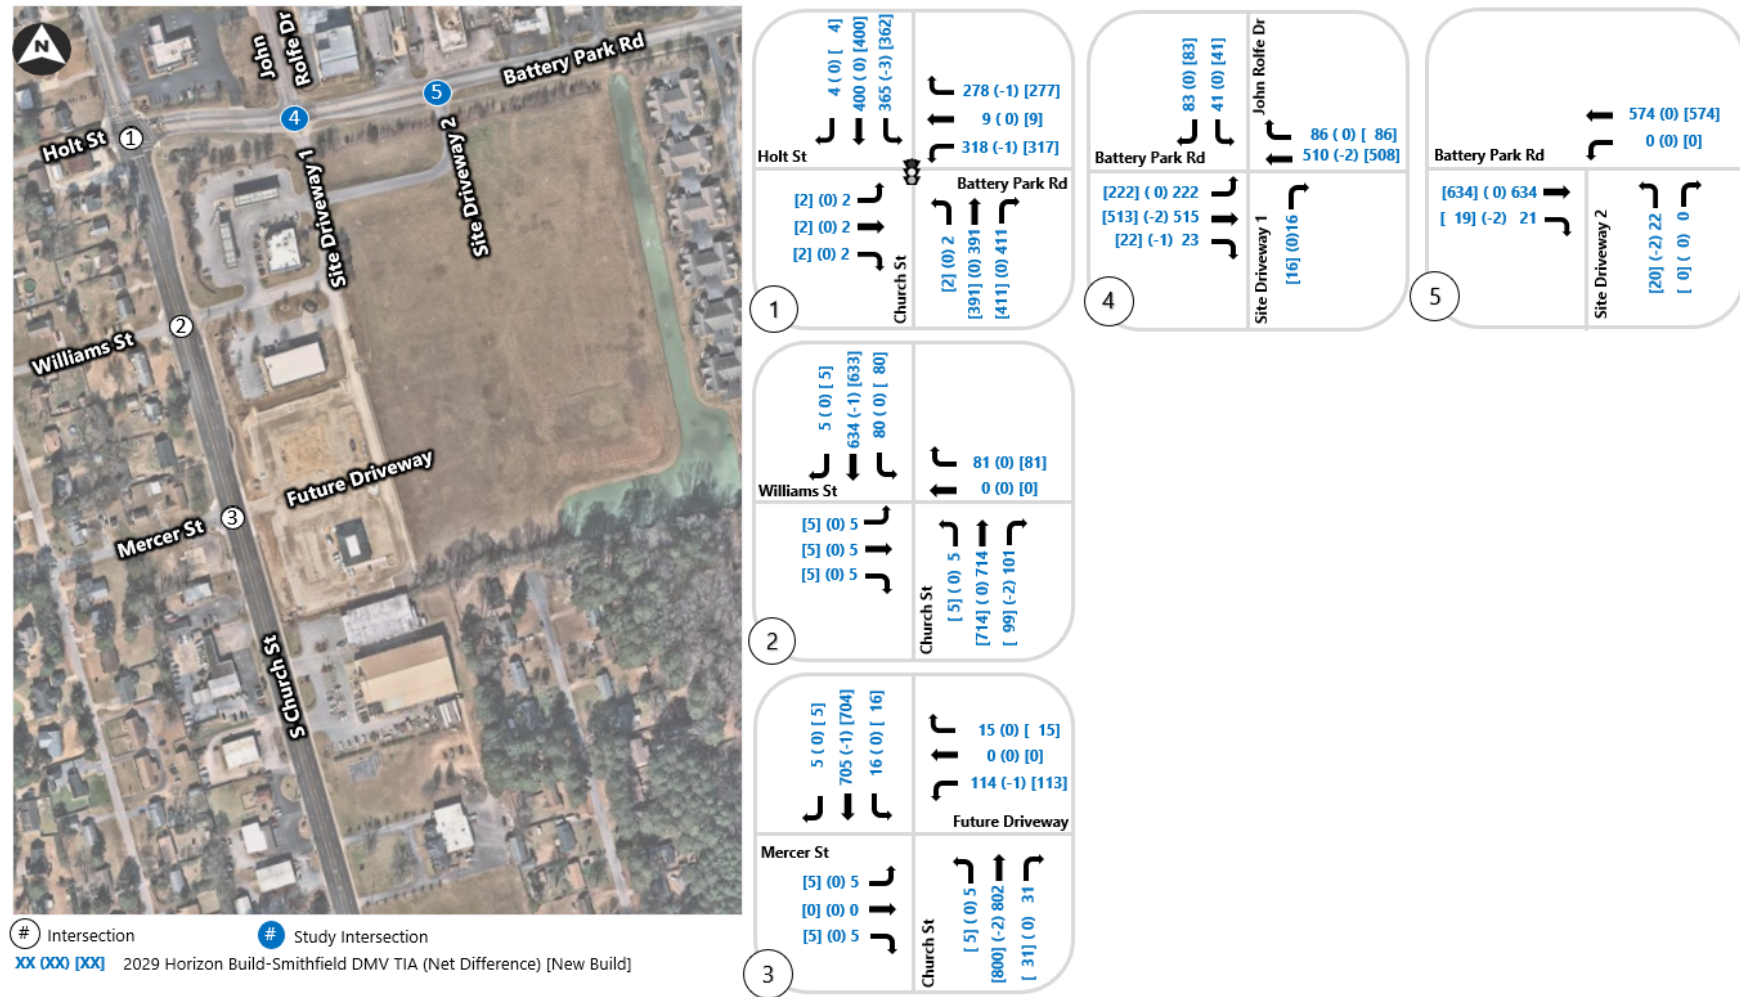

Figure 6: Updated Build PM Peak Hour 2029 Conditions

Conclusion

This supplemental memo is intended to reevaluate previously recommended improvements at the two intersections of Battery Park Road and the Site Driveways as a part of the Cottages at Battery Park development. A TIA was conducted in 2019 (Battery Park Multifamily) based upon a site plan including 150 condominium units. This memorandum summarizes the traffic impacts at site driveways associated with reducing the unit count to 130 condominium units. With the reduction in dwelling units, there is a reduction in site trips and previously recommended improvements still apply for the site driveways. It is recommended that the intersections maintain the existing lane configurations to support the proposed Cottages at Battery Park development.

Based on the updated analysis outlined in this technical memorandum, the previously recommended improvements are still applicable and include the following:

Battery Park Road / Site Driveway 1

- Maintain Existing Lane Configuration:
 - Battery Park Road (Eastbound): one left turn lane, one through lane, and one right turn taper
 - Battery Park Road (Westbound): One Shared through-right turn lane
 - Site Driveway (Northbound): One Channelized right turn lane
 - John Rolfe Drive (Southbound): One exclusive left turn lane, one exclusive right turn lane

Battery Park Road / Site Driveway 2

- Maintain Existing Lane Configuration:
 - Battery Park Road (Eastbound): one through lane, and one exclusive right turn lane
 - Battery Park Road (Westbound): One exclusive left turn lane and one through lane
 - Site Driveway (Northbound): One shared left turn-right turn lane

hundred and thirty (130) units. The proposed unit mix includes both one- and two-story units with both two- and three-bedroom options and unique detached one-and-a-half car garages.

The average unit price point has not been established; however, it is intended that all unit prices will be market based and comparable to and competitive with other similar type condominium and townhouse developments under construction within the Smithfield and Isle of Wight market. The ultimate market-based prices will likely make these condominiums affordable to teachers, police officers, firemen, nurses, medical technicians, local government workers, and other vital modest wage earners, and will satisfy an important housing component of providing home ownership opportunities as opposed to rental, as encouraged in the Comprehensive Plan.

An important feature of the project is its connection to walking trails providing active and passive open and recreational space for all residents and guests. Walkable communities are identified as desirable in the Comprehensive Plan.

A clubhouse and pool amenity proposed on the front portion project will be visible from the Battery Park Road main entrance. The clubhouse will offer vibrant lifestyle choices to active singles and families of all ages, such as an exercise room, a media room, a business center/meeting space for residents who work from home, and an indoor gathering space for resident activities and entertainment, and private party functions for birthdays, baby and bridal showers, etc.

There is no specific phasing plan for Cottages at Battery at this time. The project may be phased depending upon market absorption; however, current market conditions indicate the units will move quickly which may not require any phasing. The initial infrastructure installation is anticipated to begin in the spring of 2025 with the first units starting construction in late 2025 followed by initial unit sales beginning in the spring of 2026.

The parcel is designated as Commercial Mixed Use in the Battery Park North Planning Area in the 2022 Adopted Comprehensive Plan adopted July 5, 2022. It is a mixed-use area incorporating a wide range of residential uses bordered by a mix of corridor-based commercial, light industrial and service uses. The proposed residential land use will provide another layer of transition between the adjacent Villas of Smithfield and Wellington Estates and the commercial uses located at the South Church Street and Battery Park intersection. The subject parcel has good access to South Church Street and Battery Park Road with existing shared vehicular entrances with the Royal Farms and Dollar General sites.

- b. A statement addressing the physical, transportation, public infrastructure, community facilities, schools, and environmental impact of the proposed land use(s) for the property to be rezoned.

Custom Soil Resource Report for **Isle of Wight County, Virginia**

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

Custom Soil Resource Report

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Isle of Wight County, Virginia
Survey Area Data: Version 19, Sep 5, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 18, 2022—May 31, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

3	Chickahominy silt loam	13.9	34.4%
7	Kinston loam	9.5	23.5%
12A	Peawick silt loam, 0 to 2 percent slopes	0.1	0.2%
16	Rumford loamy sand	16.9	41.9%
Totals for Area of Interest		40.3	100.0%

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The

delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Isle of Wight County, Virginia

3—Chickahominy silt loam

Map Unit Setting

National map unit symbol: 4057
Elevation: 0 to 300 feet
Mean annual precipitation: 43 to 53 inches
Mean annual air temperature: 66 to 73 degrees F
Frost-free period: 165 to 260 days
Farmland classification: Not prime farmland

Map Unit Composition

Chickahominy and similar soils: 85 percent
Minor components: 8 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Chickahominy

Setting

Landform: Stream terraces
Landform position (three-dimensional): Tread
Down-slope shape: Concave
Across-slope shape: Concave
Parent material: Loamy marine deposits and/or clayey marine deposits

Typical profile

H1 - 0 to 2 inches: silt loam
H2 - 2 to 65 inches: silty clay

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Runoff class: Very high
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: About 0 to 6 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 9.5 inches)

Assessment and Probability Analysis
Cottages at Battery Tract
18.25 Acres
Isle of Wight County
Updated April 23, 2025

Introduction

On April 5, 2025, Circa~ Cultural Resource Management, LLC (Circa~) completed an assessment on the 18.25-acre Cottages at Battery tract of land in Smithfield in Isle of Wight County, Virginia (Figures 1 and 2). The parcel is bordered by Battery Park Road to the north, an unnamed access road to the commercial properties on the west, a residential development to the south, and a large stormwater management pond and housing development to the east. Carol D. Tyrer, Registered Professional Archaeologist (RPA), completed the walkover. Dawn M. Muir, RPA, completed the historical research, and Skye Hughes, RPA, and Simone Sattler assisted with the graphics.

Figure 2. Detailed map showing approximate project location, Benns Church quad.

Environmental Background

The primary reasons for incorporating environmental studies into archaeological projects are to learn of possible environmental constraints or lack of constraints, to determine the presence or absence of critical resources that might have influenced site distribution, etc., and to discover environmental factors—erosion, deposition, subsidence, and historical land use patterns—that might influence the integrity of archaeological sites once they have formed. A brief environmental summary of the Project Area is provided below.

The Project Area is located on the lower Mid-Atlantic coastal plain south of the Pagan River and Moon Creek and north of Jones Creek. The Project Area drains to the east and south towards the upper reaches of Jones Creek. The Project Area features a broad, fairly level coastal plain upland. The Project Area's elevation ranges from approximately 42 feet above mean sea level (AMSL) near South Church Street and falls to 22 feet AMSL in the southeast corner. The Project Area consists of a grassy field with a fringe of hardwood and softwood trees along the Project Area boundaries. An unnamed paved access road provides access to the interior of the Project Area. The site can be accessed via an unnamed access road off Battery Park Road.

Aerial photos from 1994 to present show little change within the Project Area during the last 31 years. The earlier images indicate the rural agricultural nature of the Project Area and the region. The southeastern corner was forested. By 2008, the gas station was built to the west of the Project Area, and the farmhouse was demolished, also to the west of the Project Area. The 2008 image also illustrates that the eastern half of the property was

disturbed by the construction of the stormwater management pond in the southeastern corner and along the eastern edge of the Project Area. The northern and western portions were impacted by the development of the paved access road to the gas station and the commercial lots that front South Front Street. In addition, development has occurred all around the Project Area during this period (Figures 3 - 8).

Soils

Three soil types and variants exist within the Project Area (Natural Resources Conservation Service [NRCS] 2025). These include Chickahominy silt loam, Kinston loam, and Rumford loamy sand (Table 1 and Figure 9). These types and variants are described below, including references to drainage, hunting, gathering, horticultural, and agricultural productivity potential. Further, conclusions regarding the suitability of each for historical and Native American occupation and archaeological site probability are also explained.

Soil maps and associated data provide an analysis of soil types within a geographic area. Despite soil surveyors' comprehensive and detailed coverage of most areas, researchers often miss microenvironments due to their small footprints. Unfortunately, resource-rich microenvironments were often common sites of cultural activity. As such, this analysis of archaeological potential is a "best guess" using the best available data.

Well-drained, agriculturally and horticulturally productive soils proximal to transportation corridors were the best choices for occupation during the historic period. Secondary areas, such as those containing wet soils and acid soils, after improvement, such as drainage and liming, may have also been suitable choices for historic occupation. No navigable waterways exist within the Project Area; thus, water travel is not a factor in the site probability analysis of this tract.

Areas of wet soils may have been attractive to Native American cultures. In these areas, edible herbaceous plant species may have been gathered, and faunal species browsing these areas may have been hunted successfully. Well-drained soils proximal to these

resource-rich areas may have made adequate hunting and gathering campsites where the hunted and gathered resources were processed. These sites would have left an observable archaeological footprint. Little archaeological evidence would be located within the wet areas, the immediate locale of resource procurement.

Areas containing gravelly soils may have been especially attractive to stone tool-manufacturing Native American cultures, but the level of attraction may have depended on the type and quality of the gravels available in these locations. Well-drained soils proximal to quarry-able, gravel-rich areas would have made adequate lithic material procurement campsites, but in this case, archaeological materials may be located at both the campsites and the quarry sites.

Table 1. Soils Identified Within the Project Area Boundaries.

Soil Symbol	Soil Name	Acres Within the Project Area	Location Within Project Area	Percentage Within the Project Area
3	Chickahominy silt loam	9.00	Eastern, northern, central, southern	49.20%
7	Kinston loam	7.30	Central, northern, southern	39.60%
16	Rumford loamy sand	2.10	Western, northern, southern	11.20%

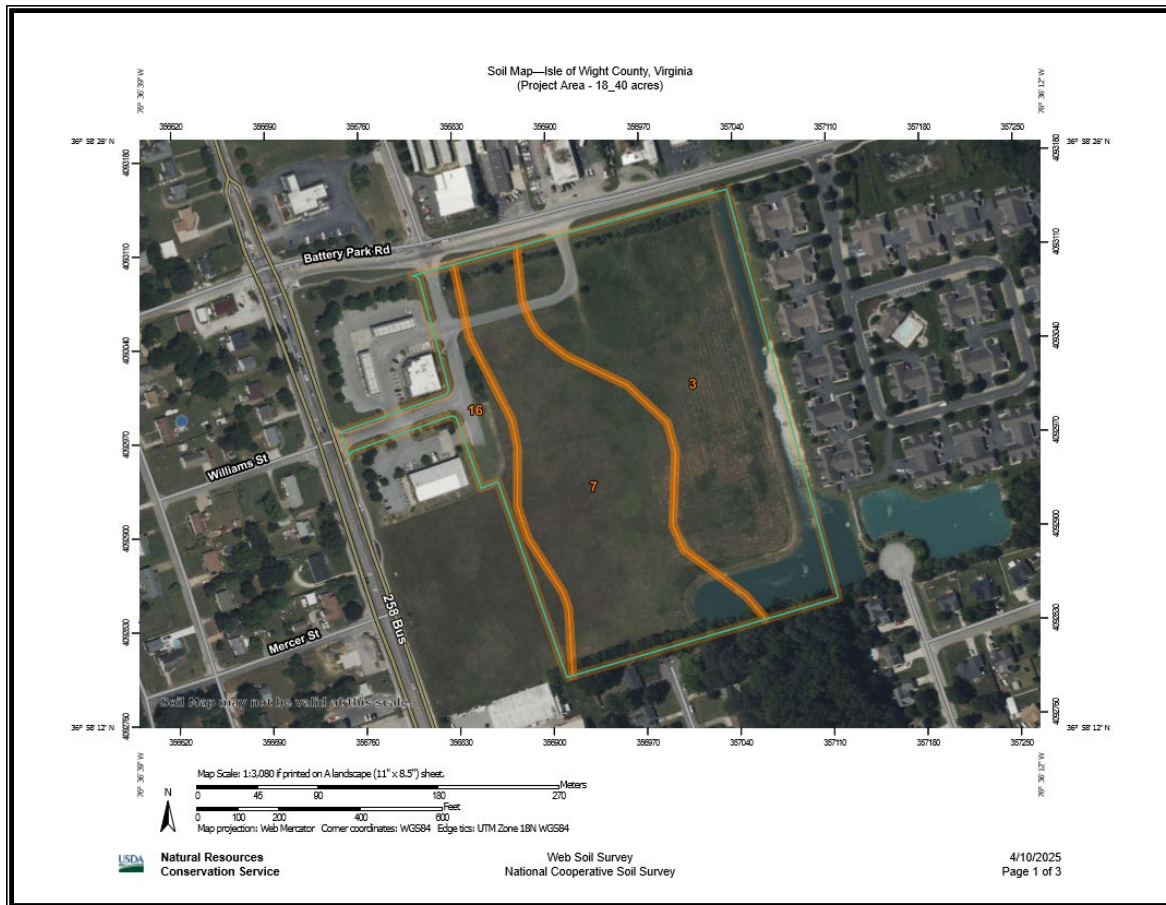

Figure 9. Project Area soil map, from NRCS website.

Soils Identified Within the Project Area

Chickahominy Soil (3)

Chickahominy soil is a very deep, poorly drained, slowly permeable soil formed in the clayey fluvial sediments along the Coastal Plain river terraces (NRCS 2025). Solum thickness ranges from 60 to over 80 inches. The soil is extremely acidic throughout unless limed. Where cultivated, this soil can support corn, soybean, hay, or pasture. Where wooded, this soil can support red maple, sweet gum, water oak, willow oak, and scattered loblolly pine.

Kinston Soil (7)

Kinston soil is a very deep, poorly drained, moderately permeable soil formed in marine sediments found on floodplains of the Coastal Plain (NRCS 2025). Solum thickness ranges from 40 to 72 inches, and depth to bedrock is over 72 inches in this strongly acidic to very strongly acidic soil. The content of rock fragments is 0% to 3% throughout the solum. This soil features negligible surface runoff. Most of this soil is in forests with limited pasture and crop growth. This soil can support growing pasture, corn, soybeans, and general farm crops where cleared. Where forested, this soil can support water-tolerant hardwoods such as sweet gum, black gum, water oak, poplar, hickory, beech, elm, and ironwood. Loblolly pines are also found in some drained areas.

Rumford Soil (16)

Rumford soil is a very deep, moderately well to somewhat excessively drained, moderately rapidly permeable soil formed in marine sediments found on marine terraces of the Coastal Plain (NRCS 2025). The depth to bedrock is over 72 inches in this extremely acidic to strongly acidic soil. Quartz gravel makes up 0% to 15% of the solum and 0% to 50% of the C-horizon. Most of this soil is in cropland or forested. Where cultivated, this soil can support corn, soybeans, small grains, and hay. Where forested, this soil can support loblolly pine, Virginia pine, and various other hardwoods.

Previous Research

Circa~ performed an archival search for the Cottages at Battery Project Area using the VDHR online V-CRIS system on April 9, 2025. This research was completed to determine if historic resources exist within the Project Area boundaries. The search identified eight archaeological resources within a one-mile radius of the Project Area's boundaries and 15 architectural resources within 1,500 feet of the Project Area's boundaries (Table 2). Figures 10 through 12 show the approximate Project Area boundaries (yellow-shaded area) and resources within proximity. Of the resources identified, no archaeological resources were identified within the Project Area, and only one architectural resource was identified within the Project Area. This resource is shaded in Table 2 and discussed in detail in the "Results and Summary" section of this report.

According to the VDHR V-CRIS search, five Phase I surveys have been completed within a one-mile radius of the Project Area between 1981 and 2019 (Figure 13). One Phase I survey was conducted to the north of the Project Area. Three Phase I surveys were conducted to the west of the Project Area. One Phase I survey was conducted to the south of the Project Area. None of these survey areas covered the Project Area. In addition, one VDHR easement for Site 300-5033 is located within one mile of the Project Area, with no VDHR easements directly within the Project Area.

Table 2. Archaeological Resources Within a One-Mile Radius of Project Area Boundaries and Architectural Resources within 500 feet of Project Area Boundaries.

VDHR Survey Number	Date of resource	Description of resource	Survey Information	Recommendation

Historic Map Review

A review of historical mapping indicates no development within the Project Area. These maps show the area as mostly open, with forested land in the southeastern corner, which may have been too wet to farm. By the 1919 USGS map, there is one building on the extreme western edge of the Project Area under the gas station. This building remains throughout the 1920s and 1930s, but by the 1952 USGS map, it is no longer visible. However, a new building appears just to the south of this building, still on the extreme western edge of the Project Area. This building remains throughout the rest of the 20th century. In the 1960s, a utility corridor ran through the western portion of the Project Area, which remains today (Figures 14 – 22).

Results and Summary

This study was conducted to provide information on the current condition of the property, as well as to assess the potential for the presence of archaeological or architectural resources within the Project Area. Fieldwork was completed on April 5, 2025, and included a pedestrian walkover of the tract to identify any obvious archaeological or architectural resources and the site potential of various landforms. Plates 1 through 10 illustrate the current conditions of the Project Area.

Plate 1. View of the stormwater management pond in the southeastern corner of the Project Area, looking southeast.

Plate 2. View of the Project Area from the southeastern corner, looking north.

Plate 3. View of the Project Area from the southeastern corner towards the commercial properties along the western boundary, looking northwest.

Plate 4. View of the southern edge of the Project Area towards the residential and commercial properties, looking southwest.

Plate 5. View of the residential properties along the eastern border of the Project Area, looking east.

Plate 6. View of the residential properties and the stormwater management pond along the eastern border of the Project Area, looking south.

Plate 7. View of the construction road to access the stormwater management pond and the residential development on the southern edge of the Project Area, looking south.

Plate 8. View of the paved access to the commercial properties along the western border of the Project Area, looking west.

Plate 9. View of the paved access to the commercial properties along the western border of the Project Area and the area where the soil is excessively drained, looking south.

Plate 10. View of the paved access to the commercial properties along the western border of the Project Area and the area where the soil is excessively drained, looking north.

This study was conducted to provide information on the current condition of the Project, including map-projected sites within the Project. Fieldwork was completed and included a pedestrian walkover and judgmental shovel testing to identify any obvious archaeological or architectural resources. All open, exposed areas were inspected for artifacts and signs of cultural features. Archival research commenced with examining cartographic and historical works on file online with the Library of Congress, Isle of Wight County, and VDHR. Efforts were made to determine whether historic roads and sites were present within the Project Area and whether subsurface cultural deposits were likely present. Data accumulated during previous archival research on historic sites throughout the region was also examined.

The Project Area consists of a grassy field with a fringe of hardwood and softwood trees along the property's edges. The soil review and analysis indicate only 2.10 acres of excessively drained soil type on the western side of the Project Area, mainly under the paved access road, with the remaining 16.3 acres consisting of poorly drained soils with hydric characteristics. In addition, the 2008 aerial indicates the eastern side of the site was impacted by the construction of the stormwater management pond.

Three shovel tests, approximately 1.50 feet in diameter, were judgmentally excavated to sample the landforms. All shovel tests were excavated according to natural levels to the sterile subsoil, and all soils were screened through ¼-inch wire mesh. Profiles were recorded for representative shovel tests, and soil color was recorded per the Munsell classification system. All shovel tests were recorded on standard field forms. All shovel tests were backfilled. In general, shovel test profiles indicated two soil strata before reaching sterile subsoil. Stratum A, approximately 0.30 to 0.65 feet thick, consisted of a grayish-brown (10YR 6/4) sandy silty loam. Stratum B, approximately 0.20 to 0.45 feet thick, consisted of yellowish-brown (10YR 6/6) silty sand. Stratum C excavated approximately 0.15 to 0.20 feet thick, consisting of a sterile yellowish-brown (2.5Y 5/6) sandy clay subsoil. No artifacts were recovered from the shovel test excavations. No standing structures were noted on the property. Plates 1 through 12 show the typical conditions of the Project. Figure 19 shows the shovel test locations.

Figure 19. Shovel test location map.

Architectural Resources

Site 300-0112

Site 300-0112 is the circa 1850 Powell House, identified by the Virginia Department of Transportation (VDOT) in 1988 when they completed a Phase I cultural resources survey for improvements to Route 10 in Smithfield. According to the VDHR V-CRIS form, VDOT noted that the site was situated approximately 100 yards from the right-of-way and included one house, one garage, one smokehouse, and two sheds. VDOT noted that the house was a one-story, vernacular style, with a hall and parlor plan, a wood-frame house clad in weatherboard, and resting on a brick foundation. The gable roof was covered in standing-seam metal, and there was an interior brick chimney and one exterior brick chimney. The one-story front porch had simple posts, a decorative cornice, a flat roof, and a trellis balustrade. The windows were sash, double-hung, 6/6, wood-frame and there was an enclosed side porch and addition on the north elevation. VDOT did not provide any description of the outbuildings. They stated that the house was well-preserved and appeared to be the oldest building in the area. They noted that the house was surrounded by modern commercial development, and according to the VDHR V-CRIS form, they did not make any recommendations regarding the site's eligibility for listing on the National Register of Historic Places. There is a 2019 note on the VDHR V-CRIS that is not attributed to any organization that stated aerial views indicated that the property had been cleared of buildings and redeveloped since 2002 (Figure 11). No

further survey work occurred at the site, and there is no formal determination of eligibility for the site listed on the VDHR V-CRIS form.

Plate 11. View of the access road from South Church Street and the location of Site 300-0112, looking southeast.

In addition, five structures dating from the 1930s to 1950s were previously identified across South Church Street, and one structure at the intersection of South Church Street and Battery Park Road. These structures face South Church Road, with the five structures looking towards the commercial property in front of the Project Area, and the other property faces South Church Street looking away from the Project Area. The 1999 Phase I survey recommended the structures were not eligible for listing on the National Register of Historic Places. The one historical 1860 house and outbuildings were demolished in 2008, as shown in the aerial imagery and Figure 11.

Based on the historical analysis, fieldwork, and soil classification of poorly drained soils, Circa~ recommends the undertaking's probability of affecting significant cultural resources is extremely low. In addition, the Project Area is surrounded by commercial properties to the west and north and residential properties to the south and east, which would mask the Project development from nearby historic structures. Circa~ recommends no additional survey work for the Project Area.

Appendix E: Professional Qualifications	

1.0 EXECUTIVE SUMMARY

1.1 Property Description

This Phase I Environmental Site Assessment (ESA) was completed for an unaddressed tax parcel located at the southeast corner of the intersection of South Church Street and Battery Park Road in Smithfield, Virginia (Tax Parcel Number 21A-01-511) (the **"Subject Property"**). The site consists of an undeveloped, approximately 18.25-acre, grassy field with a stormwater impoundment along the eastern boundary and around the southeast corner of the parcel. There are no structures on the site.

1.2 Critical Dates

Report issuance date	February 1, 2024
Date of earliest interview with owner, operator, or occupant	January 31, 2024
Date of federal, tribal, state, and local government records review	January 17, 2024
Dates of site visit	January 25, 2024
Date of environmental professional declaration	February 6, 2024
Earliest date from above	January 17, 2024
Presumed report viability date	July 15, 2024

1.3 Findings and Opinions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of an unaddressed parcel southeast of the intersection of South Church Street and Battery Park Road, Smithfield, Virginia, the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report.

This assessment has revealed no Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, Historical Recognized Environmental Conditions or Significant Data Gaps in connection with the Subject Property.

2.0 INTRODUCTION

2.1 Purpose/Scope of Services

Bay Environmental was contracted by Brian Mullins, Manager of Development Logistics and Consulting, LLC, to complete a Phase I ESA on the above referenced property in Smithfield, Virginia (Vicinity Map, Appendix A). The Phase I ESA has been completed in general accordance with the American Society of Testing and Materials (ASTM) Standard E 1527: *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (2021). This investigation included an examination of the Property and a review of records to determine if there were any RECs, as defined by ASTM E-1527-21, which would create environmental liability or limit the use of the Property.

Unless a different purpose is stated: The purpose of this Phase I ESA is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA liability that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the Subject Property consistent with good commercial and customary standards and practices as defined at 42 U.S.C. § 9601(35)(B).

The term "recognized environmental condition" is defined in ASTM Practice E 1527-21 at Section 1.1.1 as:

"(1) the presence of *hazardous substances* or *petroleum products* in, on, or at the Subject Property due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the Subject Property due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the Subject Property under conditions that pose a *material threat* of a future *release* to the *environment*. A *de minimis* condition is not a *recognized environmental condition*."

An environmental site assessment meeting or exceeding ASTM 1527-21 is presumed to be viable when it is conducted within 180 days of the date of acquisition of the Subject Property. If the Phase I ESA is not being conducted as part of an acquisition the report is presumed to be viable if it is conducted within 180 days of the transaction (such as a lease or refinance). The presumed report viability date is calculated by adding 180 days to the earliest date a Phase I ESA component was completed. If the report viability date has passed, but it has been less than a year since the first component of the Phase I ESA was completed, a Phase I ESA Update should be conducted. A new Phase I ESA should be conducted if the date of the earliest Phase I ESA component is greater than one year ago. All information contained in a Phase I ESA should be collected or updated within one year of the acquisition/transaction date.

2.2 Limitations and Exceptions

Adjacent properties were viewed from the Subject Property and public thoroughfares. A thorough inspection of these properties was precluded by lack of access.

Business environmental risk items, such as radon, lead based paint, asbestos, cultural and historic resources, wetlands, and mold, which are not a standard part of an ASTM Phase I ESA, were not included in this investigation **unless specifically discussed as a "Non-Scope ASTM Item."**

An evaluation of regulatory compliance was not included in the scope of this investigation.

No sampling or testing (for example water, soil, building materials, or air) was conducted during this Phase I ESA.

Emerging contaminants such as Per- and Polyfluoroalkyl Substances (PFAS) are not currently regulated by CERCLA as hazardous substances. Therefore, they are outside the scope of a Phase I ESA and are not included in the scope of this report.

This Phase I ESA is based upon conditions at the time of completion of the individual ESA elements.

2.3 Data Failure and Data Gaps

Aerial photographs and topographic maps were not reviewed for the years between or prior to the dates listed in this report. The review and description of these historical documents represents the best interpretation of the environmental professional. This is not believed to be a significant data gap.

Sanborn fire insurance maps did not exist for this location. This is not believed to be a significant data gap as there are other historical sources.

3.0 SITE INSPECTION

3.1 Methodology

Sara Howard of Bay Environmental inspected the Subject Property on January 25, 2024. The Subject Property was inspected by walking throughout most of the interior of the site and around the perimeter, where accessible.

Adjacent properties were only viewed from the Subject Property and public thoroughfares.

3.2 General Site Information

Table 1 below summarizes general information regarding the Subject Property and surrounding properties. Figure 2 (Appendix A) and Photographs 1-5 depict the Subject Property.

Table 1: Subject Property Information.	
Subject Property Location	
Southeast corner of the intersection of South Church Street & Battery Park Road in Smithfield, VA.	
Current Use(s) of Subject Property	
The Property currently contains an undeveloped grassy field and stormwater pond.	
Past Use(s) of Subject Property	
The Property has been a vacant lot with undeveloped grassy areas and woods since at least 2006. Based upon a review of historical aerial photographs, it appears that about 3/4 th of the Subject Property was used for agriculture prior to 2006, dating back to at least 1959. During this 46+ year period, the southeast quadrant of the site was wooded land.	
Current Use(s) of Adjoining Properties	
North	Battery Park Road, then commercial (Smithfield Self Storage, James River Mechanical, Steeltech Industrial Fab, Charlie's Body Shop, Lennox A/C & Farm Bureau Insurance)
South	Commercial (True Value hardware) and residential
East	Residential (Villas of Smithfield)
West	Commercial (Royal Farms, Dollar General and DMV office under construction), South Church Street and a mix of commercial and residential
Past Use(s) of Adjoining Properties	
Adjoining properties to the north and west were used for residential and commercial purposes back to at least the late 1950s. Aerials show that the adjoining property to the east was agricultural until 2000, then transitioned to residential. Adjoining properties to the south were agricultural and wooded land until at least 1961; commercial development near the SW corner of the Property began by 1963 and residential development on adjoining parcels along the southern border began in the early 1980s.	

Table 1: Subject Property Information (cont.)	
Current and Past Surrounding Area Uses	
The area is currently a mix of commercial businesses and residential properties. The 1959 aerial appears to show that much of the area to the north, east and south of the Subject Property was agricultural or wooded land, transitioning to residential and commercial usage in the early 1960s along the South Church Street and Battery Park Road corridors.	
Description of Subject Property Improvements	
Structures	There are no structures on the site.
Roads	The Subject Property can be accessed from Battery Park Road to the north and South Church Street from the west.
Sewage Disposal/ Septic Systems	N/A
Water Source	N/A
Heat Source	N/A
Interior Drains or Sumps	N/A
Pits, Ponds, or Lagoons	There is a stormwater containment ditch along the eastern boundary of the property and a pond near the southeast corner, with a ditch extending a short distance west of this structure (see Figure 2).
Wastewater	N/A
Stormwater	Stormwater containment system as described above.
Wells	None observed
Other	N/A

Photograph 1: View of the property looking northeast from the SW corner.

Photograph 2: View of the west side of the Property looking north from the SW corner.

Photograph 3: View of the south end of the Property looking east from the SW corner.

Photograph 4: View of the stormwater pond at the southeast corner of the Property.

Photograph 5: Representative views of commercial businesses on the adjacent parcels to the north, across Battery Park Road.

3.3 Site Inspection and Recognized Environmental Conditions

Bay Environmental inspected the Subject Property with regard to potential RECs. Table 2 lists the items inspected; a narrative of the findings follows.

Table 2: Visual Inspection Checklist.		
	On-site (Check for yes)	Off-site (Check for yes)
Hazardous Substances and Petroleum Products in Connection with Identified Uses		
Aboveground Storage Tanks (ASTs)/Fill-Vent Lines		
Underground Storage Tanks (USTs)/Fill-Vent Lines		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drums, Totes, and/or Intermediate Bulk Containers		
Containerized Materials		
Hazardous Substances and Petroleum Products <u>not</u> in Connection with Identified Uses		
Unidentified Substance Containers		
Potential PCB Containing Equipment		
Stains or Corrosion Inside the Building		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste		
Other Hazardous Substances and/or Petroleum Related Items		

No on-site or off-site RECs were observed during the property inspection.

4.0 RECORDS REVIEW

4.1 Regulatory Database Review

Information from federal and state database records was obtained from Environmental Data Resources, Inc. (EDR). See Appendix B for complete database details.

4.1.1 Federal Database Review

Table 3: Federal Database Listings Having Potential Impacts to the Property.	
Database (A-H) and Listings (1, 2, etc.)	ASTM Minimum Search Distance / Listing Distance
A. National Priorities List	1.0 mile
NONE FOUND	
B. Delisted National Priorities List	0.5 mile
NONE FOUND	
C. SEMS & SEMS Archive (formerly CERCLIS and CERCLIS NFRAP)	0.5 mile
NONE FOUND	
D. RCRA CORRACTS List	1.0 mile
NONE FOUND	
E. RCRA TSD List	0.5 mile
NONE FOUND	
F. RCRA Generators List	Subject Property and Adjoining Properties
Charlie's Body Shop, 213 Battery Park Rd.	Adjacent North, across Battery Park Rd
G. Institutional Control/Engineering Control Registries	Subject Property Only
NONE FOUND	
H. Emergency Response Notification System (ERNS)	Subject Property Only
NONE FOUND	

Note – The properties listed in this table are those Bay Environmental has deemed as having potential for impact(s) to the Subject Property. Please see Appendix B for a complete listing of properties within the minimum search distance. Please also see Appendix B for definitions of acronyms.

Based upon the Federal database review, one federally listed facility exists within the minimum search distances:

- **Charlie's Body Shop**, located across Battery Park Road from the Subject Property, was identified as a RCRA Small Quantity Generator of hazardous wastes. Records obtained from the Virginia Department of Environmental Quality (DEQ) by Bay Environmental

during a previous (2019) assessment of the Property noted that a compliance inspection of the site conducted in 2002 by the agency found no violations of regulatory issues. No other records were available for review. The listing is not considered to be a potential impairment to the subject Property and no further assessment is believed to be necessary.

4.1.2 State Database Review

Table 4: State Database Listings Having Potential Impacts to the Property.	
Database (A-I) and Listings (1, 2, etc.)	ASTM Minimum Search Distance / Listing Distance
A. State Equivalent of NPL	1.0 mile
Virginia does not have a program that is a state equivalent of NPL	
B. State Equivalent of CERCLIS	0.5 mile
Virginia does not have a program that is a state equivalent of CERCLIS	
C. Solid Waste Landfill/Disposal Site	0.5 mile
NONE FOUND	
D. Leaking Underground Storage Tank (LUST)	0.5 mile
Several cases but none deemed to have potential for significant impairment to the Subject Property.	
E. Registered Underground Storage Tank (UST) and Aboveground Storage Tank (AST)	Property and Adjoining Properties
Two listings for adjacent properties (see below)	
F. Institutional Control/Engineering Control Registries	Property Only
NONE FOUND	
G. Voluntary Remediation Program (VRP)	0.5 mile
NONE FOUND	
H. Brownfield Sites	0.5 mile
NONE FOUND	
I. Spills	Property and Adjoining Properties
Royal Farms, 1201 S. Church Street	Adjacent to NW corner of the Subject Property

Note – The properties listed in this table are those Bay Environmental has deemed as having potential for impact(s) to the subject property. Please see Appendix B for a complete listing of properties within the minimum search distance. Please also see Appendix B for definitions of acronyms.

A review of the State database identified several state-listed facilities within the search radius of the Property:

- Seven LUST cases were listed within the minimum search distance of the Property. None of the cases were on or immediately adjacent to the Subject Property and all of the sites appear to be cross-gradient to the Property. These LUST cases have been formally closed by the DEQ and are not believed to represent a potential for significant impairment to the Property. Therefore, no further assessment is believed to be warranted.
- The state database identified two adjoining sites with DEQ-registered USTs:
 - A former gas station (now a True Value Hardware store) located at 1409 South Church Street had three 10,000-gallon gasoline tanks and an 8,000-gallon kerosene tank, all of which were removed from the ground at an unspecified date. There are no indications in the record of any leakage or other environmental concerns associated with these tanks and no further assessment is recommended.
 - Royal Farms gas station/convenience store, located on a contiguous parcel at the northwest corner of the Subject Property (1201 S. Church St), was identified as having three gasoline USTs (two 15,000 gallon and one 30,000 gallon). All of these tanks are currently in use. Information obtained from the DEQ in response to a FOIA request from Bay Environmental showed that these USTs were installed in July 2006. The records indicate that the DEQ's most recent tank inspection in September 2020 found the USTs to be in full compliance with regulatory requirements. No further assessment is believed to be warranted.
- The database revealed a petroleum SPILL case that occurred in March 2023 on the site of the Royal Farms store adjacent to the Subject Property. Records show that approximately 10 gallons of gasoline was accidentally spilled while a customer was fueling a vehicle. The DEQ verified that necessary compliance actions had been completed and the pollution report (SPILL) case was closed. No additional review is recommended.

The database did not reveal any unmapped ("orphan") sites within the minimum search distances of the Property.

4.2 Historical Use Records

4.2.1 Fire Insurance Maps

Based on a review of Sanborn Fire Insurance Maps by Environmental Data Resources (EDR), no coverage of the area is available for the Subject Property (Appendix C).

4.2.2 Aerial Photographs

Aerial photographs reviewed for this Phase I ESA were obtained from Google Earth for 2022 and Environmental Data Resources, Inc. for the years 1959, 1961, 1963, 1972, 1982, 1989, 1994, 2000, 2006, 2009, 2012 and 2016 (Appendix C). A summary of findings is as follows:

Table 5: Aerial Photographs Review Summary.		
Year	Location	Description of Properties
2022 - 2012	Within the Site	Similar to the time of the site visit (vacant, undeveloped grassy field with stormwater impoundment along eastern boundary and SE corner of parcel; paved access road connecting Royal Farms at NW corner of property to Battery Park Rd)
	North	Battery Park Road and commercial properties (Smithfield Self Storage, James River Mechanical, Steeltech Industrial Fab, Charlie's Body Shop, Lennox A/C & Farm Bureau insurance)
	South	Commercial (True Value Hardware) and residential
	East	Residential (Villas of Smithfield)
	West	Similar to the time of the site visit (S. Church Street, then a mix of commercial and residential (across Church St); Royal Farms and Dollar General located on parcels contiguous to the Subject Property)
2009	Within the Site	Similar to the time of the site visit
	North	Similar to the time of the site visit
	South	Similar to the time of the site visit
	East	Similar to the time of the site visit
	West	Similar to the time of the site visit (except Dollar General not yet built)
2006	Within the Site	Vacant, undeveloped grassy field
	North	Similar to the time of the site visit
	South	Similar to the time of the site visit
	East	Similar to the time of the site visit
	West	Similar to the 2009 photograph (except Royal Farms not yet built)
2000 - 1982	Within the Site	Primarily agricultural with wooded area at SE corner of Property; aerial photographs show residential or farm buildings on western side of the Property. No stormwater impoundment ditches or pond on the site.
	North	Similar to the time of the site visit
	South	Similar to the time of the site visit
	East	Agricultural and undeveloped wooded area at south end
	West	Similar to the 2006 photograph
1972 - 1963	Within the Site	Similar to the 1982 photograph
	North	Similar to the time of the site visit, but less commercial or residential
	South	Commercial at SW corner; wooded and no residential development on adjoining properties
	East	Agricultural and wooded land
	West	Similar to the 2006 photograph

Table 6: Aerial Photographs Review Summary (cont.)		
Year	Location	Description of Properties
1961 - 1959	Within the Site	Similar to the 1982 photograph
	North	Battery Park Road and possibly agricultural with house or farm buildings
	South	Agricultural and wooded land
	East	Agricultural and wooded land
	West	Similar to the 2006 photograph

Note: Portions of this aerial photograph review summary were taken from a previous (2019) site assessment of the Subject Property performed by Bay Environmental, Inc.

No RECs were identified through the aerial photograph review.

4.2.3 Historical Topographic Maps

Topographic Maps reviewed for this Phase I ESA Update were obtained from the U.S. Geological Survey for the years 2022, 2016, 2010, 1992, 1986, 1980, 1972, 1965, 1957 and 1952 (Appendix C).

No structures are illustrated on the 2022-2010 maps. Based on a review of the topographic maps, no development of the Subject Property was apparent throughout the 60-year period covered by the map series. Buildings were depicted on adjoining properties to the north (across Battery Park Road) and south from 1992-1952 and to the west (across South Church Street) from 1992-1957. The maps do not show any apparent development on the adjoining land to the east of the Subject Property.

Moon Creek, a tributary of the Pagan River, is depicted in all of the maps, although the older topos (1986-1952) label this waterway as "Morris Creek". Most of the land from the Subject Property east and northeast to the Pagan River is shown as wetlands and/or wooded land.

No RECs were identified through the topographic map review.

4.2.4 Tax Files

Based on a review of the Isle of Wight County tax records, the Property is currently owned by Waterford at Battery Park, LLC.

4.2.5 Recorded Land Title Records

Recorded land title records were not provided by the User of this report. However, this is not believed to be a significant data gap because other historical sources were available. If any pertinent information regarding recorded land title records is provided at a later date, an addendum will be added to this report.

4.2.6 Building Department Records

The Property consists of a vacant, grassy lot. Therefore, building department records were not reviewed.

4.2.7 Zoning/Land Use

According to the Isle of Wight County real estate records, the Property Class is Commercial/Industrial. It is currently vacant land.

4.2.8 Street Directories

A street directory review was not conducted since the Subject Property does not have a formal street address.

4.3 Physical Setting Sources

4.3.1 Topographic Map

A review of the Benns Church, Virginia topographic map (USGS; photo revised 1986) revealed that the Property is approximately between 25 and 40 feet above sea level. The vicinity map was also interpreted to show that the apparent groundwater and surface flow is in a northeasterly direction towards the headwaters of Moon Creek, a tributary of the Pagan River.

4.3.2 Geologic Map

The subject property is located within the Coastal Plain Physiographic Province of Virginia. A review of the Geologic Map and Generalized Cross Sections of the Coastal Plain and Adjacent Parts of the Piedmont, Virginia (U.S. Geological Survey, 1989) revealed that the Property has been mapped as the Sedgefield Member of the Tabb Formation, which is pebbly to boulder, clayey sand and fine to medium, shelly sand grading upward to sandy and clayey silt.

4.3.3 Groundwater Map

A review of the *Groundwater Map of Virginia* (Virginia Water Control Board, 1985) revealed that the Property lies within the Coastal Plain Ground Water Area. This area is composed of unconsolidated sediments of Cretaceous to recent age overlying a bedrock basement. The sediments thicken eastward from a featheredge at the Fall Zone to 7,000 feet along the coastline. Sediments dip gently eastward and are subdivided into four major aquifers from the land surface downward. The Aquifers are separated by confining beds, which restrict but do not prevent vertical flow of groundwater.

4.3.4 Soil Survey Map

The USDA Natural Resource Conservation Service reports that the Property consists of Chickahominy silt loam, Kinston loam, and Rumford loamy sand. The soil map with full soil descriptions is included in Appendix A.

5.0 INTERVIEWS

Sara Howard of Bay Environmental coordinated the interviews discussed in the following subsections. Appendix D contains documentation from the interviews.

5.1 User Provided Information

According to ASTM Standard E-1527-21, the “user” of this report should provide the following information:

- Provide chain of title information with environmental liens and activity or use limitations
- Provide information to the environmental professional if the user has specialized knowledge or experience relevant to RECs in connection with the Subject Property
- Provide information to the environmental professional if the user has actual knowledge of environmental lien or activity use limitations in connection with the Subject Property
- Provide information to the environmental professional if the user has knowledge of a lower purchase price due to hazardous substances or petroleum products, if applicable
- Provide information to the environmental professional if the user has commonly known or reasonably ascertainable information relevant to RECs in connection with the Subject Property
- Degree of obviousness of releases or threatened releases at the Subject Property and the ability to detect releases or threatened releases by appropriate investigation
- Provide reasoning to the environmental professional for the purpose of the Phase I ESA.

The user of this report provided most of this information through the User Questionnaire included in Appendix D. Specifically, Nathan Diehl, representative of Development Logistics and Consulting, LLC (the User), completed the User Questionnaire.

5.2 Interviews with Past and Present Owners, Operators, and Occupants

John T. Mamoudis, representative of Waterford at Battery Park, LLC, the current owner of the Subject Property, was interviewed via telephone by Sara Howard of Bay Environmental regarding the environmental condition of the Subject Property. In short, Mr. Mamoudis indicated that the Subject Property has been grassy land since their purchase and they have only mowed the site (see Appendix D, Record of Communication).

5.3 Interviews with State and/or Local Government Officials

A FOIA request was submitted to the Town of Smithfield for all records related to USTs, ASTs, petroleum releases and/or other hazmat incidents on the Subject Property. The Town’s response indicated that they did not have any records relevant to the FOIA inquiry (see Appendix D).

A FOIA request was submitted to the Virginia DEQ for records related to petroleum storage tanks on the Subject Property, as well as information regarding a reported spill at the site. The DEQ provided relevant records in response to this FOIA inquiry (see discussion in Section 4.1.2).

6.0 FINDINGS AND OPINIONS

This assessment has revealed no Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, Historical Recognized Environmental Conditions or Significant Data Gaps in connection with the Subject Property.

7.0 CONCLUSIONS

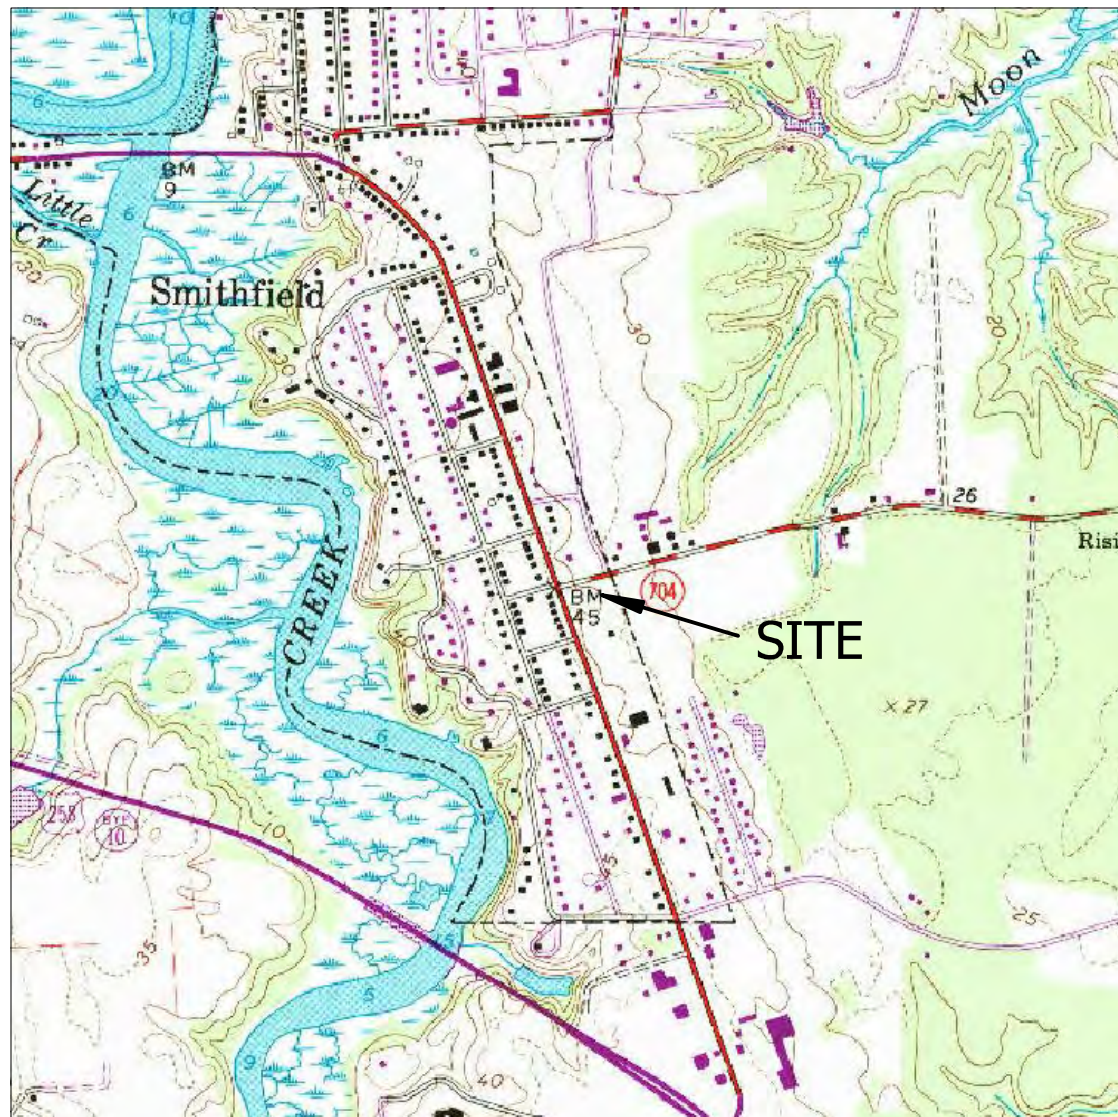

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of an unaddressed parcel at the southeast corner of the intersection of South Church Street and Battery Park Road, Smithfield, Virginia, the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report.

This assessment has revealed no Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, Historical Recognized Environmental Conditions, or Significant Data Gaps in connection with the Subject Property.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Isle of Wight County, Virginia

Survey Area Data: Version 19, Sep 5, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 18, 2022—May 31, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

EXECUTIVE SUMMARY

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

SPILLS: The Department of Environmental Quality's POLLUTION RESPONSE PROGRAM, known as PREP, provides for responses to air, water, and waste pollution incidents in order to protect human health and the environment. PREP staff often work to assist local emergency responders, other state agencies, federal agencies, and responsible parties, as may be needed, to manage pollution incidents. Oil spills, fish kills, and hazardous materials spills are examples of incidents that may involve the DEQ's PREP Program.

A review of the SPILLS list, as provided by EDR, has revealed that there is 1 SPILLS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

DETAIL MAP - 7543162.8S

-  Target Property
-  Sites at elevations higher than or equal to the target property
-  Sites at elevations lower than the target property
-  Manufactured Gas Plants
-  Sensitive Receptors
-  National Priority List Sites
-  Dept. Defense Sites

-  Indian Reservations BIA
-  Special Flood Hazard Area (1%)
-  0.2% Annual Chance Flood Hazard
-  National Wetland Inventory

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D007
Waste Description: Chromium

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: N/A
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 01/02/2024
Number of Days to Update: 16	Next Scheduled EDR Contact: 04/08/2024
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: N/A
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 01/02/2024
Number of Days to Update: 16	Next Scheduled EDR Contact: 04/08/2024
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: 800-438-2474

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: 800-438-2474

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Site Specific Assessments

To qualify for Brownfields Assessment, the site must meet the Federal definition of a Brownfields and should have contaminant issues that need to be addressed and a redevelopment plan supported by the local government and community. Virginia's Department of Environmental Quality performs brownfields assessments under a cooperative agreement with the U.S. Environmental Protection Agency at no cost to communities, property owners or, prospective purchasers. The assessment is an evaluation of environmental impacts caused by previous site uses similar to a Phase II Environmental Assessment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SPILLS: Prep/Spills Database Listing

The Department of Environmental Quality's POLLUTION RESPONSE PROGRAM, known as PREP, provides for responses to air, water, and waste pollution incidents in order to protect human health and the environment. PREP staff often work to assist local emergency responders, other state agencies, federal agencies, and responsible parties, as may be needed, to manage pollution incidents. Oil spills, fish kills, and hazardous materials spills are examples of incidents that may involve the DEQ's PREP Program.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 804-692-1900

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Bay Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Appendix D: Interview Documentation

USER QUESTIONNAIRE

Property Location/Address:

1301 South Church St., Smithfield, VA

To qualify for one of the Landowner Liability Protections (LLPs)¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 the user should provide the following information to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Please provide supporting details for any answers that are "yes."

- (1.) Environmental liens that are filed or recorded against the subject property (40 CFR 312.25).
Did a search of recorded land title records identify any environmental liens against the subject property that are filed or recorded under federal, tribal, state or local law?
- | | | |
|--------------------------|-------------------------------------|--------------------------|
| Yes | No | N/A |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
- (2.) Activity and land use limitations that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26).
Did a search of recorded land title records identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law?
- | | | |
|--------------------------|-------------------------------------|--------------------------|
| Yes | No | N/A |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
- (3.) Specialized knowledge or experience of the person seeking to qualify for LLP (40 CFR 312.28).
Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
- | | |
|--------------------------|-------------------------------------|
| Yes | No |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> |
- (4.) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this subject property reasonably reflect the fair market value of the subject property?
- | | |
|-------------------------------------|--------------------------|
| Yes | No |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> |
- If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?
- | | | |
|--------------------------|--------------------------|-------------------------------------|
| Yes | No | N/A |
| <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

- (5.) Commonly known or reasonably known or reasonably ascertainable information about the subject property (40 CFR 312.30).
 Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
- | | Yes | No |
|---|--------------------------|-------------------------------------|
| | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Past uses appear from aerials appear to be vacant/ farmed/ wooded | | |
| (a.) Do you know the past uses of the subject property? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| (b.) Do you know of specific chemicals that are present or once were present at the subject property? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| (c.) Do you know of spills or other chemical releases that have taken place at the subject property? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| (d.) Do you know of any environmental cleanups that have taken place at the subject property? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
- (6.) The degree of obviousness of the presence of likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
 Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of releases at the subject property?
- | | Yes | No |
|--|--------------------------|-------------------------------------|
| | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Subject: Phase I ESA - Battery Park Rd & S Church St - Owner Questionnaire

Hi Mr. Mamoudis,

Brian Mullins at Quality Homes has contracted Bay Environmental to complete a Phase I ESA on Tax Parcel Number 21A-01-511 (the ~18 acre parcel near the corner of Battery Park Rd and S Church St in Smithfield). As part of the Phase I ESA I am forwarding you an Owner Questionnaire. Please complete and return the attached form.

Thank you!

Good afternoon Ms. Howard,

Thank you for contacting the Town of Smithfield, Virginia with your FOIA request. I have researched TPIN 21A-01-511 and have found no records of any "underground storage tanks, aboveground storage tanks, and/or hazmat or petroleum incidents.

Thanks again, and feel free to contact me if there are any questions or concerns.

Joe

PART I: PURPOSE OF NOTIFICATION

✓ Check all that apply:

☒ New (not previously registered) facility

☐ Temporary closure

☐ Change in tank location

☐ New tank(s) at previously registered facility

☐ Tank removal or closure

☐ New owner

☐ Change in tanks (e.g., upgrade)

☐ Piping removal or closure

☐ Change in owner address

☐ Change in piping (e.g., upgrade)

☐ Other (specify):

PART II: OWNERSHIP OF TANKS

A. Owner Name

TWO FARMS INC.

B. Owner Address

3611 Roland Ave.

C. City, State, Zip

BALTIMORE, MD. 21200

D. Name of Contact Person

ROB RINEHART

E. Title of Contact Person

DIRECTOR - GASOLINE TRADING

F. Phone Number

(410) 889-0200

Fax Number

PART VI: FINANCIAL RESPONSIBILITY

The tank owner has met the financial responsibility requirements contained in 9 VAC 25-590-10 et seq. using the following methods/mechanisms

☐ Self Insurance

☒ Insurance

☐ Letter of Credit

☐ Virginia Petroleum Storage Tank Fund

☐ Guarantee

☐ Surety Bond

☐ Trust Fund

PART VII: OWNER CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I understand that the owner of the underground storage tanks hereby registered is responsible for compliance with the requirements of Virginia Regulations 9 VAC 25-580-10 et seq. and federal regulation 40 CFR Part 280, among other requirements. I warrant and represent that I am the owner or that I have the authority to sign this certification on behalf of the owner. I understand that this notification form is sufficient evidence to establish ownership of tanks subject to 9 VAC 25-580-10 et seq.

ROB RINEHART Director - Gasoline Trading

RE: Underground Storage Tank (UST) Compliance:

5040328 Royal Farms 130 1201 S. Church Street Smithfield VA. 23430

Dear Mr. Pellegrini,

The Department of Environmental Quality (DEQ) has an inspection program that promotes the regulation entitled "Underground Storage Tanks; Technical Standards and Corrective Action Requirements (9 VAC 25-580-10, et seq.). Items that are pertinent to the inspection program include UST notification, Performance standards and operating requirements.

On Tuesday, September 8th, 2020, I will be conducting a formal inspection of the USTs at the above-mentioned facilities. **I** will meet you or your representative at **9:00 A.M at Royal Farms 130, 1201 S. Church Street, Smithfield VA 23430**

Please have someone available who is able to demonstrate knowledge of the UST and operation of release detection methods. Inspectors will need access into fill ports and into any covered tank related equipment. During DEQ inspections, someone should be available to lift all covers.

The following items will be included during the inspection:

- **Verification of general facility information** (UST owner and address information).
- **Verification of UST systems** (installation date, upgrades, tank capacity, and substance stored).
- **Verification of spill containment device, overfill protection, and corrosion protection** for tank and piping system(s)

- **Review of corrosion protection records** for inspection and/or assessment records for tank and piping system(s), and any records of recent tests, maintenance, repair, and calibration of the corrosion protection equipment.
- **Review of leak detection records** for tank and piping system(s) for the past year, and any records of recent maintenance, repair, and calibration of on-site leak detection equipment.
- **Demonstration of Financial Responsibility** by providing the inspector with the current demonstration mechanism, certification of financial responsibility, and certification of annual gallonage. Please see the Financial Responsibility details package enclosed.

I have also enclosed an **individualized checklist for your facilities** to serve as a guideline in evaluating your UST system(s), and prepare you for the upcoming inspections.

If you have any questions regarding the upcoming inspections, please do not hesitate to contact me at (757) 518-2030, or by email at howard.miller@deq.virginia.gov

Thank you for your cooperation.

Sincerely,

Howard Miller
Petroleum Facility Inspector

Enclosures

Compliance Checklist for 2020 UST Inspections.

This is an unofficial checklist based on records that are on file with the DEQ. This checklist is not necessarily complete or correct and is only to serve as a guide in preparing for inspections that may occur at any time.

1. Financial Responsibility Documentation

This site will need to contact Josiah Bennett, Office of Financial Responsibility Programs & Data Management, at (804) 698-4205 or email him at Josiah.Bennett@deq.virginia.gov to update the financial responsibility documentation.

2. Verification of spill prevention equipment

3. Spill containment buckets should be kept clean and dry

4. Verification of overfill prevention equipment (This can sometimes be seen during the inspection)

Shutoff Valve, Ball Float, & Alarm

5. Corrosion Protection

Our records indicate that the USTs are Act-100's or fiberglass. The piping is fiberglass, or polyflex. Piping is booted so a CP test is not required.

Piping in the sumps need to be verified that the pipes are isolated from contact with the earthen material.

Release Detection (tanks)

Our records indicate that you are using an ATG your tank release detection. You will need to have records of monitoring for the last 12 months available, during the inspection.

6. Release Detection (piping)

Release Detection For Pressurized & Gravity Fed Piping:

Pumps are safe suction and do not require annual line leak detector function test - OR - at least monthly 3.0 gph piping test from Automatic Tank Gauge.

Annual **line** tightness test - **OR** - Monthly 0.2 gph piping test from Automatic Tank Gauge - **OR** - Annual 0.1 gph piping test from Automatic Tank Gauge - **OR** - Other form of monthly monitoring.

7. Operator Training

All UST system operators are required to have approved training regarding the UST regulations by **August 8, 2012**. The UST owner should document their Class A, B and C operators and ensure all operators obtain certificate to document successful training completion.

You will need to have the following records available, during the inspection:

Copy of the written emergency instructions and procedures posted in the store

Copy of the Class A Operator Training Certificate

Copy of the Class B Operator Training Certificate

Copy of the Class C Operator Training Certificate

Copy of the List of designated Class A, Class B, and Class C operators for the UST facility

During DEQ inspections, someone should be available to lift all covers and open all dispenser skirts (keys are usually required to get under the dispensers). Access to Groundwater Monitoring wells may require a socket wrench. All records from the past year should be made available.

SUMMARY OF QUALIFICATIONS

Mr. Ewing has over 35 years of environmental experience including extensive basic and applied research in the areas of marine pollution and dynamics of marine biological communities, as well as more than two decades of environmental program management in private industry. His experiences include, but are not limited to, the following areas:

- Scientific Investigator or Project Manager of long-term environmental studies
- Environmental regulatory compliance assessments
- Air (Title V) Permitting
- Hazardous Waste management
- Toxic Substances Control Act (TSCA) compliance auditing
- Stormwater permitting and Pollution Prevention Plans
- SPCC and Facility Response Plans
- Environmental Management System (EMS) development
- ISO 9001 (Quality) and ISO 14001 (Environmental) Auditing
- Due diligence assistance in corporate mergers and acquisitions, including completion and reviews of Phase I-II Site Assessments

SUMMARY OF PROFESSIONAL EXPERIENCE

Bay Environmental, Inc., Project Manager, 2016 to present

Responsible for conducting Phase I Environmental Site Assessments or assisting other staff with Phase I investigations. Perform other duties as assigned.

Environmental Programs Manager, BAE Systems Ship Repair, 1999 to 2016

Responsible for all aspects of the environmental compliance program at Norfolk Ship Repair and for providing management oversight for the environmental programs at other BAE Systems' ship repair facilities in the Eastern U.S. Principal duties included ensuring compliance with all regulatory permits and corporate environmental policies, developing and assessing effectiveness of operating procedures, preparation or review of permit applications, monitoring employee performance and performing regulatory compliance inspections and EMS audits at BAE shipyards and numerous other BAE Systems' facilities throughout the country.

Environmental Consultant, Self-employed, 1994 to 1999.

Old Dominion University Applied Marine Research Lab, Associate Director and Research Faculty, 1984 to 1994

Responsible for management of seven laboratory, administrative and research groups. Principal duties including personnel management, preparation of annual budgets for laboratory operations and budgets for submitting with research proposals, assisting the Director with technical aspects of program operations and research projects, serving as Principal Investigator, Co-PI, or Project Manager of funded academic research projects, and other duties as assigned by the Director.

Ms. Howard has been working as an environmental consultant for over 17 years. She has gained a wide range of experience through her involvement in numerous projects including:

- Environmental due diligence investigations.
- Asbestos inspections.
- Stormwater permitting, SWPPP Preparation, and compliance inspections.
- Virginia Petroleum Storage Tank Trust Fund projects.
- Site Characterization Reports and Risk Assessments.
- Corrective Action Plans.
- Spill Prevention Control and Countermeasures Plans.
- RCRA Closure and Corrective Action.

SUMMARY OF EXPERIENCE

Bay Environmental, Inc., Environmental Scientist, 2004 to present
Conduct and manage Phase I and II Environmental Site Assessments for state, municipal, and private clients; write industrial Stormwater Pollution Prevention Plans; conduct industrial and construction stormwater inspections; complete stormwater permitting; conduct underground and aboveground storage tank investigations for VPSTF projects; perform monthly and quarterly groundwater monitoring, sampling, and reporting; install monitoring wells; collect soil and groundwater samples; write Corrective Action Plans; prepare Site Characterization Reports, Quarterly Monitoring Reports, and Risk Assessments; complete RCRA Closure investigations; and perform Limited Asbestos Inspections. Manage projects to ensure completion in a thorough, cost effective, and timely manner.

LandMark Design Group, Environmental Scientist, 2001 to 2004
Performed Phase I and II Environmental Site Assessments on commercial, industrial, municipal, and residential properties; designed soil, groundwater, and surface water sampling plans and collected samples; witnessed underground and aboveground storage tank removals and provided closure notification to the Virginia Department of Environmental Quality; performed Quarterly Groundwater Monitoring and Reporting and Comprehensive Site Assessments and Corrective Action Plans for the North Carolina Department of Environment and Natural Resources; inventoried underground and aboveground storage tanks and assisted with an Environmental Audit for a local municipality; conducted Limited Asbestos Surveys; and interacted with clients, coworkers, and regulatory agencies to ensure projects were completed in a thorough and timely manner.

PROPOSED PROFFERS BY OWNER IN CONNECTION WITH THE PROPOSED REZONING FOR
THE DEVELOPMENT KNOWN AS THE COTTAGES AT BATTERY, LLC
DATED April 29, 2025

The undersigned applicant, Cottages at Battery, LLC, a Virginia limited liability company, (hereinafter called "Owner / Developer"), is the owner of the Parcels subject to this application and states that the following conditions are voluntarily proffered for the reclassification of property identified as The Cottages at Battery. The Owner hereby voluntarily proffers that the development of the property proposed for reclassification under this application shall be in accordance with the conditions set forth below. The Owner grants consent to the following proffers as evidenced by its signature hereto. Where exhibits are referenced in this proffer they are on file with the Town of Smithfield.

1. The Cottages at Battery shall be constructed in general conformance to the conceptual plan entitled "The Cottages at Battery, Smithfield Virginia, dated June 17, 2024, Revised March 24, 2025, prepared by AES which is occasionally referred to hereafter as the "Conceptual Plan". Substantial deviation, as determined by the Zoning Administrator of the Town of Smithfield, from general design and layout as submitted in the Conceptual Plan shall require resubmission and approval by the Planning Commission in accordance with all applicable provisions as established by Town of Smithfield Zoning Ordinance.
2. The development shall include, at a minimum, the following:
 - A. A condominium owners association established in accordance with Virginia law which shall be responsible for the maintenance and upkeep of the following features of the development:
 - (i) All open space, common areas, and other amenities noted in this Proffer Agreement;
 - (ii) All stormwater management infrastructure, shall be managed in accordance with best management practices and previously established and recorded Easements and Reciprocal Agreements;
 - (iii) Landscaped buffer areas, as shown in the Conceptual Plan (whether or not the buffer area is located on individual units or on property under the ownership of the Owner and/or the property owners association), are to be maintained and protected via a recorded restriction as "landscaped buffer areas".
 - (iv) The condominium owners association shall maintain a review board, tasked with reviewing applications for all exterior improvements in the development. The review board shall authorize all improvements before the Town of Smithfield issues any permit, waiver, or other authorization. The review board is also tasked with enforcing the minimum architectural standards of the development.
 - (v) The development shall be served by a private pump station, private roads, private sewer installed by the developer and maintained by the condominium owners association subject to an Easement in favor of

the Town of Smithfield granted for the purpose of ensuring the proper maintenance by the Condominium Association of all structures and the right of enforcement against the Condominium Association of all maintenance requirements.

- (vi) The development shall be served by a public water line constructed according to Town of Smithfield standards and requirements and subject to an Easement in favor of the Town of Smithfield granted for the purpose of maintaining the same in perpetuity.

- B. Each unit will have a detached garage. No shed or other outbuildings will be allowed.
- C. Foundation plantings will be provided by the Developer for each unit.
- D. Developer shall provide a Clubhouse and Pool, bike racks, a dog park, frisbee golf and a connection to Colonial Avenue through the site to Battery Park for walking and golf carts, all of which shall be available to purchasers not later than the date on which the 90th zoning permit is issued.
- E. Left and right turn lanes shall be installed for the purpose of exiting the site at the Battery Park right-of-way.
- F. The Condominium Association shall maintain all common area to include the clubhouse, pool, landscaping and turf on the Property, contract and pay for all maintenance for exterior building components to include: Roof, Windows, Doors, handrails, cornice and power washing of all units and common area buildings and pay all required fees and costs associated with the maintenance of the stormwater management facilities.
- G. All homes and Common Area Buildings shall be constructed at a minimum in accordance with the following materials and / or standards:
 - (i) Brick- various traditional brick colors and modules and bonding variations encouraged
 - (ii) Stone-natural stone and stone veneer. Cast stone only for sills, headers, and accents
 - (iii) Siding- Cement or fiberboard siding or high-quality vinyl or its equivalent where brick or stone is not used. No aluminum. Variance in texture and color is encouraged.
 - (iv) Units next to or across the street cannot be the same primary color
 - (v) Accent materials shall be varied to create differentiation between units
 - (vi) Minimum 12" foundation exposure. Foundation to be parged or have veneer-no bare cinder block or exposed concrete turn-down slabs.
 - (vii) Front face of units to be varied 2' for every other home to enhance the streetscape. Exceptions may be granted in the event a particular lot will not allow for the construction of a unit.

- H. Commercial vehicles over 1 ton with commercial writing, tractors, mobile homes, RVs, trailers, campers, camper trailers, boats and other watercraft shall only be parked in enclosed garages. RVs, boats, and other watercraft may be parked in the driveway for 48 hours for loading and unloading.
- I. Subject to its ability to obtain building permits and meet zoning guidelines, Owner shall ensure that all units / homes are constructed in general conformance to the elevations attached hereto as Exhibit A. Substantial deviation, as determined by the Zoning Administrator of the Town of Smithfield, from general design and layout as submitted in the Conceptual Plan shall require resubmission and approval by the Planning Commission in accordance with all applicable provisions as established by Town of Smithfield Zoning Ordinance.

Project Description	<p>The applicant is seeking approval for a special use permit under Article 3.K.C.16 to allow outdoor storage. The applicant will store not more than 6 vehicles at a time, for no longer than 2 weeks. All cars will be concealed behind the fence.</p> <p>This application was favorably recommended to Town Council with the condition that cars can be stored up to 30 days.</p>
Zoning Recommendation	<p>Positives: This SUP will bring this parcel into compliance as outdoor storage has been occurring for numerous years.</p> <p>Negatives: It is not a by-right use and requires an SUP.</p>

Please direct inquiries to Tammie Clary at 1-(757)-365-4200 or tclary@smithfieldva.gov.

CHT Towing, located at 219 Battery Park Road, will follow the adopted Comprehensive Plan and with the intent and purpose of the I-1 zoning district. The character of adjacent properties, the surrounding neighborhoods and with existing and proposed development shall be aligned with the use of CHT Towing.

The proposed use will utilize the existing public services such as streets, drainage facilities, fire protection and public water and sewer facilities. The proposed use will not result in the destruction, loss or damage of any feature determined to be of significant ecological, scenic or historic importance. The proposed use will be designated, sited and landscaped so that the use will not hinder or discourage the appropriate development or use of adjacent properties and surrounding neighborhoods.

CHT Towing will only store 6 cars at a time, for not longer than 2 weeks. All cars will be concealed behind the fence.

Written Statement of Project Compatibility

Special Use Permit Application for DymonCare LLC

Property Address: 208 Middle Street, Smithfield, VA (TPIN: 21A-06-D004)

Zoning District: Downtown Neighborhood Residential (DN-R)

Proposed Use: Child Day Care as a Home Occupation (8 Children)

DymonCare LLC is an established childcare provider dedicated to meeting the growing demand for reliable and enriching childcare services in Smithfield. With an increasing need for quality childcare options, we propose the relocation and expansion of our operations to 208 Middle Street, Smithfield, Virginia. This new location will allow DymonCare to provide flexible childcare services, including full-time, part-time, and drop-in care for children aged 2 months to 5 years. Operating Monday through Friday from 7 AM to 5 PM, DymonCare will continue to offer a nurturing and developmentally appropriate environment that supports both children and working families in the community.

Childcare demand in Smithfield significantly exceeds the available supply, particularly for children aged 0-5 years. Isle of Wight County's population has grown to 40,711 as of July 1, 2023, reflecting a 5.4% increase since April 2020. Approximately 5.3% of the population, or about 2,158 children, are under the age of five and in need of childcare services. However, there are only about 10 childcare centers in the area with a combined maximum capacity of 782 children. This leaves approximately 1,376 children without access to formal childcare services, highlighting a significant market demand. By offering a private and intimate setting, DymonCare ensures individualized care, which is especially critical during early developmental years when strong caregiver-child relationships are essential for social and emotional growth.

The Downtown Neighborhood-Residential zoning district is designed to preserve the character of established residential neighborhoods while permitting limited, low-impact home occupations. Article 3.D.C.28 of the zoning ordinance specifically allows Child Day Care as a Home Occupation for 8 children through a Special Use Permit. The proposed use of 208 Middle Street is fully compliant with zoning regulations and aligns with the district's objectives of preserving neighborhood integrity while supporting small-scale community services.

The operation of DymonCare LLC will be carefully managed to minimize any impact on neighboring properties. To reduce noise and traffic disturbances, the daycare will operate only during standard business hours, avoiding disruptions in the evenings and on weekends. Outdoor playtime will be supervised and scheduled within designated hours to maintain a peaceful environment. Additionally, staggered employee shifts and parent drop-off/pick-up times will help prevent congestion. The property includes a gravel driveway that can accommodate multiple vehicles at a time, ensuring smooth and efficient arrivals and departures while alleviating short-term street parking concerns.

The daycare will utilize existing public utilities, including water, sewer, and waste management services, without requiring any additional infrastructure modification, upgrades, or enhancements. Emergency services, including police and fire departments, are within close proximity, ensuring safety and compliance with local regulations. By relocating DymonCare LLC to 208 Middle Street, we will be better positioned to meet the growing need for childcare services in Smithfield and surrounding areas.

DymonCare LLC meets all the requirements for a Special Use Permit within the Downtown Neighborhood-Residential zoning district. The daycare will operate in a manner that preserves the residential character of the neighborhood, supports working families, and aligns with Smithfield's Comprehensive Plan. The proposed use is low-impact, community-driven, and beneficial to local residents, making it a suitable and compatible addition to the area. Our dedication to quality care, maintaining low child-to-staff ratios, and fostering age-appropriate learning environments will ensure that DymonCare remains a trusted child care provider in the Isle of Wight area.

Thank you ,
Dymon Humphrey
Owner, DymonCare LLC

Statement in Support of DymonCare LLC

Planning Commissioners,

I am writing to express my strong support for **DymonCare LLC** in their endeavor to establish a daycare facility within our community. Having known Dymon Humphrey and the Humphrey family for over 15 years and witnessing her passion for early childhood development, I firmly believe that this initiative will provide invaluable benefits to families in our town.

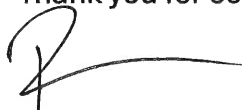

Dymon has demonstrated exceptional dedication to nurturing children and enriching their learning experiences. Her extensive background in earlier education and childcare uniquely qualifies her to create a safe, supportive, and stimulating environment for our youngest citizens.

The proposed daycare will not only create a place for children to learn and grow, but it will also serve as a resource for working parents, allowing them to balance their professional and personal responsibilities with greater ease. By providing quality childcare, **DymonCare LLC** will contribute to the overall well-being of families and the community at large.

Furthermore, the establishment of this daycare will generate local employment opportunities and foster community engagement through various programs and activities designed for families and children.

I kindly urge the town planning commission to consider the positive impact of this project on our community and grant **DymonCare LLC a SUP to operate a much-needed child day care business at 208 Middle Street, Smithfield, VA**. Their commitment to creating a safe and nurturing environment for children aligns perfectly with our community's values and needs.

Thank you for considering this request.

Sincerely,

Ray & Gloria Gibbs

To the Town of Smithfield Planning Commission Special Use
Permit

AL Property Management LLC

P O Box 103

Carrollton Va 23314

April 4, 2025

Attention: Lesley G. king, Clerk

I received a certified letter about the permit application {TPIN 21A-06-D004} at 208 middle st. Smithfield Va. I own multiple propertys in this neighborhood and it would cause great concern because of the very small yard that this property has, which could cause the children to wonder on other peoples property. Also we are concerned about the noise that could disturb the neighbors if they are outside playing, the house is very close to other houses. Middle st. has a very high traffic volume as well. I feel that eight children in a day care with small children at this address would be too many also because of the house size. I am not in agreement to this zoning approval.

Best Regards,

AL Property Management LLC.

To the Town of Smithfield Planning

*My name is Barbra Clarke and i live at 204 middle st.
beside 208 middle st. I am disabled and unable to attend the
town meeting but i want to voice my oppinion. I do not agree to
having 8 children in a day care beside my home, having fear
that the children may be coming into my yard. The house at
208 middle st. has a very, very small front , side and back yard.*

*I would hope that the noise from the children would be under
control also. I feel 8 children are too many for this area,
having a day Care,*

Thank You

Barbra Clarke

02/12/2025

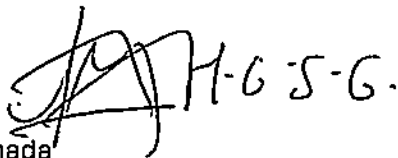

Dear Planning Commission Members,

I am the owner of the property located at 208 Middle Street, Smithfield, VA (TPIN: 21A-06-D004), and I am writing to formally confirm my approval for Ms. Dymon Humphrey to operate DymonCare LLC at this location. I have leased this property to Ms. Humphrey with the understanding that it will be used for the purpose of a family day home. I have confidence in her ability to operate a responsible and beneficial business within the community.

I have no objections to this use and trust that all necessary permits and regulatory requirements will be met. Should you require any further information or documentation, please do not hesitate to contact me at your convenience.

Sincerely,

Helen Gamada

NOTICE OF PUBLIC HEARING
TOWN COUNCIL OF THE TOWN OF SMITHFIELD
SPECIAL USE PERMIT

Notice is hereby given that the Town Council of the Town of Smithfield, Virginia will hold a public hearing at the regular meeting of the Town Council in the council chambers in The Smithfield Center, 220 N. Church Street, meeting room A, Smithfield, Virginia, on Tuesday, May 6th, 2025 at 6:30 p.m. to consider the application of Willkris Services LLC C/O William Campbell, applicant and Alvin & Paula Rodgers, owners for a special use permit under the provisions of Article 2.Q. of the Zoning Ordinance of the Town of Smithfield, Virginia, adopted September 1, 1998, and as amended thereafter, in order to approve an accessory apartment.

The property which is the subject of this special use permit application is 105 Locherbie (Tax Map Parcel no. 21E-01-102), which is located on the west side of Locherbie containing 0.78 +/- acres, and is zoned Suburban Residential (SR).

Any person affected by or interested in the aforesaid application may appear at the hearing and be heard. Copies of the Zoning Ordinance of the Town of Smithfield and application for this special use permit are available for inspection at the Department of Community Development & Planning, 310 Institute Street, Smithfield, Virginia 23430.

TOWN OF SMITHFIELD, VIRGINIA

BY: Lesley G. King, Clerk

Publish: Wednesday, April 16th, 2025, and Wednesday, April 23rd, 2025.

TOWN COUNCIL STAFF REPORT: SPECIAL USE PERMIT (SUP)
PUBLIC HEARING

TUESDAY, MAY 6th, 2025, 6:30 PM

Applicant	Willkris Services, LLC 105 Locherbie Smithfield, VA 23430
Owner	Alvin & Paula Rodgers 105 Locherbie Smithfield, VA 23430
Property	105 Locherbie TPIN 21E-01-102 0.78 ac W side Locherbie 365' from the intersection of Locherbie and Cypress Creek Parkway.
Zoning	Suburban Residential (SR)
Adjacent Zoning	SR
Project Description	<p>The applicant is seeking approval for an accessory apartment in accordance with Smithfield Zoning Ordinance Article 2.Q. The apartment resident is related to the owners of the primary structure by blood, adoption, or marriage and the primary structure will continue to be occupied. The applicant is proposing a 655 square foot accessory apartment located over a free-standing 816 square foot garage in compliance with Article 2.Q.8.a. The structure will be approximately eighteen (18') feet in height.</p> <p>This application was favorably recommended to Town Council at the April Planning Commission meeting.</p>
Zoning Recommendation	<p>Positives: This application will allow the applicant to have an accessory apartment in conformance with the SZO.</p> <p>Negatives: This is not a by-right use and does require a SUP.</p>

Please direct inquiries to Tammie Clary at 1-(757)-365-4200 or tclary@smithfieldva.gov.

Smithfield, VA 23430

Salutation

I am composing this letter to address the Special Use Permit Application for 105 Locherbie, Smithfield, VA 23430. TPIN:21E-01-102

The following statements will address the areas concerning the proposed project compatibility:

1. The comprehensive plan.
2. The application zoning district. (Suburban Residential)
3. The surrounding properties.
4. Current and future neighborhood conditions.
5. Pedestrian and vehicular traffic patterns, on-site and off-site.
6. Adequate public facilities.

The living space under the scope of work for 105 Locherbie will be added inside of an existing detached garage. The added living space will be for a family member and a family member only. This member is unable to obtain their driver's license for medical conditions. There will not be any additional vehicular traffic as a result of this project. With its scope of work taking place inside an existing structure that currently has utilities, there will not be any negative effect on utilities. The existing detached garage project has been approved by Cypress Creek Homeowner's association, The Town of Smithfield and Isle of Wight County. The exterior of this structure will not change in

appearance by adding this living space inside. The living space will not be rented in any way.

Thank you for your consideration in this Special Use Permit Request.

Sincerely,

William Campbell

William Campbell, Representative 105 Locherbie

I, Alvin R Rodgers & Paula T Rodgers, of Smithfield, VA, in Isle of Wight County, Virginia, being duly sworn state under oath that:

1. The occupant of the accessory apartment will be the brother of Paula Rodgers. He is 73 years old and does not drive. We certify the following to be true now and in the future:
- The occupants of the accessory apartment shall be related to the owner of the principal dwelling by blood, adoption or marriage.
 - There shall be no other apartment facilities or room rentals in the dwelling or its accessory buildings.
 - The principal dwelling shall be occupied during the maintenance of the accessory apartment by the fee simple owner and members of the owner's family related by blood, adoption or marriage.
 - The permitted accessory apartment shall be exclusively occupied by not more than two persons, at least one of whom is related to the owner by blood, adoption or marriage and who must be either 62 years of age or older or must be physically or mentally handicapped, and the other occupant whom, if not of the requisite age, handicapped condition or familial relationship, must be a live-in attendant of the qualifying handicapped person.

NOTICE OF PUBLIC HEARING
TOWN COUNCIL OF THE TOWN OF SMITHFIELD
SPECIAL USE PERMIT

Notice is hereby given that the Town Council of the Town of Smithfield, Virginia will hold a public hearing at the regular meeting of the Town Council in the council chambers in The Smithfield Center, 220 N. Church Street, meeting room A, Smithfield, Virginia, on Tuesday, May 6th, 2025 at 6:30 p.m. to consider the application of 328 Main St LLC C/O Jim Collins, owner and applicant, for a special use permit under the provisions of Article 2.Z. Section 1 of the Zoning Ordinance of the Town of Smithfield, Virginia, adopted September 1, 1998, and as amended thereafter, in order to approve a short-term rental as a principal use.

The property which is the subject of this special use permit application is 328 Main Street (Tax Map Parcel no. 21A-01-157), which is located on the north side of Main Street, containing 0.12 +/- acres, and is zoned Downtown (D) & Historic Preservation Overlay (HPO).

Any person affected by or interested in the aforesaid application may appear at the hearing and be heard. Copies of the Zoning Ordinance of the Town of Smithfield and application for this special use permit are available for inspection at the Department of Community Development & Planning, 310 Institute Street, Smithfield, Virginia 23430.

TOWN COUNCIL STAFF REPORT: SPECIAL USE PERMIT (SUP)
PUBLIC HEARING

TUESDAY, MAY 6th, 2025, 6:30 PM

Applicant	328 Main Street LLC C/O Jim Collins 1109 Cypress Creek Parkway Smithfield, VA 23430
Owner	328 Main Street LLC 328 Main Street Smithfield, VA 23430
Property	328 Main Street TPIN 21A-01-157 0.12 ac N side Main Street Across from Cockes Lane & Main Street
Zoning	Downtown (D) & Historical Preservation Overlay (HPO)
Adjacent Zoning	Downtown Neighborhood Residential (DNR), D & HPO
Project Description	<p>The applicant is seeking approval to rent 328 Main Street, which is an existing single-family residential dwelling, as a short-term and long-term rental property. According to the Smithfield Zoning Ordinance (SZO) Article 2.Z.1, short-term rentals as principal uses are permissible by Special Use Permit (SUP) only. No changes to the property are proposed in order to accommodate the short-term rental.</p> <p>This application was favorably recommended to Town Council at the April Planning Commission meeting.</p>
Zoning Recommendation	<p>Positives: This application provides additional accommodations in the Heart of the Historic District.</p> <p>Negatives: This is not a by-right use and does require a SUP.</p> <p>A recommendation should be conditioned on the applicant following the conditions outlined in Article 2.Z.1.a through Article 2.Z.1.i., except for Article 2.Z.1.b.. These conditions do require a signed and notarized short-term rental affidavit ensuring compliance.</p>

Please direct inquiries to Tammie Clary at 1-(757)-365-4200 or tclary@smithfieldva.gov.

Request for Special Use Permit (SUP)

Purpose:
To operate as a Short-
Term Rental
at
328 Main Street
Smithfield VA 23430

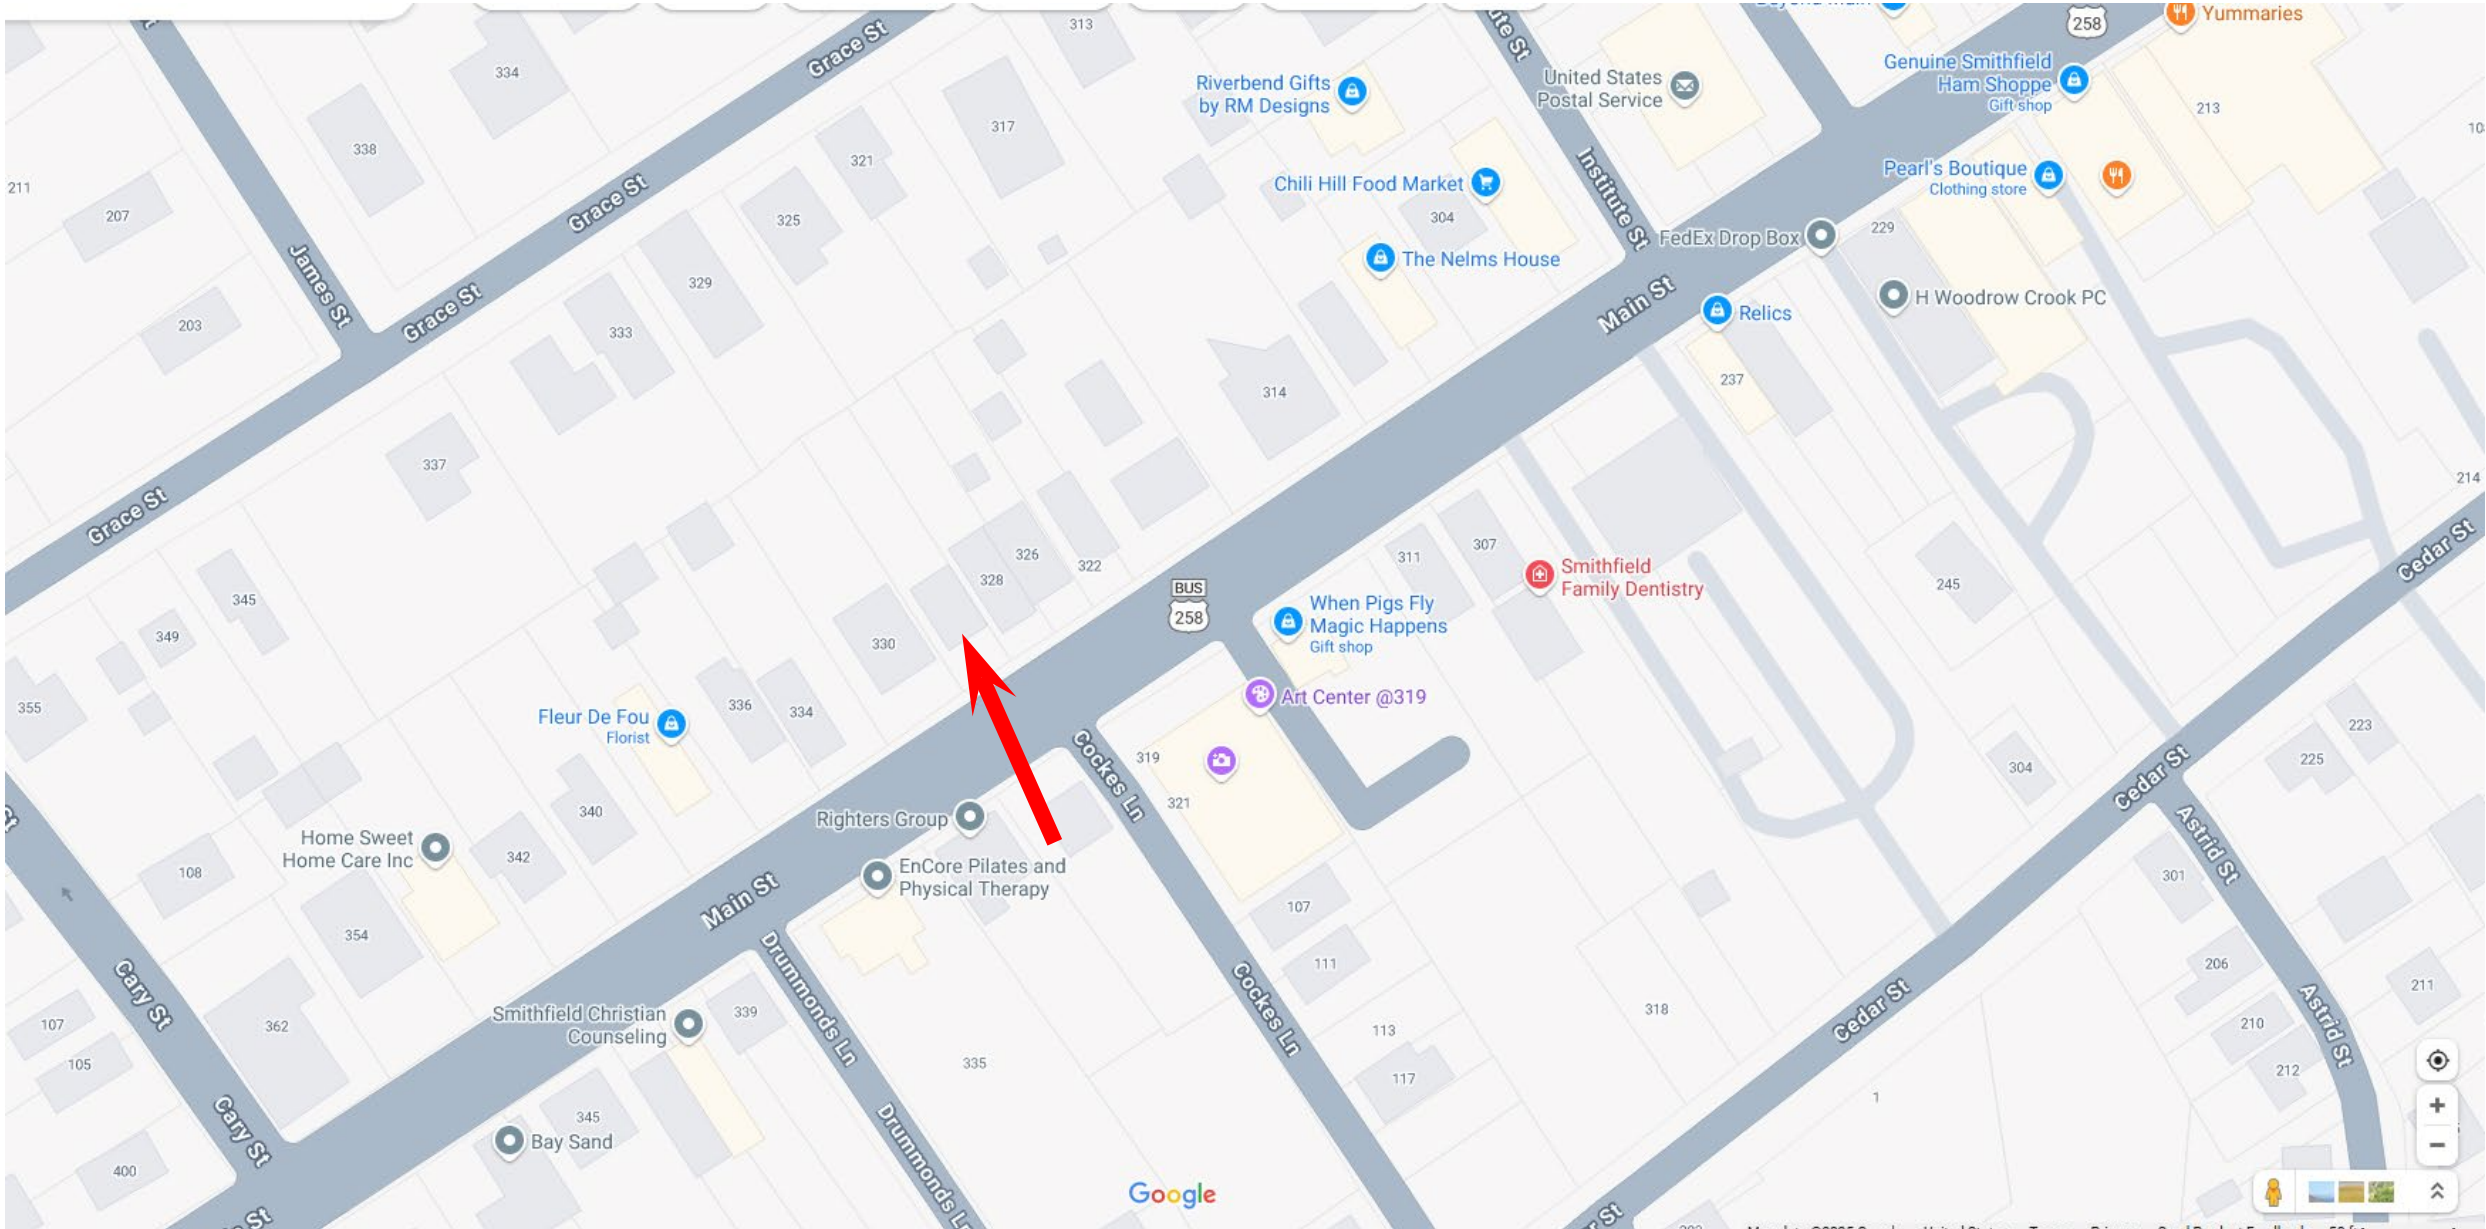

Site Plan

- No changes will be made to existing site plan with SUP. No plat available to include.

Questions

Please include a description of the proposed use and, where applicable, the hours of operation and the proposed number of employees/patrons.

- **The applicant is requesting a Special Use Permit (SUP) to operate the property located at 328 Main Street as a short-term rental as defined by any stay less than 30 days.**
- **The location would allow access to guest 24 hours per day.**
- **The location would not have any employees but could allow up to 10 guest.**
- Please include a written statement of proposed project compatibility with the following:
 - The Comprehensive Plan: **No impact.**
 - The applicable zoning district (DN-R): **No impact.**
 - The surrounding properties: **No impact.**
 - Current and future neighborhood conditions: **No impact.**
 - Pedestrian and vehicular traffic patterns, on-site and off-site: **Guest would use driveway and on street parking located within the vicinity of the property address.**
 - Adequate Public Facilities: **No impact.**

Google Maps incorrectly labels 326 as 328. 328 Main Street is actually not labeled.

Google Maps incorrectly labels 326 as 328. 328 Main Street is actually not labeled.

NOTICE OF PUBLIC HEARING
TOWN COUNCIL OF THE TOWN OF SMITHFIELD
APPEAL OF BHAR DECISION RESULTING IN CONDITIONAL APPROVAL

Notice is hereby given that the Town Council of the Town of Smithfield, Virginia, will at the regular meeting of the Town Council in The Smithfield Center, 220 N. Church Street, meeting room A, Smithfield, Virginia, on Tuesday, May 6th, 2025 at 6:30 p.m. to consider an appeal of a Board of Historic and Architectural Review decision regarding an application on behalf of Joseph and Faith Barnes which resulted in a conditional approval for the substitute use of PVC and composite material, pursuant to Article 3.M., Section E.16.A of the Zoning Ordinance of the Town of Smithfield, Virginia, adopted September 1, 1998, and as amended thereafter. The property which is the subject of this application is 110 Thomas Street (Tax Map Parcel 21A-01-079), contains 0.43 +/- acres, and is zoned Downtown Neighborhood Residential (DN-R) and Historic Preservation Overlay (HP-O).

Any person affected by or interested in the aforesaid application may appear at the hearing and be heard. Copies of the Zoning Ordinance of the Town of Smithfield and appeal application are available for inspection at the Department of Community Development & Planning, 310 Institute Street, Smithfield, Virginia 23430.

TOWN OF SMITHFIELD, VIRGINIA

By: Lesley G. King, Clerk

Publish: Wednesday, April 16th, 2025, and Wednesday, April 23rd, 2025.

PUBLIC HEARING
TOWN COUNCIL STAFF REPORT:
APPEAL OF A DECISION BY THE BOARD OF HISTORIC AND ARCHITECTURAL
REVIEW

The applicants are appealing the Board of Historic & Architectural Review's (BHAR) March 19th, 2025 decision, which resulted in a conditional approval for the proposed exterior changes to the single-family dwelling at 110 Thomas Street, a contributing property.

BHAR approved all requested exterior changes as presented except for two requests:

The applicants wanted to wrap the existing wooden rakes, fascia, and trim with white Mastic PVC-coated aluminum. The BHAR approved the replacement with solid PVC material.

The applicants wanted to cover the existing wooden soffits with new white Mastic Beaded vinyl soffits. The BHAR approved the use of Hardie-branded or an equivalent composite material for the soffits.

The use of vinyl products has generally been discouraged in the Historic District.

Pages 59-60 address the treatment for historic materials (wood) and state:

Avoid covering wood with stucco, masonry, and other materials.

[Avoid] Covering or obscuring historic wood surfaces and features.

Pages 66-67 address alternative and synthetic materials and state:

[Avoid] Covering historic materials with synthetic materials.

According to the appeals process, this application is forwarded to Town Council for their review and decision.

For inquiries, contact Tammie Clary at 1-(757)-365-4200 or tclary@smithfieldva.gov.

The Secretary of the Interior’s Standards for Rehabilitation

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
3. Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.
4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.
6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.
7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
8. Significant archaeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Guiding Principles for Preservation, Alteration, and Maintenance

- **Routine maintenance is essential:** Routine and timely maintenance of historic buildings and their constituent parts enables their longevity. Deferred maintenance can increase costs down the line and lead to irreversible damage to historic buildings and can help prevent major issues before they happen.
- **Preservation of materials rather than replacement:** In many cases historic building materials can be repaired rather than replaced. A good rule of thumb is that historic building features should be replaced only if more than 50% of the material has deteriorated beyond repair. In-kind replacement of building features should be taken when repair is not feasible, and replacement parts should match the historic in terms of material composition, finish, form, and function.
- **New features shall not detract from the historic character of the building, surrounding properties, or district as a whole:** When new features are to be added to historic buildings, or existing features are to be replaced, they should be sensitive to the historic character of the building, its neighbors, and the Smithfield Historic District as a whole. When a historic building material or architectural feature needs to be replaced, but a historic replacement is not available, the new material or feature should be comparable in composition to the historic original. The introduction of more elaborate materials or features can create a false sense of history and should be avoided.
- **The greatest scrutiny shall be given to visible building facades and features:** Many historic buildings feature their most character-defining elements on their street facing elevations. Care should be taken so that the most visible elements of a building are preserved when a building is being altered. See the diagram on page 22 for an overview of which building elevations are typically visible from the right-of-way.

Medium Size Historic Buildings*

Common Maintenance Areas

B) Treatment for Historic Materials

1) Wood

Wood is especially susceptible to environmental factors such as humidity, moisture, and sunlight. Termites, mold, and vegetation can also cause irrevocable damage to wooden materials.

Best Practices

- Regularly inspect exterior wooden surfaces for decay. Wood is especially vulnerable to moisture.
- Clean wood surfaces with mild household cleaners and water.
- Maintain paint on wood surfaces. Paint often protects wood from external forces.
- If paint needs to be removed, use the gentlest means possible. Sand blasting and water blasting should never be used. Avoid removing paint all the way down to the wood if possible.
- Avoid covering wood with stucco, masonry, and other materials.
- Provide ventilation and proper drainage to wood surfaces.
- Repair deteriorated features with wood filler, glues, or epoxy. Test these substances on a small, inconspicuous spot before proceeding with the entire surface or material.
- Avoid removing wood features when they can be repaired in place.
- It is generally appropriate to remove non-historic materials such as vinyl siding to reveal historic wood siding.
- When replacing wood features, use in-kind materials when possible.
- When in-kind materials and features can not be found, the replacement material should be of a similar composition to the historic material with a similar size, scale, profile, and external appearance.
- If wood siding or other wood elements need to be replaced, only replace the damaged portions of the siding or element.
- Replacement wood siding should match the historic material and profile of the wood siding as close as possible.
- Vinyl, hardiboard, and other composite siding materials are not recommended replacements for historic wood siding.
- Allow pressure-treated wood to season for a year before painting.

Avoid

- Removing historic wood features that are in good condition or could be repaired.
- Adding new wood features where none were historically found.
- Cleaning wood surfaces with harsh cleaners or abrasive methods.
- Covering or obscuring historic wood surfaces and features.

Wood Siding Types:

Wood Shingle Types:

Left: Wood shingles such as these should be repainted regularly to help maintain their appearance and overall condition. The damaged shingles should be replaced in-kind, while preserving the existing shingles in good condition.

2) Masonry, Brick, and Stucco

Masonry, especially brick, is a common feature within the Smithfield Historic District and is an important character-defining element of its buildings and landscapes. As evidenced by important brick landmarks such as the 1750 Courthouse, proper maintenance of brick can last for centuries. When improperly maintained, masonry can lead to structural issues and the deterioration of important buildings and their features.

Best Practices

- Regularly inspect exterior masonry, joints, and mortar for decay.
- Clean masonry surfaces by the gentlest means possible. Use water and non-ionic detergents when cleaning masonry surfaces.
- Soaking, low-pressure washing (between 100 and 300 psi), and steam cleaning masonry surfaces is also appropriate, though these methods should be tested on an inconspicuous surface before proceeding.
- Unpainted masonry surfaces should remain unpainted. In rare cases, painting masonry surfaces may be necessary for its longevity, in such cases use a water permeable paint.
- Care should be taken when removing paint from masonry. Use alkaline poultice cleaners and strippers to remove paint from masonry when it is necessary.
- Remove vegetation and other organic materials such as dead leaves from the foundation, walls, and other external facets of masonry buildings and structures. Vegetation may damage mortar, joints, and cause moisture to seep into surfaces.
- Replacement masonry should be done in-kind or with materials that are similar in composition, texture, color, and size.
- Repoint deteriorated masonry joints with a material of similar strength, composition, texture, and color.
- When replacing or repointing brick mortar, maintain the profile, texture, and size of mortar that was replaced on the building or structure.
- When replacing bricks, maintain the brickwork pattern or bond found on the building or structure.
- When replacing stucco, use natural and porous stucco products.
- It is generally appropriate to remove non-historic materials such as vinyl siding to reveal historic masonry beneath.

4) Alternative and Synthetic Materials

Some architectural styles such as the Minimal Traditional and Ranch styles made ample use of vinyl and other synthetic materials such as hardi-plank. Ultimately care should be taken when considering the use of synthetic, composite, and cementitious materials in the historic district. The BHAR acknowledges that there is the continuing development of new, innovative materials that may be appropriate for use in the historic district. The use of synthetic materials shall be considered by the BHAR on a case-by-case basis. Synthetic materials are generally not worth preserving from a historic integrity standpoint. These guidelines are applicable to all elements of a building which may be constructed of synthetic materials such as siding, doors, windows, roofs, and fences.

Best Practices

- Synthetic materials are generally appropriate for non-contributing buildings in the historic district, though their use should be compatible with surrounding buildings and not detract from the character of adjacent landmarked and contributing buildings.
- Synthetic materials may be appropriate for primary facades of contributing buildings that are not easily visible from the street, for building additions or outbuildings, or for architectural elements that cannot be reproduced easily.
- When synthetic materials are used they should be of a compatible texture, profile, and appearance with their historic counterparts in the district.
- When synthetic siding is to be used, it should be of a similar texture, overlap, thickness, depth, and physical appearance as the historic siding of the building.
- It is generally appropriate to remove synthetic materials and restore original building materials when feasible.
- When synthetic siding is added to a building, the siding should not remove or obscure any architectural elements and other historic materials of the building.
- At times, it may be appropriate to replace historic materials with synthetic replacements when the historic material may no longer be reproduced.
- Applicants should contact staff prior to submitting a COA if they expect to use alternative or synthetic materials in their project. Due to the evolving nature of synthetic materials their use will be considered on a case-by-case basis.

Avoid

- Using synthetic materials on Landmarked buildings.
- Replacing historic features with synthetic materials when the historic feature can be repaired or replaced in-kind.
- Covering historic materials with synthetic materials.
- Using vinyl for windows, doors, and siding.

Preservation Brief #16: The Use of Substitute Materials on Historic Building Exteriors

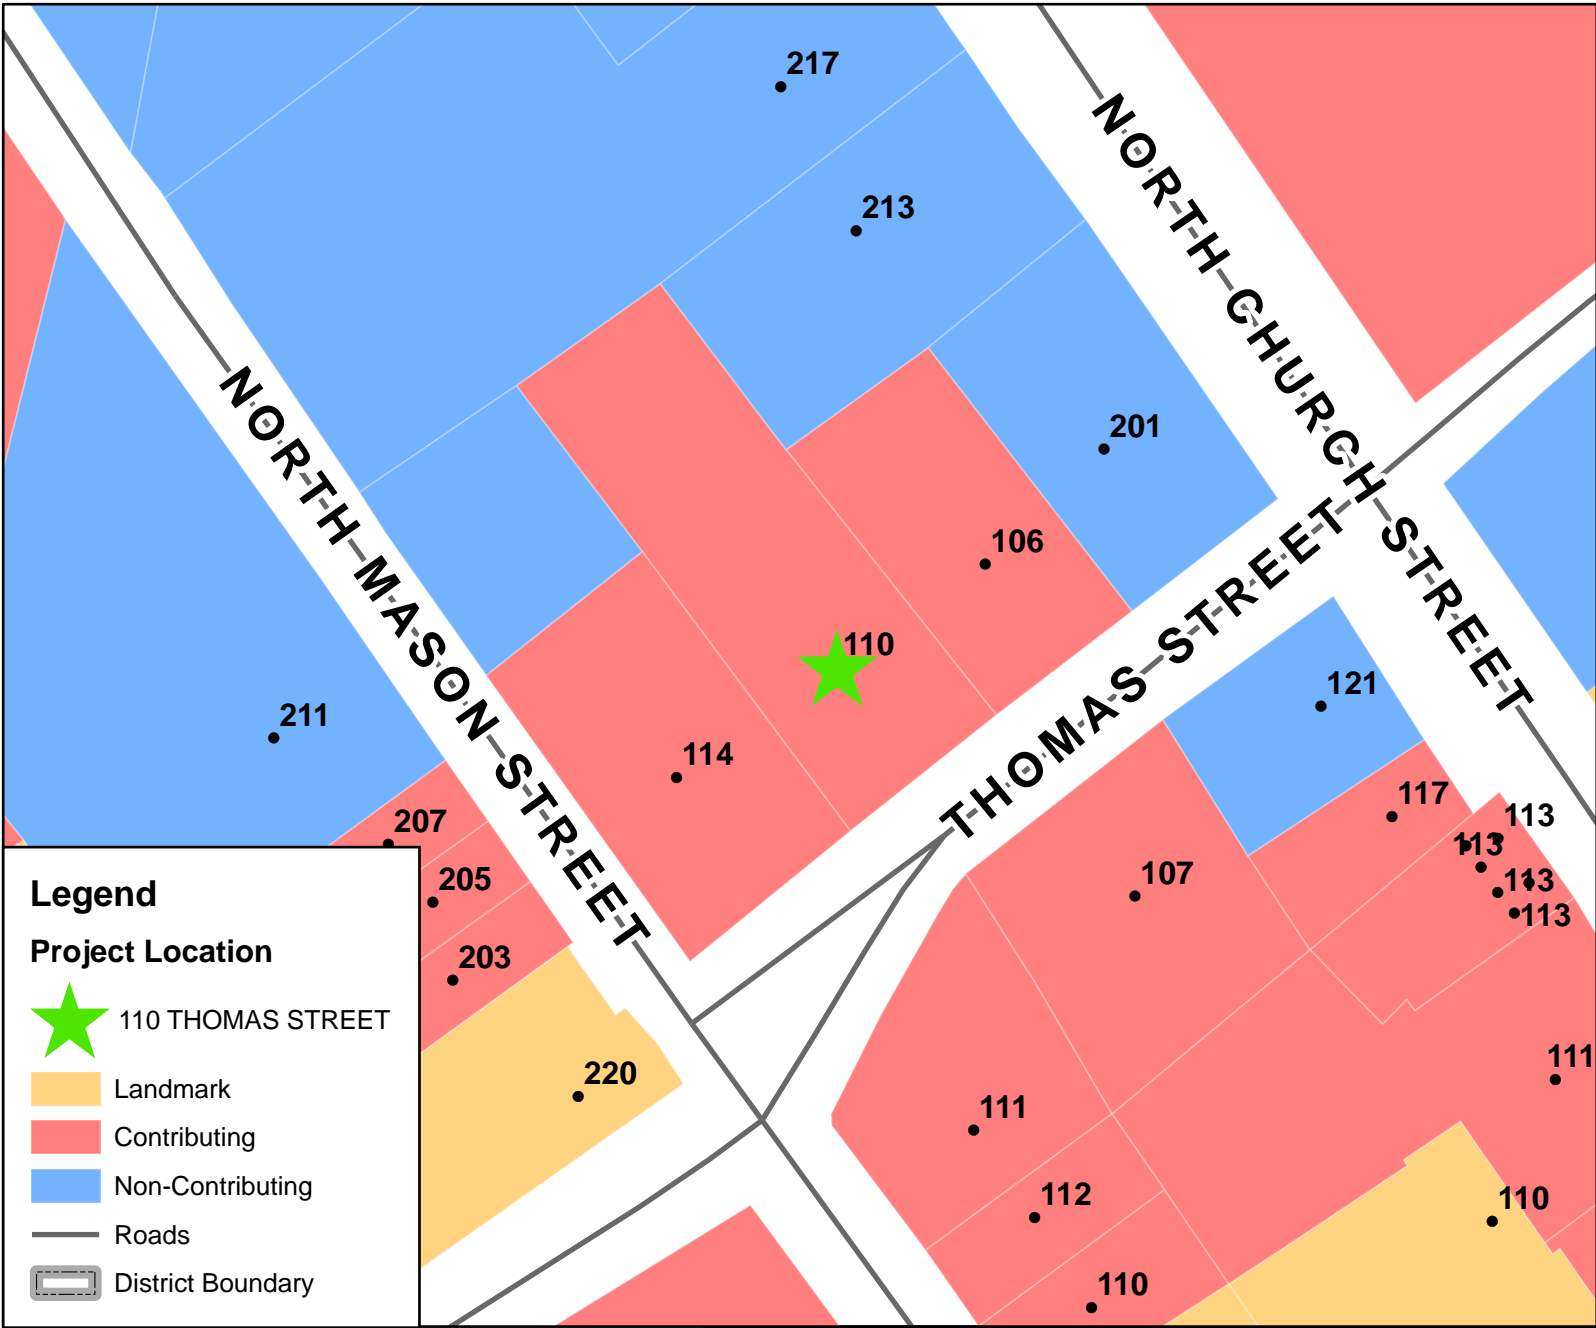

Released in 2023, Preservation Brief #16 provides the most up-to-date information on the appropriate use of substitute and synthetic materials for historic structures and buildings. Special care should be taken in any instance when a historic material is to be replaced with a nonhistoric counterpart. Even small changes to a historic building will gradually result in the loss of integrity over time. As such, historic materials should only be replaced when damage or deterioration to the material is too severe to be repaired. Applicants should refer to Preservation Brief #16 when the substitution of historic materials is necessary. Work should only be conducted by a qualified contractor and architect who has experience working with historic buildings.

Left: Historic wood siding (left) and contemporary fiber cement siding (right) demonstrates the difference in overlap and thickness between the two types of siding.

The Smithfield Board of Historic and Architectural Review (BHAR) held its regular meeting on Wednesday, March 19th, 2025, at the Smithfield Center. The meeting was called to order at 6:30 p.m.

Members present:

Leigh Abbott-Leaman – Acting Chair

Judith Lally

Russell Hill

Julie Hess

Members absent:

Trey Gwaltney – Chairman

Julia Hillegass – Vice Chair

Justin Hornback

Staff present:

William Riddick, III – Town Attorney

Mark Kluck – Planner

Press: None

Citizens: 6

Mrs. Abbott-Leaman welcomed all attendees to the meeting.

Planner's Report:

Mark Kluck, Planner, reported that the National Alliance of Preservation Commissions (NAPC) would hold its monthly webinar on Thursday, March 27th, at 1:00 PM. He said that the topic for this webinar is comparing Deconstruction vs Demolition of Historic Buildings, adding that if any Board member would like to attend, please let him know so that he could help with registration if needed. He updated that the application for solar panels at 313 Grace Street that had been heard last month and had been denied due to a failed motion would be appealed at the March Town Council Committee meetings, and would be subject to a public hearing at the April Town Council meeting for decision.

Upcoming Meetings and Activities

Tuesday, April 1st – 6:30 PM – Town Council Meeting

Tuesday, April 8th – 6:30 PM – Planning Commission Meeting

Tuesday, April 15th – 6:30 PM – Board of Historic & Architectural Review Meeting

Tuesday, April 15th – 7:30 PM – Board of Zoning Appeals Meeting

Monday, April 28th – 3:00 PM – Town Council Committee Meetings

Public Comments:

Mrs. Leaman confirmed that there were no members of the public that wished to make any comments.

Board Member Comments:

There were no Board Member comments.

Assorted Exterior Changes – 110 Thomas Street – Contributing – Faith and Joseph Barnes, applicants

Mr. Kluck reported that the applicants were seeking approval for assorted exterior changes to the single-family dwelling and the detached garage to include:

1. Replacing the wood siding with white Everlast 7-inch lap siding.
2. Wrapping the existing wooden rakes, fascia, and trim with white Mastic PVC-coated aluminum.
3. Covering the existing wooden soffits with new white Mastic Beaded vinyl soffits.
4. Replacing the existing gutter system with a Leaf-Away Gutter System in white to match the new trim and siding color.
5. Replacing the front white storm door, red entry door and wooden door surround with a brown ProVia aluminum storm door and a ProVia Fiberglass entry door, and a new PVC Mid-America door surround to match the style of the existing surround.
6. Adding a “Deep Cavern” accent color band to the front frieze board area, matching the proposed window trim and front door surround.
7. Demolishing the existing and erecting a new 10-foot wide by 6-foot deep front stoop and replacing the handrails with black wrought aluminum handrails.
8. Demolishing and erecting a new sunroom and stoop at the rear of the dwelling, which will include the following:
 - a. Enlarging the footprint to approximately 10.5 feet wide by 10.5 feet deep with a covered porch stoop.
 - b. Replacing seven (7) 9-light windows with “Snow Mist White” ProVia Endure EN600 Series vinyl casement windows (One (1) 2 lite, One (1) 3 lite, and One (1) 4 lite) with white colored aluminum window trim.
 - c. Installing a “Snow Mist White” ProVia Legacy steel entry door.
 - d. Installing two (2) vinyl Wolf Colonial Structural Posts to support the roof of the back stoop.
 - e. Installing black wrought aluminum handrail to match the front porch.
9. Completing like-for-like framing repairs to the detached garage due to a tree falling on the roof.

He reported that Town Staff recommended approval from a zoning standpoint and deferred to the BHAR for architectural discretion.

Joseph Barnes of 110 Thomas Street and David Silva with RA Jones Inc. Building & Remodeling were present to answer questions about the application.

Mr. Hill observed that there were many vinyl products proposed for use in the project, and pointed out that it was classified as a Contributing house. He reported that the Board did not issue many approvals for coverings comprised of aluminum wrap. He asked if they had considered using composite material instead.

Mr. Silva stated that they had discussed to keep the home exterior maintenance-free for the homeowners.

Mr. Hill reported that a solid PVC fascia board would accomplish the same thing as it was rot-free, etc.

Mrs. Abbott-Leaman stated that the handrail style that had been proposed matched what was seen currently.

Mr. Silva stated that was correct and it was a classic wrought-iron aluminum. He offered to bring in a sample that he had in his car.

Mrs. Abbott-Leaman requested to see a sample of the proposed siding if it was available.

The Board reviewed the sample.

Mrs. Abbott-Leaman asked if there were any additional questions for the homeowner or the contractor.

Mrs. Lally reported that she was reluctant to approve vinyl on a Contributing structure.

The Town Attorney recommended that they review each item one-by-one.

Mrs. Abbott-Leaman asked for consensus on exterior change 1.

Mr. Hill noted that the Everlast product was similar to Hardie and he was good with it.

Mrs. Abbott-Leaman asked the Board about their opinion on exterior change 2, and asked if they would like to return to it for additional discussion.

Mrs. Hess asked if there was a specific reason they chose to go with white Mastic PVC-coated aluminum.

Mr. Silva reiterated that it would offer a maintenance-free exterior.

Mrs. Hess asked if the material was more cost-effective.

Mr. Silva stated that it was more cost-effective.

Mrs. Abbott-Leaman recommended that they return to the proposed changes 2 and 3 for additional discussion. She asked for consensus on exterior change 4.

The Town Attorney asked if they were the same type of gutter as what was on the house.

Mr. Hill stated that he thought that the gutters were required to be half-round on a Contributing structure.

Mr. Silva reported that he had also brought a sample of the gutter for the Board to review.

Mrs. Abbott-Leaman continued by asking for consensus on exterior change 5 while Mr. Silva was getting the gutter sample for review. She asked if the existing storm door was currently aluminum.

Mr. Barnes presumed that it was aluminum.

Mr. Hill stated that he was fine with the door choice.

Mr. Silva presented the proposed gutter sample to the Board.

Mr. Hill asked if anyone knew what the guidelines specifically said about gutters.

Mr. Kluck reported that the Historic District Guidelines covered the typical styles of gutters used historically, and noted that there was only a recommendation to keep the gutters cleaned regularly in order to avoid rotten fascia.

Mr. Hill observed that the sample was fine, he was just curious about what was said in the document.

Mrs. Abbott-Leaman asked for consensus on exterior change 6, with the Board giving positive feedback. She asked for consensus on exterior change 7.

Mr. Kluck added that the change 7 was pretty much like-for-like, with the only real change being to the dimensions.

Mrs. Abbott-Leaman asked for consensus on exterior change 8. She reported that the only concern she had was with the vinyl windows that were proposed. She observed that the addition would be rear-facing, and as such, she did not have a large issue with them.

Mr. Hill agreed that it was fine.

Mrs. Abbott-Leaman asked for consensus on exterior change 9.

Mrs. Hess confirmed they would be matching the shingles color.

Mr. Kluck reported that the last two that required discussion were changes 2 and 3.

Mrs. Abbott-Leaman confirmed that they were uncomfortable with the proposed material, and asked if there was any alternatives that the Board would recommend.

Mr. Hill made a motion to approve items 1, 4, 5, 6, 7, 8, and 9 as presented on the staff report and conditionally approve items 2 and 3 provided the applicants use a solid PVC material for the rakes, fascia, and trim, and they use Hardie or an equivalent composite material for the soffits. He explained to the applicant that the BHAR did not approve wrapped vinyl on Contributing homes.

The Town Attorney explained that in the updated Historic District Guidelines the Board had deemed the use of aluminum and vinyl as not optimal, and that PVC or a composite that mimicked wood were the preferred choice in order to preserve the historic nature of the district. He added that if they had seen aluminum and vinyl in the Historic District, it was because they had been installed prior to adoption of the guidelines.

Mrs. Abbot Leaman reported that most recent update to the guidelines had been done last year with the previous version having been completed at least 10 years prior.

Mr. Silva confirmed the type of material that Mr. Hill had recommended for the rakes, fascia, and trim. He asked if it was okay to keep the existing material on the home, and lay PVC over it.

Mr. Hill said he would not want to put a $\frac{3}{4}$ board of PVC on top of a wooden $\frac{3}{4}$ board.

Mr. Silva stated that the lap board would be removed and there was a foam board underneath.

Mr. Barnes reported that the home was built in 1935 and did not have good insulation.

Mr. Hill said that was ok, but it would not be ok for the fascia board. He confirmed that they would not be putting the Everlast siding on top of the existing siding. He repeated the original motion.

Mrs. Lally seconded the motion.

Mrs. Abbott – Leaman called for a collective vote, with all present members in favor and none opposed. The motion passed unanimously.

Exterior Changes – 130 Main Street – Landmark – 1750 Isle of Wight County Courthouse Inc c/o David Hundley, applicants

Mr. Kluck stated that the applicant was seeking approval to conduct necessary repairs to the slate roof of the Courthouse and Clerk's Office using in-kind material; repair to the front door of the Clerk's Office and replacement in-kind of the cellar door; repainting, as necessary, of the lower four feet of the Courthouse exterior and replacement of failed bricks as necessary; repairs to the stucco on the Courthouse portico; in-kind repairs and reconstruction of the cellar doors on the right side of the Clerk's Office and repairs to the interior plaster finish of the Courthouse, along the east wall. He noted that the only changes to either structure would be to the Clerk's Office, which included installing copper hip flashing on the ridge and installing dark brown half-round gutters on the Clerk's Office. He reported that the applicants received the necessary approvals from the Department of Historic Resources (DHR), who stated in their letter that the proposed scope of work is consistent with the terms of the DHR Easement and the Secretary of Interior's Standards for Rehabilitation. Mr. Kluck said that Town staff recommended approval from a zoning standpoint and deferred to the BHAR for architectural discretion, provided the applicant adhered to the conditions outlined in the DHR approval dated February 28th, 2025.

David Hundley of 210 Villa Drive in Smithfield reported that he was the Director of the 1750 Isle of Wight Courthouse.

Nick Blevins of 220 Grace Street reported that he was the volunteer property manager of the Courthouse.

Mrs. Abbott-Leaman thanked them for the detail included in their application packet, adding that it was so thorough that she did not have any additional questions.

Mrs. Hess asked what the estimated time for completion of the project would be.

Mr. Hundley reported that it must be done by July 2026 as it was funded by the VA 250 Grant that they had been awarded in January.

Mrs. Hess made a motion to approve the application as presented. Mrs. Lally seconded the motion.

Mrs. Abbott – Leaman called for a collective vote, with all present members in favor and none opposed. The motion passed unanimously.

***Discussion Item* Exterior Renovations – 304 Main Street – Contributing – Gearldine Holmes-Barnett, applicant**

Mr. Kluck reported that the applicant wished to complete exterior renovations to the single-family dwelling, which include painting the exterior and removing the built-in gutter system. He stated that the built-in gutter system was failing, causing rot throughout the home's trim. He said that before moving forward with exterior renovations, the applicant was seeking the advice and expertise of the Board on the best methods to complete her future projects. Mr. Kluck reported that Town Staff suggested a robust discussion, and emphasized that any recommendations made during this discussion did not constitute approval for renovations. He stated that the applicant must return to the Board with a formal application and supporting materials to request the proposed changes.

Mrs. Lally asked if Mrs. Holmes was looking to eliminate the box gutters altogether.

Mrs. Holmes reported that she had lived in the home for 20 years, and it was essentially on water due to the faulty gutter system. She detailed that there were many areas that had rotted due to the gutters, including the railing on the porches and also supports on the front of the home. She stated that several contractors and roofers had come out to take a look at the home, and they preferred not to touch it due to the extent of the work needed. She speculated that there had to be home in the Historic District that had replaced their box gutters previously, and she requested guidance on what they had done and who had done the work for them. She recapped that she had been before the Board last year to get the plan to repaint her house approved, but when they began to look at doing the work they had seen all the rot that needed to be repaired first. Mrs. Holmes reported that her house had notable history attached to it, but it was not listed on the National Registry. She asked if it was historic enough to qualify for the Rehabilitation Tax Credit.

Mrs. Abbott-Leaman said that she was unsure if they could speak to that directly, but it was her understanding that it would need to be on the Registry.

The Town Attorney stated that he was also unsure of what the requirement was, but he thought that Mrs. Abbott-Leaman was correct.

Mr. Kluck advised that Mrs. Holmes could reach out to the Virginia Department of Historic Resources (DHR) for additional information.

Mrs. Holmes asked if there was a number she could easily find, adding that she had called Isle of Wight County and they did not know how to help her.

Mr. Kluck reported that he would research the best contact and then send her the information. He added that DHR had a list of contractors on their website, but they were not endorsed by the department.

Mr. Hill reported that he would stop by to look at the home. He explained that it was a complex situation due to the way the house was designed. He explained that if the box gutters were removed, then the pitch of the roof may also have to be changed, which could be very expensive. He offered that she may be able to repair the box gutters by replacing the wood with a PVC product.

Mrs. Holmes stated that process would entail taking down all the gutters and rebuilding them again.

Mr. Hill acknowledged the work, but pointed out that it would prevent having to tear the whole roof off. He reiterated that he would see if he could assist her.

Mrs. Holmes noted that she would like to get something done during the summer. She asked if once they were able to identify a contractor willing to do the work, then she would come back before the BHAR to present her plan.

The Town Attorney explained that Mr. Hill was a very experienced and qualified contractor.

Approval of the January 21st, 2025 and February 18th, 2025 Meeting Minutes

The Town Attorney reported that he had reviewed both sets of minutes and recommended approval of both as presented.

Mrs. Hess made a motion to approve the minutes as presented. Mrs. Lally seconded the motion.

Mrs. Abbott – Leaman called for a collective vote, with all present members in favor and none opposed. The motion passed unanimously.

The meeting adjourned at 7:16 pm.

Mrs. Abott-Leaman - Acting Chair

Mark Kluck - Planner

MASTIC

Pro-Bead Classic Beaded

Pro-Bead® features wide 8-inch panels with a deep, sculpted bead that adds a classic Southern clapboard design to your home's soffit. The non-vented style enhances curb appeal as an attractive wainscot.

**Due to screen resolution limitations, product colors may not be exactly as shown.*

NON-VENTED

VENTED

8 Standard Color Options

VINYL SOFFIT

VENTURA® • PRO-BEAD® SOFFIT AND WAINSCOT
PRO-SELECT® SOFFIT AND VERTICAL SIDING • PRO-TECH® PLUS SOFFIT • UNIVERSAL SOFFIT

FINISH THE JOB UNDER THE EAVES

With Mastic vinyl soffit, you can extend the low maintenance beauty of Ply Gem up under the eaves — which helps avoid repainting and costly repairs in the future.

Easy to install, Mastic vinyl soffit is available in a variety of grades, styles and colors. Like all Mastic products, our soffit is backed by a V.I.P. Limited Lifetime Warranty.

VENTILATED SOFFIT — A KEY COMPONENT FOR A PROPERLY VENTILATED ATTIC.

A poorly ventilated attic is bound to have condensation problems. During hot weather, temperatures in an attic became super heated. Coupled with trapped moisture, this can lead to:

- Damp insulation (rendering it ineffective)
- Mold and mildew problems
- Rotted rafters and joists
- A shorter roof life

Plus, a super heated attic puts a heavy load on your home's cooling system. The solution is to ventilate your attic. Our ventilated soffit allows outside air to flow through the attic and out louvers or vents in your roof.

VENTILATION HELPS PREVENT ICE DAMS IN GUTTERS.

In winter, an attic that is too warm melts snow off the roof. The ice melt then re-freezes at the gutters causing ice dams that can damage the roof and allow water to seep through the fascia. Ventilated soffit allows a natural flow of outdoor air to ventilate the attic, which helps keep it cooler in winter and reducing the potential for ice dams in gutters.

VENTILATED OR NON-VENTILATED. HIDDEN VENTS OR VISIBLE VENTS. IT'S YOUR CHOICE WITH MASTIC SOFFIT.

Whether you're looking to increase ventilation in an attic, reduce maintenance under the eaves or enhance the beauty of your home's exterior, we have a solution that's right for you. The unique design of Ventura soffit, for example, gives the appearance of a smooth profile with vents hidden out of sight. It's just one more example of Ply Gem innovation.

NO HIDING THE FACTS: LESS IS MORE

The less you see of us, the more you'll like us. Our unique ventilation design, hidden deep within all six walls of the soffit panel, delivers up to 50 percent more ventilation than some competitor's hidden soffits. And better ventilation than standard soffit.

It's a whole lot more, with a whole lot less visible.

VENTURA HIDDEN VENT SOFFIT

VENTILATED SOFFIT

WHAT YOU DON'T SEE IS WHAT YOU GET

- Clear span design with few visible vents.
- Superior locking system stays secure under pressure.
- Rollover nail hem provides 160 mph windload.

Proposed soffit (replacing wood with vinyl)

PRO-BEAD® SOFFIT AND WAINSCOT

8" VENTILATED • 8" NON-VENTILATED • PRO-BEAD 3/8" J-CHANNEL

ADVANCED LOCKING SYSTEM AND NAIL HEM
Special locking technology makes installation easier — keeps panels firmly locked together.

PREMIUM .040 NOMINAL THICKNESS
Greater strength and greater rigidity.

AVAILABLE IN 8 COLORS
See color chart for complete details.

FASTER, EASIER CUTTING = FASTER, EASIER INSTALLATION

EXCELLENT CHOICE FOR SOFFIT AND PORCH CEILINGS

BRUSHED FINISH

NON-VENTILATED PANELS APPROVED FOR USE IN SIDEWALL AND WAINSCOT APPLICATIONS

HANG-TOUGH™ TECHNOLOGY
Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

CLASS 1(A) FIRE RATING

V.I.P. LIMITED LIFETIME WARRANTY
Premium guarantee of lasting quality and peace of mind — backed by Ply Gem, a trusted industry leader for 75+ years (see warranty for complete details).

TOWN COUNCIL REPORT

Description	Type	Upload Date
Summary Minutes from the Joint PC and TC Meeting February 2025	Minutes	5/2/2025

The Smithfield Town Council and Planning Commission held a special joint meeting on Tuesday, February 25th, 2025. The meeting was called to order at 6:30 p.m.

Council Members present:

Michael Smith – Mayor

Bill Harris – Vice Mayor

Valerie Butler

Jeff Brooks

Mary Ellen Bebermeyer

Planning Commission Members present:

Julia Hillegass – Chairwoman

Virginia “Gigi” Smith – Vice Chair

Bill Davidson

Charles Bryan

Dr. Thomas Pope

Members absent:

Steven G. Bowman – Town Council

Darren Cutler – Town Council/Planning Commission

James Yoko – Planning Commission

Staff present:

Michael Stallings – Town Manager

William Riddick, III – Town Attorney

Tammie Clary – Community Development & Planning Director

Mark Kluck – Planner

Chris Meier – Deputy Chief of the Smithfield Police Department

Press:

None

Citizens:

Mayor Smith welcomed all attendees to the Joint Meeting of the Town Council and Planning Commission.

Density

Dr. Pope began by stating that the Planning Commission had requested the Joint Meeting to take place due to much of the previous November campaign and election information centered on development across Isle of Wight County and the Town. He noted that many Town Council members’ campaigns centered on them being against development. He asked for clarification on the Town Council’s expectations as the Planning Commission was appointed by the Council. He added that Town Staff needed better understanding of what the Council’s expectations were as well since they would be the first contact for the developer’s and would be answering many of their questions before they came before the Planning Commission. Dr. Pope detailed that he wanted to hear from the newly elected Council members: Councilman Cutler, Vice Mayor Harris,

and Councilwoman Bebermeyer. He related that he had been on the Planning Commission for 12 years and had been involved in many of the decisions that were made regarding development. He continued that many of those decisions were unfavorable to the current Council members, and he wanted to get more information about why that was, and how they could move forward in the future.

Mayor Smith said that he was glad that Dr. Pope had requested the Joint Meeting. He stated that he felt that everyone needed to get on board with the where the Council wanted Smithfield to go in the future. He reported that he has lived in Smithfield all of his life and had been on the Council for 12.5 years. He likened the growth in recent years to an explosion and it needed to slow down. He said that a developer requesting eight Special Use Permits (SUPs) for one small project was concerning to him, as well as the newly elected officials. He agreed that the Council needed to give clear direction on which way to proceed and how to control the growth.

Vice Mayor Harris thanked Dr. Pope for his idea to hold a Joint Meeting. He related that he was newly elected to the Town Council, but was not new to the research and familiarity with the processes as he had been attending meetings for years and had completed the Planning Commissioner course in Richmond. He said that in regard to proposed developments, the first step would be for Town Staff to review how the proposal related to the existing zoning regulations as they were written. He noted that if they did not like the way that the Zoning Ordinance was written, then they needed to reconsider and change them as necessary. Vice Mayor Harris continued that the next step would be for the proposal to come to the Planning Commission for review. He said seeing developers come in asking for six or seven SUPs right away was a problem. He stated that either the zoning laws were poorly written and encouraged developers to do that, interjecting that they were not, or there was some sense on the part of developers that they could come before the Town and circumvent guidelines that were already in place. Vice Mayor Harris reported that an SUP was exactly that and should not be granted by-right or on a regular basis. He said that it should be the obligation of the applicant to show why an SUP was necessary and how it would benefit the Town. He stated that if a developer was requesting an SUP to lower setbacks in order to increase density, then that would not be an action the new Council would favor. He advised that the Commission be mindful of the use of SUPs, and he would like to see SUPs sent for their review that could be used to everyone's advantage. He pointed out that in the last five years every developer who had submitted an application had started with ridiculous numbers, well outside of the printed material. He acknowledged that developers were completely entitled to buy property and try to make a product through which they can make money, adding that they would come for review and act like they had no idea about what the regulations were when they bought it. He stated that Smithfield did not need another house built as the County was taking care of that for them in terms of availability, and Smithfield could afford to be selective and controlled in their actions. Vice Mayor Harris stated that the newer Councilmembers were 100% behind more commercial or economic development in the Town.

Councilwoman Bebermeyer said that she appreciated the work that the Planning Commission did, recognizing that they got into the small details of projects. She agreed with Vice Mayor Harris' statement that there was a reason that SUPs had the name they did, as they should be used in special cases. She said that she would not say that they should never be used, however

she was against their use as a blanket over a whole development as that made it no longer “special.” She said that they had ended up with SUPs benefiting the developer and not benefiting the Town. She explained that an SUP could benefit both parties, but the Council was beholden to protect and represent Smithfield. Councilwoman Bebermeyer reported that Town Staff did a great job of helping people understand what regulations and zoning were in place, adding that it was okay for them to say what aspects the Council would not be in favor of. She also made the statement that the citizens of Smithfield were in favor of commercial development including restaurants and shopping, and that there was enough housing coming close to the Town out in the County. She noted that it was ok to grant the occasional exemption or SUP in support of local, small businesses, but not large developments.

Councilman Brooks said that he was speaking for himself and not the entire Council when he said that he wanted them to be the best Commission they could be. He stated that he wanted them to look thoroughly at all of the information, as they had done, and adhere to the rules outlined in the municipal code and the Town’s zoning. He said that the developers were coming in with so many requests, but the regulations said that the Council did not have to honor those requests. He related that Councilman Cutler had a t-shirt that read “Don’t Suffolk up Isle of Wight County,” and pointed out how the area at Bridge Road had been developed. Councilman Brooks reported that the Town was already congested, and they did not want to see a Virginia Beach level of development in this area. He explained that he had arrived in the area at the end of the Mallory Pointe development’s application process and the start of the Pierceville proceedings, and had learned about what was happening in the area. He calculated that there were three developments on the table with another probably right behind them, which prompted the fear that these things needed to be stopped. Councilman Brooks emphasized that he did not want the Planning Commission to feel any animosity regarding the decisions or work they had done. He said that he felt that they were doing a fine job of doing the detailed work that allowed the Council to see whether or not it was a good project. He reasoned that if a developer felt that he needed to ask for an SUP then that is what they would ask for, which he did not blame them for doing since they were in business to make money.

Dr. Pope asked Councilman Brooks, and all of the Council members, to clarify what about the Mallory Pointe project he did not like.

Councilman Brooks recalled that he had seen the amount of opposition to the project in the citizenry but had not really known much about the backstory. He said that he had gone back on his own to do more research about the project. He stated that it had seemed like a problem to him when the amount of public outcry regarding the project was compared to how the Council had ended up voting to approve it. He acknowledged that he did not have a problem with the development himself, adding that he was saying that after the fact and it may have been different if he had been present during the whole process. He observed that the area was great for housing, and it would help with a great need for housing.

Vice Mayor Harris reported that he had been present at many of the meetings mentioned in regard to Mallory Pointe and his problem from day one had been with the density and number of units allowed in the project. He reviewed that Mr. Napolitano, the developer of Mallory Pointe,

had requested a larger number of units and reductions to the setbacks much in the way that they had been discussing by asking for many things up front.

Mayor Smith gave the reminder that he had voted against allowing Mallory Pointe to proceed, and the reason why was due to the aforementioned public outcry against it. He related that in all the years he had sat on Council, it had been pretty calm. He stated that the Council members had been elected by the citizens, and they needed to listen to them. He continued that the Council had appointed the members of the Planning Commission to their positions, and they were a reflection of the Council members as a result, and they needed to work together. Mayor Smith reported that he appreciated all of the work that the Planning Commission did, especially the detail and lengths that they went to. He added that the Town was becoming what he did not want to see. He clarified that it could grow, but he wanted to control the growth to ensure that the Town was still recognizable as Smithfield. He outlined that the Town has no control over what is happening in the County with development and growth. He related that he wanted the two Boards to think about what they could do to make the whole process more congenial to the community.

Councilwoman Bebermeyer reported that she had begun her involvement with Town issues after seeing what happened during the Mallory Point process as well. She agreed with Councilman Brooks's statement that the area was a good place for housing, but she objected to the amount of density allowed.

Councilwoman Butler stated that her purpose at the meeting was to listen to other's point of view. She noted that she did not necessarily agree with some of the comments made regarding the use of SUPs as a tool. She said that having been part of the previous Town Council, she was feeling singled-out about the decisions being made. She reported that during the time of the initial reviews regarding the Grange she had sought outside consultation with a person who had been a Planner, and her main concern was that the use of SUPs might be showing preferential treatment to developers. She said that she had been told that it was not unusual for developers to request SUPs, and it would be up to the Council to decide whether or not to proceed. She recalled that she had attended Planning Commission meetings to hear the conversations that took place with the knowledge that the project would then be before the Council for review during the next step. She stated that in doing that, it allowed her to have background knowledge prior to the item coming before the Council for review. Councilwoman Butler stated that she had vivid recollection of Dr. Pope saying that he had no problem with the use of SUPs because it allowed for the opportunity to have more in-depth conversations about projects prior to making decisions. She summarized that she did not have a problem with SUPs, and it was up to the Council to say no to what had been requested. Councilwoman Butler recalled Vice Mayor Harris's review of the Planning class held in Richmond, adding that she had also attended that class. She reviewed that during her experience in the class she had called Tammie Clary, Director of Community Development and Planning, during their discussion of Comprehensive Plans to find out the details of what the process was when Planning first received an application. She said that Mrs. Clary had reported that they reviewed it in relation to the Town's Comprehensive Plan, which was the correct process. She continued that the Town Manager, Michael Stallings, and Mrs. Clary did a very good job of vetting projects when they came up for review. She pointed out that the Town Staff could give the developer their opinion on a project; however, it was not their job to say yes or no. She related that

she had not asked Mr. Mullins many questions about the Cottages at the previous Committee meeting as it had already been discussed at the Planning Commission level. She acknowledged that “density” was a hot-button topic currently. Councilwoman Butler reviewed that she had voted in favor of Mallory Pointe as she felt that the developer had did a good job with listening to what the Town wanted and made adjustments based on that information. She said that at the time, Mr. Napolitano had proposed affordable housing, which she was an advocate for. She expressed disappointment that the proposed duplexes and townhouses were now not included in the first phase of the development, updating that Wellington Estates had dictated that decision by requesting comparable houses to what was seen in their neighborhood. She continued that since then much time has gone by and the real estate market has evolved, which made it tough to say if when the duplexes and townhouses are built that they would still be considered “affordable housing.” Councilwoman Butler reported that she had gone through the public comment ledger from the meeting where they voted regarding Mallory Point to see who actually lived in Smithfield versus who lived in Isle of Wight that had signed up to speak. She reviewed that the people who spoke out regarding Mallory Pointe were not representative of the majority of the people from the Town of Smithfield. She stated that she was born and raised in Smithfield, her family lived in the Town, and she would never do anything to affect the community in a negative manner.

The Town Manager recommended that since the subject of SUPs had come up several times during the conversation that the Planning Commission members should directly address how they viewed them and why the system was set up in the way that it was.

Dr. Pope thanked him for the suggestion. He gave the reminder that in the Town’s Suburban Residential Ordinance there were two different types of developments: “regular” with 3 units per acre, and “cluster” which allowed 4.5 units per acre with the inclusion of more open space. He explained that based on the information that the Council just gave, Mallory Pointe should have been approved hands down. He noted that the development acreage was 812 homes over 497 acres, with the original proposal having been 1200+ homes. He said that after all the adjustments were complete the single-family density calculation came in at 2.77 houses per acre, and the attached residential density calculation came in at 3.89 houses per acre. Dr. Pope stated that the developer was well below the density requirements in the Town’s ordinances. He continued that the SUPs requested did not ask for more density, but they were for the use of cluster development versus traditional, a rezoning, a parking and loading waiver because they did not want Recreational Vehicle (RV) parking, suburban residential community buildings, non-continuous open-space, and to increase the residential building height from 35 feet to 45 feet. Dr. Pope reiterated that the Mallory Pointe development was well below the density limit. He related that he personally had not been concerned about density during the review because Mr. Napolitano had been more than willing to cut density and make it so that the Resource Protection Area (RPA) could not be touched by the homeowners that would live near the creek. He added that the developer had made many concessions, including funding road improvements and the traffic circle.

Dr. Pope continued that when the original Grange numbers were reviewed, that developer, Mr. Luter, was well within limits as well. He noted that he was using original numbers because he had not seen the latest housing number changes. He stated that at the Grange, in the single-family section the density calculation was 2.9 units per acre and the multifamily were at 7.72 unit per

acre. He gave the reminder that in Smithfield's ordinance the density requirement for multifamily residential was 12 units per acre. Dr. Pope related that he felt that multifamily residential covered townhomes, duplexes, or condos where there were 2-4 buildings next to each other, and in the Grange multifamily residential had been applied to a large apartment building that was four stories high which pushed the density to 38 units per acre. He reasoned that the Town needed to fashion a new multifamily residential ordinance that addressed high-rises and not condos or townhouses. He observed that in the case of the Grange, because the high-rise was included it had skewed the information. Dr. Pope reported that the neighborhood of Wellington Estates was developed at 2.5 houses per acre. He questioned how 2.5 houses per acre was considered acceptable and 2.7 houses per acres was not acceptable. He added that the Cypress Creek's neighborhood was built out at 1.1 units per acre, updating that number did not include the acreage of the golf course. He noted that the Grange's numbers were not that far off, with the exclusion of the high-rise apartments. He related that they could not change that part of the ordinance during the developer's presentation, but they did need to readdress the issue of high-rise or concentrated density buildings.

Dr. Pope questioned how the Town's downtown neighborhood residential density calculations came to 7.8 units for single family per acre and 10 units multifamily per acre when the required square footage was entered, but the ordinance limited it to 5 units per acre. He asked how they could reach the number of 5 units per acre for the downtown residential density when the lot sizes did not correlate with the actual calculation. He stated that he did not know who wrote the ordinances, but they did not make sense when the actual math was applied. Dr. Pope added that Mr. Carollo's redevelopment request was within the square footage requirements, but was over the number of 5 units per acre. He related if someone was proposing something that was within the zoning requirements, the Planning Commission could not tell them no, and the only thing they could address at that point dealt with appearance. He stated that the only way they had a legal right to tell them no was because they must apply for a special use permit. Dr. Pope explained that the more restrictive the Town was, and the more SUPs they got, then the more input the Town had in the project. He noted that vape shops, at home daycare centers, and Airbnb's all required SUPs because it allowed the Town to consider if they matched the location in which they were going to be placed in. He pointed out that the more broad the criteria was, then if the requirements were met, then all the Town could say was "thank you for your development." He acknowledged that there may be a lot of SUPs for more trivial things, as was the case in Mallory Pointe. Dr. Pope continued that another inconsistency that needed to be dealt with concerned Planned Mixed-Use District (PMUD) developments. He noted that within the PMUD there was not a specific density for the single family residential or the attached residential which allowed for the large swings in density. He reported that he felt the multifamily and attached residential classifications were decent as they existed currently, but they should consider including information to address high-rise structures.

Dr. Pope stated that he was not in favor of the idea of allowing for the removal of one home and putting three in its place in a downtown residential neighborhood, and that should be made clear in the ordinance. He observed that Mr. Carollo's project was not the same as that as the land he would build on was open land with nothing needing to be demolished. He summarized that he did not think that the density numbers were too far off, but that they needed to better define the

multifamily residential, downtown neighborhood residential, and the PMUD to say what they allowed for density and how the development were going to be used.

Vice Mayor Harris asked the Town Manager if he could repeat the information he had given at the Committee Meetings the day prior on the specific way that the Town could control units within the PMUD currently.

The Town Manager stated that Town Staff do not consider unit number based on a project as a whole but broke it out by section. He gave the example of within a PMUD, the area that had single family residential units must comply with the single-family residential requirements. He noted that this way the underlying zoning still applied, but the project would be able to have one unified zoning district. He acknowledged that it could become complicated when mixing the different uses, but that was what it allowed for.

The Town Attorney explained that the idea of the PMUD was created on purpose to address the planning trend of mixing living and work areas. He related that the Town's consultants had reviewed the ordinances and felt that the Town was far behind in its zoning that what they had would never permit what was in higher demand, namely walkability. He reported that without the inclusion of SUPs, the idea could not work because the flexibility would not be there. He stated that the idea behind SUPs was not to let developers get away with things, but it was a tool to let the Planning Commission consider a comprehensive development.

The Town Manager reported that most PMUDs that he had seen in other localities were far more lenient than Smithfield's, with the Town having much more control. He said that it allowed the Town to control different aspects of a project instead of having to approve or deny the entire project.

The Town Attorney stated that a reason that other localities did not see as many SUPs was because they were larger and had broader ordinances that gave the developers many more things they could do by right. He acknowledged that it did not seem like it, but the use of SUPs was designed with the idea of giving the Town Council and the Planning Commission more control over the ability to say yes or no. He recognized that they may not have done a good job of explaining them.

Vice Mayor Harris stated that the previous explanation had not been sufficient for the general public, and what they had made more sense. He continued that there seemed to be misunderstanding, and he was not assigning blame to anyone for any previous action. He stated that some things that the Commissioners were very familiar with, such as setbacks, had the ability to cause confusion to the public where the perception was that the Town was creating opportunity for a developer to build more. He asked how allowing a 5-foot side setback instead of 25 was not just a way for a developer to be able to increase the density.

The Town Manager explained that unless the Council and Commission agreed to something that would specifically address an increase in density, then reducing the setbacks allowed did not permit developers to increase the density. He continued that the density caps were in place, so unless the density numbers themselves were being adjusted then they would not change. He pointed out that rarely large lot subdivisions were constructed and there had been a movement to smaller lots, closer to amenities.

The Town Attorney related that developers were not building one acre lots as was done in the past because they could not afford it now due to the cost of building the infrastructure. He explained that the use of narrower setbacks was one of the ways that different housing products could be presented to make it more affordable.

Vice Mayor Harris stated that he understood what was being said, but it was frustrating to the newer Councilmembers because there was a setback limit set, and if that number was not working in the interest of property development, then the Town needed to go back and rewrite the ordinance. He added that at the very least changing the ordinance would eliminate the perception that the Town was giving away things to developers.

Mr. Davidson said that he thought that was what Dr. Pope had been saying all along. He added that there were aspects that the Commission could not control because they weren't even included in the ordinance.

Vice Mayor Harris stated that as elected officials they have been asked to do a better job at conforming with the laws as written, and if the way to do that was to rewrite them then they should do it in a communal manner. He used the example of the process that Mr. Carollo had initiated in order to build on the property downtown, and said that what needed to be done seemed contrary to what the Town's zoning had established. He questioned if they had conceded and approved Mr. Carollo's request for a text amendment, then what would stop someone who owned two acres downtown from also building four or five houses on that lot. He said that the Town Council relied on the Planning Commission to do all of the vetting so they may make an informed decision. He reported that some had spoken with him just that day about buying the two-acre lot he had mentioned to build on it if the Council approved the text amendment for Mr. Carollo.

Dr. Pope noted that in the case of Mr. Carollo the zoning was not changing. He reported that every other ordinance the Town had included provisions to allow an applicant to exceed maximum density, and downtown neighborhood residential did not. He added that the point of the text amendment was to give people an avenue to at least explore the option. He said that if the text amendment was not approved, then no one could exceed the written density. He asked Mrs. Clary for confirmation that what he was saying was correct.

Mrs. Clary stated that she was looking it up as she was not sure that it was included in Neighborhood Residential.

Dr. Pope reiterated that every other classification allowed for the application to be made to exceed density except for the downtown neighborhood residential and if they did not grant the text amendment, then no one could exceed 5 units per acre.

Vice Mayor Harris stated that he understood that viewpoint. He asked what they should then say to other developers who want to do the same thing elsewhere in downtown.

Dr. Pope observed that the 2.7 acres in question had originally been purchased by Mr. Luter, and he then presented to the Town his plan to build 8 units on that property. He said that at that time, the Town notified Mr. Luter that in order to do that he would have to extend Clay Street to meet James Street, donate some land to the Children's Center, and create a parking lot for the Veterans of Foreign Wars (VFW) building. He continued that after it was all agreed upon, the Town approved the project; however, Mr. Luter then decided to walk away from the project. He reported that Mr. Carollo then took over ownership of the property, but now it is 1.2 acres instead

of 2.7 acres because of the land donation, parking lot promise, and Clay Street extension. Dr. Pope reported that it was his opinion, and his alone, that 1.2 was not the right denominator to apply to Mr. Carollo's application. He referenced Vice Mayor Harris's report that someone was looking to build houses on a different 2-acre lot, but it was not a fair comparison.

Vice Mayor Harris said that he had heard Dr. Pope make that argument prior, and he honestly did not have a lot of problem with the logic; however, he was talking more about the precedent that would be set.

Vice Chair Smith stated that they could say no.

There were several speakers saying they could say no at one time.

The Town Attorney reasoned that it was ok to say no, even if a precedent had been set elsewhere if the proposed project was inappropriate for the location. He related that Mr. Carollo's property had Town roads on three sides, while the property that Vice Mayor Harris was referencing did not have good access or utilities.

The Town Manager agreed and added that every project stood on its own merit. He said that also long as the Council was not being arbitrary or capricious then they could say no to anything that they wanted to. He explained that they did not have to approve someone's project just because they approved one before.

Vice Mayor Harris asked them to explain how that was not arbitrary.

Chairwoman Hillegass pointed out that it was due to the reasons that the Town Attorney laid out.

The Town Attorney explained that every piece of property was different, and they were completely different parcels.

Councilwoman Bebermeyer observed that if they interpreted it in that way then the property as purchased by Mr. Luter and then altered, versus the property that Mr. Carollo bought, should not be treated the same since they were different.

The Town Attorney stated that it was the same piece of property.

Councilwoman Bebermeyer pointed out that there was now a road on the property.

Chairwoman Hillegass stated that Mr. Carollo should not be penalized because of improvements made to the property.

Vice Chair Smith stated that it was her thought that the title "Special Use Permit (SUP)" had become a poison in the citizen's minds and that had been brought to the Council members. She stated that SUPs were for the Town's benefit, not the developers. She said that because the public had not been educated on the subject, they did not understand them. She continued that maybe if the developer went with the current zoning so that there weren't so many SUPs coming, but cautioned against having "open zoning" where there were certain things available always by-right.

Councilwoman Bebermeyer said that none of the Council had said that was what they wanted.

Vice Chair Smith acknowledged that the Council wouldn't want that but continued that the average citizen who did not attend all the planning meetings and did not attend certified planning courses did not understand the process. She said that Councilman Cutler was done a disservice by the person at the Planning training in Richmond who told him that they could not remember the

last time they approved SUPs in their locality. She noted that SUPs were used differently in different sized localities, and most places did not have what Smithfield had. Vice Chair Smith stated that Smithfield was a special place, and as such, special uses would have to be permitted, but SUPs should not be viewed as a weakness.

Councilwoman Bebermeyer stated that she did not view them that way, and that SUPs should be used for special purposes that doesn't set a precedent for somebody else.

Dr. Pope used the example of the recently proposed Promontory development and noted that they had reported that they would like 5-foot side yard setbacks. He stated that his view was that houses 10 feet apart were too close together. He said that the current side yard setback was 15 feet or 30 feet between homes, and he recognized that enforcement of that setback would decrease density to a certain extent. Dr. Pope observed that the age 55+ cottages in Cypress Creek had been approved for 18 feet between homes, which he conceded to in that case based on the appropriate size of the homes they would build. He related that in the case of the Promontory, he had told the developer to come to a plan that was more reasonable than 10 feet apart. He continued that he considered setbacks in relation to the location of where the homes would be. He reported that he was much more flexible on front and back yard setbacks, but not the side yard setbacks, as those were what made a neighborhood feel spacious.

Vice Mayor Harris asked Dr. Pope to confirm that in certain situations if he did not like what was being requested, such as the 5-foot side setback of the Promontory, that he would encourage the developer to rework their plan instead of just reporting what the zoning ordinance requirements were.

Dr. Pope reported that they had given that information to the developer of the Cottages. He recalled that in that case the developer had fully exploited his net developable area, but if he had not and had a lot of amenities and parks, he could still keep 100 homes if they were spaced out. He related that in that case the developer would need to decrease his open space, as long as he still met all the open space requirements.

Mayor Smith stated that in reality, the developer could build 150 units.

Chairwoman Hillegass reported that they could but in clusters, not as single-family units.

Mayor Smith confirmed that multifamily units had already been approved at the site.

Mr. Davidson stated that the number of units had been approved but not the single-family unit aspect.

Mayor Smith asked for confirmation that the developer could build tomorrow what had already been approved.

Dr. Pope and Mr. Davidson stated that was correct.

Dr. Pope detailed that the developer had been approved to build 15 10-plex units.

Vice Chair Smith reported that in her opinion the 15 10-plex unit plan looked better than the smaller, closer single-family units.

Councilwoman Bebermeyer said that she would prefer to see duplexes or 4-plexes, as could be seen next door at the Villas, than townhomes. She stated that she did not like town homes due to their height, likening them to a wall.

The Town Attorney observed that from an economic standpoint, currently that type of housing was entry-level for many people.

Councilwoman Bebermeyer related that townhomes that were being built now were \$400,000. She stated that there could be a smaller lot with a smaller dwelling on it and felt that it was a better look than a townhouse.

Mr. Bryan reported he would say something that was not popular but hoped that it came across as practical and understandable. He said that Town Staff, Dr. Pope, and the Town Attorney had explained the different ordinances and how they were used. He continued that it had been made clear that some people thought, and had said, that SUPs and waivers were dirty words, which they were not. He observed that the ordinances overall were what bound everything together, and what gave the Town flexibility were the SUPs and the waivers. He continued that was what would be applied to each individual application. Mr. Bryan related that no one would ask for the same SUPs and waivers on their application as they depended on the actual application, the location, and their request or what they were asking for. He said what was done for one development certainly may not apply to another. He explained that the SUPs for the Grange addressed the developer's request to make the homes of the development mimic the homes of the neighboring historic district with the houses close to the street, which was appropriate; however, the SUPs for the Cottages requested something similar, and were not situated near the historic downtown area and were not appropriate. He related that denials or approvals for applications were based on that separate application's merit. He said that the newer Council members could fulfill many of the citizens wishes by still allowing SUPs but added that the campaign promise of "no growth" was not ideal.

Vice Mayor Harris said that he would like to correct that statement as it had been referenced several times. He explained that not one of the new members had stated that they were for "no growth."

Vice Chair Smith said that she thought the campaign had been for more "controlled growth."

Mr. Bryan stated that the impression had been given, as he had gathered from citizens and different writings, that they were in favor of "no growth." He reiterated that they should review each specific application and note what the developer or applicant is asking for, and then use that to make the separation of whether to approve or deny. He explained the process of an application, including review done by the Planning Department and communication given to the applicant of what would be required to make it fit within the parameters of what was needed in order to have it reviewed by the Planning Commission. He reported that when the application came to the Planning Commission for review, they considered it based on its merits and not with a political lens. He said that after those two reviews, hopefully they were forwarding a product that would benefit the Town. Mr. Bryan stated that the Council should trust that they were giving them a product based on merit and that it should not be redone over and over again. He said that the Commission was often asked if they had considered certain aspects of applications, and often those aspects had not only been considered, but were of little consequence to what the benefit of a development would be to the Town. He added that proffers that applicants included often weighed on the decision whether an application was approved or denied, and reported that Mallory Pointe had proffered many things to the Town. Mr. Bryan added that Mr. Carollo's application deserved credit due to the street improvements that had been made, as well as the design adjustments that

had been made. He questioned whether those considerations were being given to the application. He related that he had voted against approval for zero lot lines because he was concerned about the additional density that it would provide; however, he said that he understood the other side of that argument. He explained that with sprawl, when infrastructure was spread out it became more costly, and it became a problem for the Town's finances. He recognized that in order to prevent sprawl, but still address the need to have more homes and businesses, zero lot lines was a solution. Mr. Bryan cautioned that they needed to address the possibility that someone could demolish a home in the Historic District and then, using zero lot lines, construct five homes in its place. He recommended that they specify that zero lot lines only be used on an existing empty lot, as was the case for Mr. Carollo's application. He referenced a point made by the Town Manager at the meeting held the day prior, noting that another difference between the Grange project and the Cottages was in regard to foot traffic. He said that a merit of the Grange plan was that it could bring foot traffic past the 300 block of Main Street by giving visitors more things to do in Town. Mr. Bryan stated that though he did not agree with everything, the Town Staff had done a good job of explaining the specifics of the ordinances, waivers, and SUPs. He advised that SUPs and waivers should be considered to applications individually. He explained that there were limits set by the ordinance, and then an SUP could allow a small amount of flexibility within those limits.

Dr. Pope stated that he would like to discuss the subject of consistency of coming into code compliance in the Entrance Corridor Overlay (ECO) districts. He recognized that there was a monetary limit in place that 50% of improvements prompted the requirement to come into full code compliance in the ECOs, but the enforcement felt haphazard. He related that 50% of a house value, land value, or total value was very generous and he questioned that it was a good guideline to use. He observed that on South Church Street near the Supreme gas station many of the homes were dated in appearance, and when someone took the structures over it gave him stress thinking about how to address that they needed to bring the buildings into compliance. He related that he did not want to discourage small businesses but acknowledged that they did have an obligation to adhere to the Town's ordinances.

Chairwoman Hillegass stated that the topic of the ECO was the next topic, and she would like to conclude the SUP discussion first. She stated that she would like for all the Board members to keep an open mind when considering SUPs. She recommended that they approach it with the mindset of showing why they were necessary and also how they would benefit the entire Town, as discussed by Vice Mayor Harris. She said that by further examining the reasoning, they would likely be able to come closer to consensus.

Mayor Smith said that he felt that the Town Manager had explained the history of the subject well, and related how many organizations had shaped what was contained in the ordinance currently. He agreed that they needed to be able to come to common ground on the subject to give Town Staff a clear direction to move towards. He clarified that he had spoken to Mr. Napolitano prior to his ever-having planned Mallory Pointe at the request of the developer's team and they had told him "Mike, tell him what you want him to do, and he will do it." He continued that the Town needed to consider that just because a developer was asking for something, did not mean they had to grant it. He reported that Mr. Napolitano had kept his word and had done things that the Town had not even asked him to do. He repeated that if they told the developers what to do,

they would try to work with the Town. He acknowledged that the Planning Commission members took a lot of heat from the public, and even more heat from the Council, and related that he wanted to work together.

Renovations to properties and compliance

Chairwoman Hillegass reviewed that there had been discussions had on the subject of compliance enforcement, namely the Red Point Taphouse topic, and she had very mixed feelings on the subject. She also questioned where the tipping point was for enforcement. She summarized that the owners had said that they would come into compliance when they opened, and now the issue had been pushed further and further down the line. She related that they did not want to see a small business not make it due to the huge expense incurred in order to come into compliance.

Mayor Smith said that he thought that the Town may not have been clear enough about the consequences of their agreement to connect to Town water. He said that sometimes he views it as a Town failure to give full information.

Councilwoman Bebermeyer stated that in the case of Red Point Taphouse, she thought that the initial process was not handled appropriately by both the Town Staff at the time and the owners. She reported that she had been in favor of granting the applicants the requested SUP, noting that the building on the property was historic and just like other historic structures in Town it may not meet current code requirements. She related that she wanted the building to remain historic and that they did not want historic buildings torn down, and therefore they should receive an SUP that upholds the historic nature of the Town. She acknowledged that she did not know the ages of the other homes on Church Street in that area, and didn't know if there was an age cut off for that consideration. Councilwoman Bebermeyer recognized that the owners completed renovations to the building, but she thought that the total did not seem to meet the threshold. She said that it was a good business that had been a boon to that neighborhood.

Dr. Pope asked to offer a different perspective as a business owner in Smithfield. He related that he had taken a huge risk in coming to Smithfield with his business, but he understood that there were risks involved. He stated that the owners of Red Point were tasked with defining their own risk, and it was not up to the Town to do the research for them. He continued that the owners had to come up with their business plan and figure out what they needed to do. Dr. Pope reported that during the process through the years, the Planning Commission had granted the applicant's multiple SUPs and waivers, including after-the-fact waivers and SUPS, to keep them in compliance. He reiterated that the applicants knew what they needed to do up front, accepted the responsibility, and now were asking not to comply with what they agreed upon. He noted that the ECO guidelines required that when buildings were not in full code compliance they have to be brought up to full code. Dr. Pope stated that putting a waterline underground would not destroy the historic nature of the building. He said that he wished that the Director of Planning at that time, Mr. Settle, had required that the connection be made prior to their opening their business because it would not be an issue currently if he had. He raised the question again of how hard they push to enforce businesses along the corridor into full code compliance. He acknowledged that the connection may not enhance their business, but they had agreed to foot the expense for any future businesses that came after them on the property.

Councilwoman Bebermeyer asked Dr. Pope if he would agree that when a historic building was involved it was different. She compared Red Point to the historic structures downtown that were not necessarily up to current code. She stated that she felt that they needed to give other historic buildings the same consideration.

Dr. Pope pointed out that the building was not in the Historic District.

Councilwoman Bebermeyer said that it was a historic building.

Dr. Pope stated that the building was not serviced by a waterline and was unique from historic buildings downtown. He said that if there was a historic building downtown that was not connected to the Town's water and wanted to complete a significant improvement then yes, they should have to put a water line in. He related that in the Historic District there would be work done in order to remove lead piping, and there would have to be compliance with that work as it was federal law. Dr. Pope reported that all buildings should be in compliance with water, sewer, electric, and any other item the Town required, to include compliance with the ECO guidelines. He questioned at what point would they make the owners institute those updates. He pointed out that the difference in the situation with Red Point was that they had agreed ahead of time.

Councilwoman Butler recalled that the Town did attempt to offer the owners of Red Point assistance. She explained that the owners had received a quote of \$70,000 to complete the work, and Mrs. Clary had checked with a vendor contracted through the Town who then agreed to complete the required work for \$30,000.

Councilwoman Bebermeyer said that the owners were also told that they could hook up to the Veterinary Hospital next door, but that didn't work out.

There were several speakers commenting at once.

Vice Chair Smith and Mr. Davidson said that never happened.

Councilwoman Butler said that the Town never agreed that option, and such an agreement was between Red Point and the Vet's office, if it had ever occurred.

The Town Manager stated that set-up was never an option because such a hook up was not viable for the needs of Red Point.

Mayor Smith pointed out that there were six other homes on the same well as Red Point and asked what would be done with those.

Dr. Pope stated that as long as those homes remained residential then nothing would need to be done with them. He related that as long as they were residential, they were grandfathered in, but as soon as one of those properties converted to commercial then they would be required to come into compliance.

Mayor Smith confirmed that if someone bought one of those homes, they would still receive free water.

Vice Chair Smith reiterated that was correct as long as they were a resident.

Dr. Pope gave the hypothetical scenario of a law practice moving into one of the homes on the well, and stated that they would then need to connect to Town water as it was a commercial use of the building. He added the same was true for Airbnb's that went over their by-right amount of 104 rental days.

Mayor Smith asked if the homes were monitored by the Hampton Roads Sanitation District (HRSD).

Dr. Pope stated that they were not, but per report from Red Point they paid a nominal fee that HRSD and the Town had agreed upon in regard to sewage.

Vice Chair Smith stated that a meter had just been installed.

The Town Manager reported that HRSD had a minimum rate, and in this case, they required Red Point to install a meter as they were a commercial establishment.

Vice Chair Smith noted that the issue had been unchecked for a while prior. She related that she had been a patron of Red Point Taphouse, and she certainly wanted them to remain in business. She continued that there were three experienced businessmen who owned the property, and they had closed it down to make all the renovations. She presumed that they had a business plan for all the contingencies that they needed to take care of; however, this requirement got by them. She said that once they were reminded they needed to complete the work, the owners agreed and requested a two-year extension to have it done, which the Town agreed to. She continued that once two years had passed, they said that they could not afford the work. Vice Chair Smith questioned at what point they would recognize that Red Point was just not going to comply.

Councilwoman Bebermeyer countered with the question of at what point should the property have not just been grandfathered in.

Vice Chair Smith stated that grandfathering the property was not an option.

Mr. Davidson and Mr. Bryan both expressed that the property was commercial.

Councilwoman Bebermeyer reported that the building had always been used commercially, listing previous businesses at the site as a beauty salon and dog grooming. She stated that the current owners had only been at the property for five years.

Mr. Davidson reported that the owners knew what they were getting into.

Councilwoman Bebermeyer asked what the sudden “change of heart” from the Town was.

Mr. Davidson said that there was no “change of heart.”

Mrs. Clary clarified that the promise to connect to Town water was part of the rezoning of the property.

Dr. Pope reiterated that Red Point’s situation was unique because they had not been connected to Town water. He stated that he assumed that a lot of the homes on Church Street were connected to Town water and that would not be an issue, but he still questioned how and when the Town would enforce code compliance. He related that he was in the midst of a renovation at his own business listing some of the expenses that were necessary as part of that work, including a \$3,000 traffic study, and he had not even broken ground yet. He compared what was required for his 900 square foot renovation to what Mr. Luter must be paying for conceptual plans, surveys, etc. for the Grange. He stated that there was real money involved in these matters, and he did not care if someone was a multi-million-dollar developer or a small businessperson like he was, but that these things needed to be considered and their impact on all businesses. He stated that they needed to consider what was fair, and it was easy to enforce for new builds. He advised that they needed to apply common sense to what they required.

Councilwoman Bebermeyer said that she was in agreement, and there should not be onerous costs or regulations on businesses, especially small businesses.

The Town Attorney reported that some of the requirements were not driven by the Town but by entities such as Stormwater Management which was mandated by State and Federal guidelines.

Vice Mayor Harris asked how the Town could fix some of the issues mentioned because collectively they were committed to making life easier for small businesses.

The Town Attorney stated that they could sit down together and see what rules and regulations could be shifted.

Vice Mayor Harris reported that there were many things that needed to be done in the Town of Smithfield for businesses as well as individuals. He suggested that Town Staff review if they needed to set up committees or come back together for a joint meeting.

Mrs. Clary related that Town Staff attempts to work with small businesses so that they did not need to incur extra expenses such as allowing the use of hand drawings, etc.; however, it was difficult as they needed to be clear on technical details such as setback measurements. She added that the building permit phase through Isle of Wight County often required that more technical, engineered work be done, where the Town did not necessarily require that same level of expense.

Vice Mayor Harris asked if there was any wiggle room in things like the filing costs.

The Town Attorney stated that the Town's filing fees were not nearly the bulk of the costs they were discussing.

The Town Manager related that there was a balance between all of the requirements discussed. He noted that the ECO guidelines were in place to keep the entrances into the Town looking presentable and beautiful, which cost more money. He said that they needed to ask themselves what they wanted the entrance corridors to look like versus the expense to the applicants. He further explained that anything that the Town wanted to additionally control would cost the business owners more money because of the additional requirements. He related that when the Town requested that applicants return five or six times with updated plans, it cost the applicants money each time. The Town Manager reiterated that they had to find a balance between Town control and applicant expense.

Vice Mayor Harris asked how they could become better informed in order to make better decisions. He additionally asked if the subject should be discussed at their retreat or in another work session.

The Town Manager recognized that there were three members of the Town Council who had only been on the Board for two months. He explained that it would take the members around two years to fully understand the nuances of the ordinances. He related that there was much discussion that historic buildings should not be allowed to be torn down, but the Town's Historic Guidelines already did not allow historic buildings to be demolished. He said that it was up to the Councilmembers as to how far they wanted to go one direction or the other.

Vice Mayor Harris said that he spoke for all the new Council members when he said that all of the members of the Town Staff had been extremely cooperative and supportive in answering their questions. He said that as a citizen who was now on the Town Council there was a lack of consistent enforcement of the ordinances and questioned how they get back to that.

Dr. Pope stated that he felt that question did not deal with a lack of consistency as much as they had to think about what they were going to do as the properties that were residential on Church

Street converted to commercial. He observed that more rooftops was what spurred more commercial development. He clarified that he did not think that they were intentionally not consistent, but he did feel that it would be an issue in the future. He questioned if they should require commercial businesses present their conceptual changes to property to the Planning Commission prior to the Town requiring them to do site plans and traffic studies.

The Town Attorney reported that South Church Street presented a difficult problem because when it was annexed there was a mix of different types of properties. He stated that as a result the Planning Commission had created the zoning that was present in the area now, Residential Office District. He added that the zoning only applied to that section of South Church Street. He continued that the Town had recognized that specific area was going to evolve, and they had to make it reasonably affordable for people to convert properties to commercial. The Town Attorney related that the process had been designed to encourage the transition of the area, but now they needed to consider whether they were at a point where they would need to take a harder line.

Dr. Pope noted that Church Street was planned to change and become a three-lane road with a bike path. He said that when that major change happens, the commercial side of the area would change with it as projected in the Comprehensive Plan. He recognized that it was not necessarily a problem that they would solve during the current session, but it was something that they needed to closely consider. Dr. Pope stated that when looking at the proffers that came with developments, they were tied to occupancy permits and reported that the Town was not in control of occupancy permits but Isle of Wight County was. He continued that the Town was in control of zoning permits and as such he felt that the proffers should be tied to zoning and not occupancy. He explained that they were asking the County to enforce something that the Town had agreed to, and that was too much of a disconnect. Dr. Pope reported that he would also like to request that developers be more specific in the proffers because he believed that what developers showed in their conceptual plans was what they should build. He said that the proffers were a legal statement, and the Planning Commission should not be passing them on, hoping that they get fixed after-the-fact.

The Town Attorney related that the Town had learned a lesson in that type of situation with Cypress Creek as that had never happened before. He summarized that there were details in the conceptual plan that hadn't been as specific elsewhere that had created a large back and forth between the developer and the Homeowner's Association, which had since been resolved. He stated that as a result, if a developer proffered a Recreation Area, then they would need to specify number of trees, etc. in writing.

Councilwoman Butler asked who would be monitoring that process if it was detailed in writing.

The Town Attorney stated that it would be monitored by the Planning Director and her department.

Councilwoman Bebermeyer asked if that requirement could be applied to developments in process, such as Mallory Pointe, or would it only be enforced moving forward.

The Town Attorney noted that it had not become an issue with Mallory Pointe.

Councilwoman Bebermeyer acknowledged that was true and said that she was just using them as an example of a development in process.

The Town Manager reported that the discussion held internally included that when the Planning Commission reviewed a final site plan, they would also be given a copy of the conceptual plan to allow for comparison.

Dr. Pope stated that he did not think that any developer should give a conceptual plan if they were not going to build to those specifications as it was misleading to the Town.

The Town Manager agreed. He added that he questioned the amount of detail they would require and used the example of the question of whether the shape of a pool in a conceptual plan should be that exact shape in the site plan.

Vice Mayor Harris said that his interpretation of the points that Dr. Pope had made was that they needed to change the Town's ordinances.

The Town Manager related that Dr. Pope was recommending the use of zoning permits instead of occupancy permits in enforcement of the proffers agreed to. He explained that the process of holding an occupancy permit became very messy as ultimately it meant that someone bought a house but could not move in.

The Town Attorney reported that the reason that the process had always been tied to occupancy permits was because State law tied the payment of cash proffers to the issuance of a certificate of occupancy. He summarized that the proffer payment could not be collected until the certificate of occupancy was issued. He continued that there could be prompts for improvements in their process so that they could not be tied to certificates of occupancy but would be tied to zoning permits.

Mrs. Clary reported that Town Staff would prefer, especially in the case of phased development, to tie them to site plan approval of an additional phase. She continued that it would be easier for Town Staff to just say at the commencement of one phase they would have to have one step completed before moving forward with additional phases.

Vice Mayor Harris confirmed that it would all be in writing as well.

Dr. Pope stated that the process made the Town look bad to buyers because they would hold an occupancy permit not allowing them to move into the house they had bought because the builder had not done what they were supposed to do.

The Town Attorney recommended that the new Council members pay special attention at their next workshop on the issue as it was a complicated issue.

Dr. Pope recognized that the future road planning in the area near Gumwood Drive was really a Virginia Department of Transportation (VDOT) issue, but he would like to see the Church Street intersection moved to the property that they owned next to the fire station. He expressed concern with the planned spacing and recommended that the intersection at Gumwood be moved to Josephine's Crossing behind the CVS. He requested that the Council consider recommending to VDOT that a road be placed between Gumwood and Canterbury that would allow that area access to stoplights to alleviate some traffic issues when that area becomes more developed.

The Town Attorney observed that Cypress Creek had been rezoned in 1987 which was done prior to the Chesapeake Bay Act being adopted. He calculated that it had been 38 years, and Cypress Creek was still not finished. He stated that much of their discussion of development was

for the long term and was not immediate. He also reported that the Town had initiated the annexation of the Scott Farm, as it made sense to have it join the Town.

Mayor Smith thanked the members of the Planning Commission for meeting with the Town Council members, and expressed that he hoped that they would continue to work together to make Smithfield a better community.

The meeting adjourned at 8:49 pm.

Michael Smith - Mayor

Description	Type	Upload Date
Summary Minutes from Town Council on April 1st, 2025	Minutes	5/2/2025

The Smithfield Town Council held its regular meeting on Tuesday, April 1st, 2025. The meeting was called to order at 6:30 p.m.

Members present:

Michael Smith – Mayor
Bill Harris – Vice Mayor
Valerie Butler
Jeff Brooks
Steven G. Bowman
Mary Ellen Bebermeyer
Darren Cutler

Staff present:

Michael Stallings – Town Manager
William H. Riddick, III – Town Attorney
Lesley King – Town Clerk
Tammie Clary – Community Development & Planning Director
Ed Heide – Director of Public Works
Judy Winslow – Director of Tourism
Laura Ross – Treasurer
Alonzo Howell – Chief, Smithfield Police Department
Chris Meier – Deputy Chief, Smithfield Police Department
Ashley Rogers – Director of Human Resources
Amy Novak – Director of Parks and Recreation
Dr. Thomas Pope – Board Member, Planning Commission
Charles Bryan – Board Member, Planning Commission
Leigh Abbott-Leaman – Board Member, Board of Historic and Architectural Review (BHAR)

Press:

Stephen Faleski – “The Smithfield Times”

Citizens: 18

Mayor Smith welcomed all attendees to the meeting and asked all present to stand for the Pledge of Allegiance.

Manager’s Report:

The Town Manager reported that the previous month’s activity and summary reports were contained in the information packet provided and he would answer any questions the Town Council had.

Presentations:

Public Comments:

Robert Small reported that he had come to speak regarding the blighted property, and would comment when the subject was reached in the agenda.

Eric Leaman of 111 Thomas Street in Smithfield reported that he wanted to speak about the subject of growth. He stated that the novelist William Burrows had written “When you stop growing, you start dying” and emphasized that there was no such thing as staying the same. He applied that saying to the subject of small towns and quoted Edward McMahon, an authority on sustainable development, land conservation, and Urban Design, as saying “Growth is inevitable and desirable, but the destruction of community character is not. The question is not whether your part of the world is going to change, the question is how it is going to change.” He continued that small towns across America, like Smithfield, faced a delicate balance between welcoming new and returning residents and businesses while preserving their character, resources, and infrastructure. Mr. Leaman reported that those who adopted a “no growth” stance were condemning their towns to eventual and assured decline. He stated that it was essential that the leadership and citizenship of Smithfield recognize that striking the proper balance between population growth and business development and no growth was critical to preserving the Town’s charm, sustainability, and its future prosperity. He related that he was stating what he felt should be obvious to everybody because he wanted to ensure that the current Council wasn’t more “no growth” than “proper growth.” Mr. Leaman recalled that during the last election, four candidates framed their campaigns on a shared platform of reigning in growth, stating that they were opposed to high-density projects in order to preserve Smithfield’s small-town character. He reported that statement had presented a negative and narrow perspective to himself and many others. He continued that many citizens would have preferred to hear from candidates, and also the current leadership, was a forward-thinking approach. He said that an example of that type of approach was supporting well-planned housing and new businesses that aligned with Smithfield’s smalltown character while meeting the needs of the growing community. Mr. Leaman reported that the Smithfield Town Council had both the opportunity and the obligation to shape the Town’s future in a way that balances preservation with progress through sensible growth. He added that was the only way to enhance Smithfield’s economic opportunities, infrastructure, and quality of life while also maintaining its historical charm, cultural identity, and sense of community. He said that constantly opposing any growth was naïve, and fostered a mindset of resistance to change that discouraged innovation and civic engagement. He noted that they should remember that good can always be better, and the Town could always be better. Mr. Leaman pointed out that like all towns, Smithfield relied on new and old businesses, infrastructure projects, and residential development to create jobs and generate tax income and investment. He observed that the Town risked economic stagnation if every proposal faced negativity and resistance, with new residents and businesses sometimes made to feel unwelcome. He stated that without responsible growth Smithfield’s revenue streams would shrink, which could lead to higher taxes on residents in order to maintain services. He added that the rejection of proposals also resulted in missed opportunities to improve the quality of life for everyone. Mr. Leaman reported that, like many small towns, Smithfield struggled with the lack of affordable housing, and blocking growth initiatives exasperated housing shortages across all income levels. He speculated that businesses and investors could move their plans elsewhere if the Town developed a reputation for being hostile to sound financial growth

and development. He concluded that that growth was not something to be feared but welcomed and shaped with care and vision with community input.

Leigh Abbott-Leaman of 111 Thomas Street in Smithfield recapped that at the March 4th Town Council meeting there had been a text amendment that was proposed, and Vice Mayor Harris had mentioned that he felt an obligation to make sure that the Historic District stayed as it was. She continued that it was clear that he had been conflicted during the discussion, adding that she was unsure if it had been due to the idea of setting precedent or because the developer was Smithfield citizen, Mr. Carollo. She additionally recalled that Councilman Cutler had reported that the citizens were very knowledgeable and understood zoning ordinances and the decisions that followed. She stated that was 100% correct, and was why she was speaking to the Council. She stated that they had asked that the Council members not besmirch the citizen's intelligence, acknowledging that she respected his comment; however, part of the problem was that they were besmirching the way that neighborhood currently existed. She observed that several of the Council members had actually chosen to move into that neighborhood. Mrs. Abbott-Leaman reported that the conversation had made it clear how disconnected some people's understanding of what Smithfield's downtown was in regard to density. She stated that during that meeting while speaking on Mr. Carollo's behalf, Mr. Hopke had reported that the five unit per acre maximum made it impossible to replicated existing historic residential fabric, character, and scale. She stated that he was 100% correct as five units per acre was artificially low when applied to Smithfield. She continued that Town Staff would have been the best source to provide those accurate details; however, she did not want to contact them after they were chastised in a public forum for their proactive research. Mrs. Abbott-Leaman reviewed that Vice Mayor Harris had asked if research had been done on Grace, Clay, or James Streets as a representation of what the citizen's wanted to see replicated. She reported that she had completed her own research online and in-person, and though she had done lower estimates to be on the safe side, she thought five units per acre was not representative of the Town that they lived in but was an idealized version. She gave the example of the density of South Church Street from the park up to the Gwaltney House of having nine units per acre. She added that the long-established streets off of Cedar Road also had densities between nine and eleven units per acre. She related that she was not including Cedar Road Apartments in that calculation. Mrs. Abbott-Leaman continued that when they moved across Main Street to Cary and Grace Streets the density was over nine units per acre. She related that if they considered the blocks at the site of the proposed development at Washington Street there were stretches that had five or six units per acre, but there were also areas with ten units per acre. She added that there was nearly ten units per acre on Riverview. She reviewed the question raised of whether two-story duplexes belonged in the Historic District. She said that the question was surprising because she lived two doors down from a two-unit home, and there were several along South Church Street. She asked if they truly did not fit in or did they fit in so well that they went unnoticed. Mrs. Abbott-Leaman reported that the Board of Historic and Architectural Review (BHAR) had updated the Historic District guidelines and they did not only preserve a colonial charm on the widest and greenest lots as the Town was so much more than that. She noted that the guidelines managed improvement outcomes for an area beginning with the Colonial era and covering ten different architectural eras spanning nearly 300 years. She stated that as it stood, the restriction of five units

per acre constituted “down-zoning,” which had dangerous consequences. She stated that down-zoning created a massive incentive to low-density builders to maximize their returns by development of larger homes. She related that the effects of that included widening the already large housing gap, contributing more school and traffic growth, and also diminish the current homes by reducing their property values. Mrs. Abbott-Leaman stated that it was time to think beyond the five per acre limit. She asked that the Council members not change the Historic District with their efforts to preserve it. She related that the Smithfield Historic District was not like the Cypress Creek neighborhood or the waterfront lots in Goose Hill. She said that everyone was very concerned with downtown looking like the Bridgeport community in Suffolk, when in a way that argument fostered incentive for construction of affluent, cookie-cutter homes bursting on their lots like Chesapeake. She related that the Council was elected to preserve Smithfield, not to actively reshape and empower its gentrification. She asked them to please maintain the district and its density as it stood currently.

Mayor Smith reported that next to speak was Bob Livengood.

Councilman Bowman related that he had spoken to Mr. Livengood earlier in the day and he was also present to speak about the blighted property. He said that it was up to the Mayor whether he should speak in the public comments or during the public hearing about the property.

Mayor Smith stated that Mr. Livengood could speak during the public comments, and he would like to speak later that would also be fine.

Mr. Livengood reported that he lived next to the blighted property at 1504 McGruder in Smithfield. He stated that it had been over five months since the house at 1502 had burned, and nothing had been touched at the property since the day of the fire. He said that he had called the Town of Smithfield and spoke with Josphe Reisch after having not seen any work completed at the site for two or three months. He passed out pictures he had taken of what the property looked like to the Council. He continued that after speaking with Mr. Reisch at the County he had been directed that he should call Mark Drumhiller with Isle of Wight County. He said that Mr. Drumhiller had told him that he had nothing to do with the issue and he attempted to contact Town Staff. Mr. Livengood reported that he had called the Town Manager on three occasions and left voicemails but did not receive a call back until the day of the Council meeting. He added that Mr. Reisch had also come to the property on the day of the Council meeting. He said that he had been trying to contact the Town regarding the issue for over a month and half to no avail. He observed that it was not just that the house had been burned, but there were other issues over the last ten years since the house had not been lived in. He reported that there was a swimming pool in the backyard that was filled with water but had no fence that the neighborhood kids visited in addition to their looking at the burned out house. He stated that it was a hazard and had been for the past five months. He related that they were trying to be good neighbors, but five months was too long for condition that the property was in. Mr. Livengood reported that he was a marine contractor, and when he had moved in they cleared the brush by the water with a power rake. He said that Mr. Reisch had written him up, and he had to replant \$2600 worth of plants back into the Resource Protection Area (RPA) line. He stated that his title was in codes and compliance, but he had told him that he couldn't do anything about the house. He suggested that maybe there were cuts in Town to make.

Judy Eure, vendor with the Smithfield Farmer's Market, stated that she had been present in December of 2024 to speak to the Council about the proposal to have a new home for the Farmer's Market. She stated that she was still in support of giving the Farmer's Market a permanent home. She recalled that when she previously spoke, she had mentioned that there was only a year-to-year lease on the market using the Bank of Southern Virginia's (BSV) parking lot and they didn't know what the future had held for that. Mrs. Eure stated little did she know that the lease would then be lost so quickly. She said that they were now faced with the situation where they were on their last year at that location, and needed to find a new site for the market. She reported that she served on the Board for the Farmer's Market and had for a number of years, with their recently having start the brainstorming of locations where the market could move to. She noted that the market would need a new site starting in April of 2026. She said that they had come up with about ten ideas for spots the market could possibly go, and every single one of them was a worse location than their very challenging location at the BSV. Mrs. Eure reported that she was even more concerned now not only with finding a permanent location for the market, but where they would go in the meantime. She said that her fear was that they would end up in a parking lot with a couple of port-a-potties. She observed that the Farmer's Market had been in existence for twenty years with her being a participating vendor for thirteen, and it had been very successful by creating a lot of revenue Town while also bringing a lot of visitors in. She reported that the market ran at very low cost to the Town as it had been designed to be self-sustaining through membership and sponsorships. Mrs. Eure reiterated her fear that it would all fizzle away because the market would be homeless if a solution was not found. She encouraged that Council to give a good amount of consideration to the proposed project at the end of Main Street that would provide a home for the Farmer's Market. She reasoned that a permanent home would offer them the flexibility to offer more goods at more times without their having to worry about their lease getting terminated. Mrs. Eure asked for the Council's assistance in the process of trying to locate a site they could use for next year where they could continue to do as well and not have a worse location than their current spot. She announced that Saturday, April 5th, was the Farmer's Market opening day 9 am to 12 pm and invited all of the meeting's attendees to come see them there.

Carrie Robertson of Suffolk reported that she was the owner of Peanut City Candle Company and was present to speak in support of the Grange project. She stated that she had participated as a vendor at the Farmer's Market for the past five years, and she owed a vast majority of her business's success to the Town of Smithfield and the Smithfield Farmer's Market. She said that she would always claim that the Peanut City Candle Company would not exist if was not for the Farmer's Market. She related her experience of having participated in several other fine farmer's markets and events during her five years in business, and concluded that what the Town of Smithfield had was very special. Mrs. Robertson reported that there were no other small towns within a 50-mile radius that she could think of that possessed the charm, the cleanliness, and reputation that Smithfield had. She complimented the Town for having small businesses along Main Street that were staples of their community, having existed for long periods of time with little turn-around. She observed that their success was due to two things: the correct support from the Town government and its citizens. Mrs. Robertson said that Downtown Suffolk would do itself service to take notes from Smithfield. She asked the Council members if they were aware that the

Smithfield Farmer's Market was voted into the top 101 Farmer's Markets in North America. She said that might not seem like a very exciting number to people; however, it should be considered that was when Smithfield Farmer's Market was compared to 8400 other markets. Mrs. Robertson reported that in 2026 the market would lose its lease for its current location that had served it best. She said that as an active member on the Advisory Board she could tell them two things: they were actively looking for a suitable location that would be convenient to the market's patrons and allow the vendors to continue their symbiotic relationship with the downtown businesses, and that none of the identified options were at all ideal. She observed that failure of the local government and its citizens to secure a permanent home for the Farmer's Market would mean its death. She noted that in today's world people were wired to consume convenience, but the market showed that if people were given a way to engage in their community and engage in a way that recalls a simpler time. Mrs. Robertson said that the decision to provide a permanent home for the Farmer's Market will help keep the community together. She reported that farmer's markets stimulated the local economy, supported minority and woman-owned businesses, supported communities from a nutritional and mental health standpoint, and they helped preserve rural livelihoods and farmland

Council Comments:

There were no Council Comments.

Consent Agenda:

C1. Resolution to Appropriate Funds from Historic Smithfield into the General Funds Operating Budget for Proposed Scope of Work for Grace Street Streetscape

C2. Invoices Over \$20,000 Requiring Council Authorization:

- | | |
|-----------------------------|-------------|
| a. Lewis Construction of VA | \$23,000.00 |
| b. Tri-State Utilities | \$32,954.00 |

*Received since Finance Committee

Councilman Bowman made a motion to approve the consent agenda as presented. Councilman Cutler seconded the motion.

Mayor Smith called for the vote. Seven members were on call for the vote. Councilwoman Butler voted aye, Councilwoman Bebermeyer voted aye, Councilman Brooks voted aye, Councilman Cutler voted aye, Councilman Bowman voted aye, Vice Mayor Harris voted aye, and Mayor Smith voted aye. The motion passed unanimously.

Action Section:

PUBLIC HEARING: 803 South Church Street - Water Connection

Tammie Clary, Community Development and Planning Director, reported that as part of the applicants' Special Use permit, Comprehensive Plan Amendment, and Official Zoning Map Amendment applications, on April 10th, 2020, the applicants provided a phasing plan that

indicated they would connect to Town water by 6/1/2022 and install driveway improvements by 6/1/2022. She continued that the applicants then received additional Entrance Corridor Overlay (ECO) approvals and Special Use Permits (SUPs) in 2021, that were conditionally approved under the following conditions: (a) The pavement of the parking lot with asphalt by June of 2022, in accordance with your approved phasing plan. (b) Connecting to the public water system by June of 2022, in accordance with your approved phasing plan.

Mrs. Clary stated that at the Tuesday, October 2nd, 2024, Town Council meeting, a SUP for a waiver of parking and loading requirements was granted to the applicants, allowing a gravel parking and drive area, provided they return with an SUP request for a private structure connected to a private well. She said that at the February 11th meeting, the Planning Commission unfavorably recommended this application to Town Council, with two dissenting votes. She reported that Town Staff recommended Town Council deny the application for the private well connection, as it is in conflict with our current Town Code and current Design Standards. She summarized that the applicants had received multiple SUPs and approvals contingent on them connecting to Town water.

Mayor Smith reported that the matter was subject to a public hearing and opened the floor to public comment. He asked if there was anyone who wished to speak for or against the application.

The applicants, Tim Ryan of 11220 Shelter Cove in Smithfield and Nick Hess of 223 South Church Street in Smithfield, were present to speak on the matter.

Mr. Ryan summarized that they were requesting relief from their commitment to connect to Town water as was included in the zoning application dated December 2nd, 2019. He stated that the reason for the request was when they had applied in 2019 they had been told by the Town Planner at the time, John Settle, that in order to be compliant with Town guidelines they would need to connect to Town water and pave the parking lot. He acknowledged that they had included it in the zoning application as a phase plan as Mrs. Clary had noted. He continued that they had since found out that they did not need to connect to Town water in order to be compliant with Code, and also when they had agreed to the terms they did not know the expense involved. He said at the time there had seemed to be other options, for example connecting to the Animal Hospital next door's water line. Mr. Ryan added that the Town had reported that they were going to extend a bike path in front of the business, which would have caused the Town to purchase part of their property in order to do so and they thought it would offset the cost. He added that they had also learned that the cost to complete the connection would be over \$30,000, and that connection did nothing to enhance his business in any way. He calculated that cost would have 40% of their profits in 2023 and all of their profits last year due to the bridge closure.

Mr. Hess reported that when they first started their business they had thought that water connection would be somewhere in the range of \$5,000 to \$6,000 but not \$30,000. He recognized that they had agreed to complete the action, and had since sold the business, but they still owned the building and were still involved in the brewing. He stated that they were invested in the continuing success of Redpoint and bringing tax revenue to the Town. He related how difficult the restaurant business was and the many hours they devoted to it. He calculated that a \$30,000

connection cost would not keep the business running with the small profit margin for their size restaurant.

Mayor Smith asked if there were any other members of the public who wished to speak. Hearing and seeing none, he closed the hearing.

Councilwoman Bebermeyer stated that she had reviewed their information from their start in 2019, and noted that in April 2020 when they opened the business, the pandemic had just begun. She said that she felt it was courageous and innovative for them to open a business at that time when so many businesses were closing. She reported that she felt that it was important for the Town Council to support small businesses, especially considering the larger events of the last five years. She speculated that neither the applicants nor the Town knew the expense of the water connection when the business started, and she thought that it was fitting for the Council to continue to support them, especially with the consideration of pandemic issues and the bridge closure.

Councilman Bowman recalled that last time the applicant's had been present before the Council they had indicated that the cost to connect to the Town's water would cause them to go out of business. He recapped that since that time the applicants had sold that business, and the issue of the bridge closure has no impact on their business because it was not theirs anymore. He explained that Mr. Ryan had been very direct with the Council when he stated that their requiring the connection would kill their business, and asked if that statement was correct

Mr. Ryan verified he was correct.

Councilman Bowman repeated that they had since sold the business.

Mr. Ryan reported that they had sold it, but there were two different companies with owning the restaurant business and the other owning the property.

Councilman Bowman reported that the first document that Mr. Hess and Mr. Derek Joyner had provided included that once rezoning was completed they "would like to add an outdoor patio by 09/01/2020." He continued that the next statement read "we will hook up to the Town of Smithfield water by 06/01/2022," and the last statement reported that they "would like to add our lot improvements by 06/01." He asked them to clarify why they used the wording "would like" in certain scenarios and "we will" in others. He stated that it sounded as if they had reasonable certainty all the way back in 2022.

Mr. Hess confirmed that Councilman Bowman had read from their words on the application. He reported that he could show emails that were written during that time between themselves and John Settle. He stated that every time he would send something to Mr. Settle, he would reply that they needed to word it how he recommended. He said that all of the wording in the applications got changed back and forth several times. He reported that he had the email trail for all of the correspondence.

Councilman Bowman said that he wished he had seen it because he had asked for the entire package today. He continued that he wanted to address the cost, and recapped that Councilwoman Bebermeyer indicated that they had no way of knowing what the cost for water connection would be. He reported that he had a hard time understanding that astute businessmen went into a business proposition without having some idea of cost. He asked if it was true that the cost was estimated to be around \$60,000 or \$70,000 and then the Town came to their assistance to find a way to reduce the cost to \$30,000.

Mr. Hess reported that the Town's price was to bring the water across the street, which did not include the meter or getting the water to the building. He said that in the beginning of the process a gentleman from public works came to the site numerous times and said that they could connect to the Animal Hospital, not knowing that the right answer.

Councilman Bowman asked who the public works employee was.

Mr. Hess said that he could not remember the gentleman's name. He related that as he did not have experience with public works, they thought it was perfect.

Mr. Ryan stated that they had known what the Town of Smithfield had paid for other parcels of land to accommodate the bike path and thought the cost to purchase the land in front of their building would offset the cost to them.

Councilman Bowman reported that he had been a patron at Redpoint Taphouse and enjoyed the food and hospitality. He stated that his concern was with consistency and the precedent that would be involved. He related that their duty was to impartially discharge their duties as members of the Council. He added that everyone wanted to do the right thing, but it called them to question when dealing with regulations.

Mayor Smith thanked Mr. Ryan and Mr. Hess.

Mr. Hess asked to add a point. He stated that the building had been used commercially since 1929, with Town water not being brought to the area until 1969. He stated that the property was annexed in 1966 with seven buildings, six homes and the commercial building, remaining on the well. He explained that the structure had never been residential, but had always been a commercial business. He noted that they had to complete the rezoning application because the business had closed for 30 consecutive days, which was something he felt needed to be changed. Mr. Hess acknowledged that they had taken a gamble in the situation and stated that they would connect, but asked that they apply logic and save a small business. He pointed out that all of the homes in that area had water supply, and it worked.

Councilman Bowman asked the Mayor to be able to follow up on the statement. He asked Mrs. Clary if it was true that if they had not closed for the 30 days that they would not have had to apply for rezoning.

Mrs. Clary reported that the property had been zoned as Residential Office, and eating establishments were not a permitted use in the Residential Office Zoning District. She said that it needed to be rezoned to the Highway Retail Commercial (HRC) District.

Councilman Bowman asked Mrs. Clary to confirm that the fact it was changed to a restaurant was the rationale behind the rezoning and not that it had been closed for 30 days due to Covid.

Mrs. Clary confirmed that was correct.

Councilman Bowman related that he had been in the area since 1982 and had gotten his haircut at the property, noting that it had also been a Poodle Parlor. He said that he had seen everything else there, but did not recall seeing a restaurant.

Mrs. Clary said that his statement was correct and reiterated that in order to have an eating establishment at the site there would need to be rezoning from Residential Office to Highway Retail Commercial.

Mr. Ryan repeated that they had been told that they had to have a connection to Town water in order to be compliant with Tow Code 8245 per what Mrs. Clary had said. He stated that the fact was that 8245 did not say that had to hook to Town water, but quoted it as saying “where public water supply is available in the Town it shall be unlawful to connect a residential or commercial structure to a private well.” He said that when they reviewed the code it says that it was unlawful to connect to a private well, where their property had been connected to the same private well since before Town water had been made available to them and they were not asking for a waiver or variance for connection. Mr. Ryan said that what they were guilty of was saying yes to the requirement to connect to Town water based on the belief from the Town Planner at the time had given them that they had to in order to be compliant with the Town code. He noted that there should not be a moral question of whether they would set a precedent and have to do it again as they were actually in compliance currently.

Councilwoman Butler asked the Town Attorney if he could give legal interpretation of the matter.

The Town Attorney explained that the property had come into Town as a result of annexation and it was on a private well. He noted that the discussion about who extended water into that area, well the Town never pays for water but the developer for those surrounding neighborhoods do. He reported that the structures on the well were lawfully grandfathered, and there were instances where the Town did not make people connect. He observed that in this case the water had not been extended across the street. The Town Attorney reported that impetus for the action was the rezoning as Mrs. Clary had explained, and eating establishments were not permitted in Residential Office zoning. He summarized that the applicants had stated that they would connect to Town water, and the Town had standards that had to be adhered to for that process. He said that the Town Staff had taken the applicants at their word that they would connect, and that they would complete the action in a certain way. He added that when it said that the connection into the water main would be a 2-inch connection, that meant that it would be reduced down to what was an equivalent to a residential water line with the tap fee for connection charged for that size. The Town Attorney continued that the Town was not asking the six residential homes to connect because water had not been extended to that area.

Councilwoman Butler stated that she understood his point, but questioned whether they had been grandfathered in when the property was still zoned at Residential Office.

The Town Attorney clarified that the use was not grandfathered as it was not being used as a restaurant, though it was being used commercially. He repeated that the applicants request to use the property as an eating establishment was what had prompted the requirement to change the zoning designation. He reported that the Residential Office zoning had been established twenty years earlier so that there would be a transitional zoning option, notably in that area. He explained that as mandated by the Town Council and Planning Commission, as these structures were updated from residential to commercial they were required to come up to code, hence Redpoint’s need to connect to Town Water and have their lot paved.

Councilman Bowman gave the hypothetical example of the owners deciding to demolish the building since it had been zoned Highway Retail Commercial. He asked if the next owner wanted to put a restaurant at the site would they have to complete the rezoning process.

The Town Attorney stated that they would not, clarifying that zoning followed the property not the owner.

Councilman Bowman stated he understood, but questioned what would happen in regard to the water connection.

The Town Attorney related that the water issue was unresolved because the current zoning required them to connect, and the SUP they were requesting was for the ability to not to have to connect. He reviewed that the paving requirement had gone through the same process, however, the applicant's had been given approval for relief from the paving requirement.

The Town Manager reported that the Town's current Design Standards required commercial structures to have a two-inch connection.

The Town Attorney added that requirement was for new buildings.

The Town Manager acknowledged that was correct and also a two-inch connection was required if the renovation threshold was reached.

Councilman Brooks reported that this was the one instance where he was in support of the use of an SUP. He stated that he believed that the applicants had to commit to completing the requirements with a gun to their head. He continued that they likely thought that the work would be a couple thousand dollars, as the building had been in existence for many years and had already been connected to a well. He said that he felt that it was the Town's responsibility to bring water to a building that had been there that long. He speculated that if the water was on their side of the street, they would have no problem connecting to it, but the situation required that they have the water run under the road for them to have access.

Mr. Hess reported that they had since metered the water at Redpoint, and he paid the same amount as the guy across the street who was on the Town's water and sewer. He affirmed that he paid for every gallon that came in and out of the property.

Vice Mayor Harris asked for clarification of the timeline of events from the applicants. He stated that in the original application they had agreed to connect. He continued that then two years later they had submitted an SUP application so that they did not have to pay, and at that time they again agreed to connect to the Town water supply.

Mr. Hess clarified that the two issues had initially started on the same timeline. He recapped that the original application for the business they agreed to paving and connecting the water, then in June of 2022 they had applied for relief from the paving requirement which was granted.

Vice Mayor Harris reported that he was fine with the driveway, but asked for verification that at that time they had again made the pledge.

Mr. Hess acknowledged that the issue had extended into the last 3 years.

Vice Mayor Harris said that as he was understanding the situation, the applicants were saying that they were in compliance because of the new ordinance that did not take effect until after their previous agreements to connect.

Mr. Ryan reported that he did not know what the ordinance was prior to that. He said his point was that the current ordinance was dated November of 2024 and it said that they were in compliance. He repeated that the ordinance said that it was unlawful to connect to a private well, where they had already been connected to a private well and were not asking to be able to connect.

He stated that they had been told that they had to connect to Town water and that had been bad information.

The Town Attorney related that he would not enter an argument, but the applicant could not misstate the law and what was said was not correct. He explained that the applicant was not compliant, but was grandfathered and there was a difference between the two classifications. He clarified that there was a non-conforming use of the property that did not meet the Town's current zoning standards, but they had not required him to meet compliance. He reported that the applicants had voluntarily agreed to the terms as part of their application.

The Town Manager reiterated that the current Design Standards required commercial structures to have a two-inch connection so that was not in compliance.

Vice Mayor Harris said that was where he was heading with his line of questions.

The Town Manager agreed that they did not want to enter into argument with the applicants but it had not been a valid statement.

Vice Mayor Harris confirmed that the Planning Commission and Town Staff were recommending denial of the application.

The Town Manager repeated that the recommendation was based on the issue that the property was not in compliance with current Design Standards.

Councilwoman Bebermeyer said that the information was new to her. She recalled that when the applicants first got their permits they had made the following proffers: improve and maintain the driveway easement accessing the rear panel, facilitate and volunteer use of the property to local charitable organizations, and lastly repurpose and revitalize the historic building or structure. She said that she was in agreement with Councilman Brooks that it was an appropriate use of an SUP.

Councilman Brooks made a motion to approve the SUP to waive water connection to the Town. Councilwoman Bebermeyer seconded the motion.

Mayor Smith called for the vote. Seven members were on call for the vote. Vice Mayor Harris voted nay, Councilman Brooks voted aye, Councilwoman Bebermeyer voted aye, Councilman Bowman voted nay, Councilwoman Butler voted nay, Councilman Cutler voted aye, and Mayor Smith voted nay. The motion was denied by a vote of 3/4.

Councilwoman Butler asked to address comments made during the discussion. She reported that she took offense to the statement made by Councilman Brooks that the applicants had made their decision with "a gun to his head." She reported that the Town's Staff were highly qualified people and she didn't want to think of any of them acting in that way. She added that maybe there had been a misunderstanding at the time, but she did not like that description being used for that process.

Councilman Brooks apologized and stated the phrase had been used several months ago in regard to the situation. He reiterated that he had heard it described that way, and that the applicants had felt pressured.

Vice Mayor Harris thanked Councilwoman Butler for her statement as he was going to say the exact same thing. He observed that the Public Works Department did a tremendous job consistently, and they were very supportive of many aspects of the process that had occurred, particularly with the other SUPs. He related that he did not know why they had been told that the

bike path would follow that route as it was always going to come down Lumar Road. He reiterated his thanks to Councilwoman Butler and to the Public Works department.

PUBLIC HEARING: 313 Grace Street - BHAR Appeal

Mrs. Clary reported that the applicant was appealing the Board of Historic & Architectural Review's (BHAR) February 18th, 2025, decision to deny the application for the installation of twenty-one (21) rooftop mounted solar panels on the single-family dwelling at 313 Grace Street. She explained that the BHAR believed the solar panels were not in conformance with the Historic District Guidelines, while the applicant believed she met the criteria outlined for solar panel installation as included in the 2025 Historic District Design Guidelines. Mrs. Clary reported that the applicant filed an application appealing the BHAR's decision. She said that according to the appeals process, the application was then forwarded to Town Council for their review and decision.

Mayor Smith reported that the matter was subject to a public hearing and opened the floor to public comment. He asked if there was anyone who wished to speak for or against the application.

Kelly Payne of 313 Garce Street in Smithfield reported that she was the applicant in question. She reported that the home was built in 1909, and as such the house had been built using true 2 x 4's as was true to that era. She reported that as they had remodeled over the years many people could attest to the solidity of the home. She said that she had begun the process in 2024 when she had been notified that the Historic District Guidelines had been updated with an emphasis on solar installations, and she returned with an application in January 2025. She acknowledged that she had not reviewed the updated guidelines, but had reviewed BHAR minutes from a previous meeting that included an application for solar panel installation in the Historic District. She stated that application had been denied by the BHAR in December 2024. Mrs. Payne read from the minutes of that meeting that a board member had noted that the previous applicant's placement was prominent on the front of their home, and if it was planned for placement anywhere else he would have been all for it. She said that at that point the only requirement she knew was that the panels could not be forward facing. She reported that the company, Ion Solar, was present and would discuss the issue further. She expressed regret that she did not request a large display for the information but pointed out that it was available in the agenda packet. Mrs. Payne held up a picture of 313 Grace Street and noted that there were metal shingles on the home. She added that the porch roof had standing seam roofing and was the only front-facing roof, but she was not asking for placement at that location. She stated that she was requesting for the panels to be placed on the rear-facing roof of the home. She pointed out the aerial photo of the home in the packet appeared to show the house as having a light grey roof, when in reality it was black and the solar panels were also black. Mrs. Payne pointed out that her home was three-stories high and was a very tall building adding that the thought that the panels would be very visible was not correct. She asked to bring up the representatives from Ion Solar.

Tom Dettloff, Director for Virginia at Ion Solar, explained that the panels were fastened to the roof and were wind-rated to withstand up to 155 mph, which met the Dominion Energy requirement. He continued that the panels did not create leaks on roofs, there was a significant roof penetration warranty, and they implemented structural engineering on 90 % of every install in

Virginia. He read from a report completed a Professional Engineer, Luke Rowley, in regard to the home, and noted that “it was there recommendation that the existing roof framing is adequate to safely and sufficiently support custom design loads and weight of the new solar system as is, alteration or replacement of existing structural elements is not required.” He related the number of solar installations their company completed in the State, and offered to answer additional questions.

Mr. Payne noted that wind came from the direction of the Pagan River down Grace Street, and added that she had previously experienced a tree falling on her roof during Hurricane Isabel. She explained the process that they went through during the repair of her home from that damage, and especially the strength of the replacement wood which had made her roof incredibly strong. She stated that she did not know when the first Historic District Guidelines were put in place, but she knew that that most current revision was made in 2025. She pointed out that there had been guidelines addressing the use of solar energy in the Historic District for quite a few years. Mrs. Payne directed the Council members to page 76 of the Historic District guidelines and read “should be located on the side or rear of a building where they are less visible from the right-of-way.” She said that she was requesting to put the panels on the side and rear of the house. She read from page 98 “should be installed in such a manner that their visual impact is minimized from the right-of-way...the side and rear of a building’s roof is often the most appropriate setting for solar panels.” She observed that when driving up Grace Street when traveling away from Main Street several of the Town Council member’s roofs were partially visible, but hers was not visible. She related that the side of the home that she wanted to install the solar panels was blocked from view by a magnolia tree until driving past it. She noted that the visibility of that side was only present for a very short period when driving down the street. Mrs. Payne displayed another portion of the Historic District guidelines that listed things to avoid and read “avoid installing solar panels in locations that are visible from the street or public rights-of-way such as the primary façade of a building.” She stated that with the way that statement read, she was unsure why they would have solar guidelines included at all because she could not think of a house in Smithfield where a solar panel could not be seen from somewhere. She reiterated that she was not requesting to have placement on the front of the house. She continued reading from the guidelines “avoid removing historic features of a building or site when installing solar panels.” She explained that they would not be removing anything from the structure. She read “avoid installing solar panels in a manner that obstructs the view of historic architectural features of a building or site” and reported that there would not be any obstructions associated with the installation, adding that they were not erecting any ground-mounted arrays. She continued that another item to avoid was “installing solar panels on primary Landmark buildings,” adding that her house was not classified as a Landmark Building. Mrs. Payne moved on to the best practices for solar panels and outlined that they should be mounted less than or equal to 6 inches above the surface of the, should be set at angles consistent with the slope of the supporting roof, should be hidden behind existing architectural elements such as dormers and cross gables, should be arranged in an organized configuration that blended in with respect to the color of the panels etc., any support structures or hardware should be installed on the rear of the building or areas with limited visibility from the public right-of-way, should be removed in a way to allow them to be easily removed without causing permanent damage or

alteration. She reported adherence with all of the best practices as being in her plan. She outlined that with the type of metal roof she had, the panels would not have to be taken down in order to replace the roof. Mrs. Payne noted that the top paragraph stated that though solar panels were a modern invention, they may be installed on historic buildings under certain circumstances. She asked the Council if they had any questions regarding the product or proposal.

Councilman Bowman asked for confirmation that the magnolia tree in question did not have any negative effect on the ability of the panels to collect energy.

Mrs. Payne reported that the tree did not shade the roof.

The Town Manager suggested that the public hearing be closed before they got into further questions that they might have.

Mayor Smith stated that if there were no other comments from the public he would close the public hearing.

Mrs. Payne added that she would like to speak further.

The Town Attorney advised that they should ask if there were any other members of the public who wished to speak.

The Town Manager stated that Mrs. Payne could finish her presentation.

Mrs. Payne stated that she saw nothing in the guidelines that the project she was proposing violated; however, there had been no rooftop solar projects that had been approved by the Board, which would mean that they were setting precedence. She acknowledged she had no idea how many other applications there had been for solar installations prior to hers, except for the one that had been denied due to proposing front-facing panels. She questioned that if there was no intent to approve a project that met the requirements in the guidelines, then why were they developed, then revised, and then approved. Mrs. Payne reported that she had been hesitant to follow through with the appeal process because she felt that it seemed that the guidelines had been developed with the intent to never allowing approval for use. She asked why she would go through the appeals process if they were written with no intent of allowing success. She related that she had called the Town and asked if anyone had ever appealed a Board decision and had it reversed, to which she had been told “yes.” She pointed out that they would not be setting precedence to overturn the decision, adding that she did not know any specific information about that successful appeal. Mrs. Payne reported that Smithfield’s approved guidelines on solar were based on the guidelines for Arlington, Virginia and their guidelines had been approved in 2015. She recalled that there seemed to be concern shown by the Board members that approving her project would open the floodgates for people installing solar panels. She stated that she had researched what happened in Arlington as a result, and reported that only five projects had been approved in the last 10 years. She speculated that if it didn’t open the floodgates in Arlington, then it would not do so in Smithfield either.

Mayor Smith asked if there were any other members of the public who wished to speak regarding the matter. Hearing and seeing none, he closed the public hearing.

Councilman Cutler asked the Town Manager if there was information from the meeting provided by BHAR to support their denial.

The Town Attorney explained that he had been present at the meeting in question. He noted that prior to the application by Mrs. Payne, there had been a previous application that had been denied as that house had a very different roofline and the applicant had proposed placing the panels

on the roof facing the street. He stated that the application had been made prior to the guidelines approval by the BHAR and Town Council. He recalled that Mrs. Payne had agreed that since the new guidelines had not been adopted at the February meeting that the application would be continued for a month. He noted that they could refer back to the minutes, but the basis for the denial was that the panels would be seen from the street, adding that there had been a split vote by the Board members.

The Town Manager reported that Mrs. Clary did have a copy of the minutes from the meeting.

Mrs. Clary reported that the BHAR's concern was that something would be seen from the street and the Board was willing to not follow their own guidelines as written. She continued that there was concern expressed about the amount of panels, and that the Board had acknowledged that if they were willing to allow panels in the Historic District that the applicant had done everything that they had asked in order to minimize the panels appearance. She noted that there had been consideration given to the placement and trying to hide the panels as much as was feasible. Mrs. Clary reported that there were mixed feelings expressed by members of the Board on the matter. She stated that there had been the recommendation to consult with a structural engineer as there was worry about the way the house was framed and the possibility of it the panels causing the roof to sink.

The Town Manager observed that the vote had been tied, which had resulted in its failure.

Councilman Brooks reported that he lived diagonally from Mrs. Payne of Grace Street. He pointed out that the front-side of her roof was extremely visible from the street, and there were 13 panels proposed for that location. He reviewed the amount of time that the Board and Council had taken in its consideration of the updated guidelines, and he felt that the application was glaringly not in accordance with what they had put forth. He clarified that he was not opposed to the application solely because he was a neighbor, but that in looking to the future when that street became a thoroughfare once the Grange was developed and the bridge was reopened. He reiterated that it would be very glaring, and he could unfortunately not think of a worse place to put the panels.

Vice Mayor Harris stated that he could not argue with the science behind the action, but he was in agreement with Councilman Brooks that the side for the proposed placement of panels was extremely visible on the street. He noted that they would possibly not be seen by someone passing in car, but as Grace Street was one of the Town's most walked streets by visitors. He stated that as a Historian Preservationist he thought it was incredibly important to maintain the historical integrity of the Downtown Historic District. He continued that the National Trust for Historic Preservation had written an article in combination with two or three solar companies with their recommendations mirroring the recommendation in the guidelines that solar panels should be installed in a location not visible from the ground or the public right-of-way. Vice Mayor Harris stated that as visitors were walking up and down Grace Street the panels would be staring them in the face. He pointed out that the magnolia tree discussed earlier could get sick and come down at any time in the future. He expressed that one of the responsibilities of the council was to protect the Town's historical setting and its cultural climate. He noted that the Town had already lost some

significant historical structures, and adding visible solar panels in the district would dilute its historical nature further.

Councilwoman Bebermeyer asked staff for confirmation between the classifications for Landmark and Contributing properties, specifically if it was based on age.

Mrs. Clary read from the Smithfield Zoning Ordinance: “Structures from the 18th century to pre-Civil War, or structures with architectural significance from the period after the Civil War shall be considered as Landmark or Landmark Structures.” And “Properties which contribute to the historic character of the Town but which do not contain landmarked structures shall be known as Contributing Properties. Properties designated as Non-Contributing are vacant lots or those which feature a primary building with one or more of the following features: less than 50 years of age, alterations to such an extent that it is no longer representative of the period in which it was constructed, degradation to such a poor condition that preservation is difficult, does not have any sort of architectural style and has no architectural merit.”

Councilwoman Bebermeyer stated that even though the house was built in the early 1900’s and was listed as Contributing it was still in the Historic District. She said that her concern was also with the statement that “solar panels should not be visible from the ground or the public right-of-way.” She agreed with the statement made by Vice Mayor Harris that while walking on the sidewalk the panels would be visible. She said that it was unrealistic to think that if someone was only looking at the front of the house the panels would not be visible. She observed that one of the pictures of the house taken from the side showing the roof where placement would be was actually taken from the sidewalk and would clearly be visible.

Mayor Smith asked if there was any additional Council questions, and notified the audience that they could not speak further.

Councilwoman Butler asked Mrs. Clary if the guidelines had been written by Town Staff in conjunction with BHAR.

Mrs. Clary reported that during the guideline updating process they provided BHAR with samples of various localities design standards for solar panel usage. She said that what was chosen was the sample that was most representative of what the BHAR wanted to see in Smithfield’s guidelines, and that was what Town Staff asked the consultants to include.

Councilwoman Butler asked for confirmation whether the Smithfield Historic District had solar guidelines prior to the matter they were discussing.

Mrs. Clary reported that what was included was very minimal and had been lumped in with mechanical equipment.

The Town Attorney added that there had been no detail included.

Mayor Smith asked what the will of the Council was on the matter of the appeal.

Councilman Bowman reported that he had considered the testimony given by the Mrs. Payne, adding that she had gone into depth to lay out her case and had done a great job. He observed that the area in question was very unique, and noted that in the diagrams displayed he did not see that the panels would not be very visible. He made a motion that they uphold the BHAR’s decision to deny the installation of solar panels.

The Town Attorney clarified that the decision of the BHAR had been split, and so it had failed, making the Council’s decision a trial de novo, or new trial.

Councilman Bowman made a motion to deny installation of solar panels. Councilwoman Bebermeyer seconded the motion.

Mayor Smith called for the vote. Seven members were on call for the vote. Councilman Brooks voted aye, Councilwoman Bebermeyer voted aye, Councilman Bowman voted aye, Vice Mayor Harris voted aye, Councilman Cutler voted aye, Councilwoman Butler voted nay, and Mayor Smith voted nay. The motion to deny passed by majority vote of 6/1.

PUBLIC HEARING: Text Amendment Article 13 of the Zoning Ordinance

Mrs. Clary reported that the application had been favorably recommended to Town Council by the Planning Commission, and included a proposed text amendment to Article 13 of the Zoning Ordinance to bring the definitions in alignment with the new definitions approved with Article 3.P for the Chesapeake Bay Preservation Overlay.

Mayor Smith opened the public hearing and asked if there was anyone present who wished to speak for or against the matter. Hearing and seeing none, he closed the public hearing.

Councilman Cutler made a motion to approve the text amendment as presented. Vice Mayor Harris seconded the motion.

Mayor Smith called for the vote. Seven members were on call for the vote. Councilman Cutler voted aye, Councilwoman Butler voted aye, Councilman Brooks voted aye, Councilwoman Bebermeyer voted aye, Vice Mayor Harris voted aye, Councilman Bowman voted aye, and Mayor Smith voted nay. The motion passed unanimously.

Blighted Property - 1502 Magruder Road

Mrs. Clary stated that the Town of Smithfield had received a complaint concerning the partially burned down structure located at 1502 Magruder Road, Smithfield VA 23430 (TPIN:21A-28-007). She reported that Town Staff sent a notice on January 29th, 2025 requesting an update on the cleanup and repair of the structure within thirty (30) days, in accordance with Smithfield Town Code (STC) Section 22- 2.b.1, and a plan was provided as requested. She continued that in accordance with Section 22-2.b.2, Town staff requested that Town Council determine that the Plan was acceptable.

The Town Manager directed the Council members to a copy of the letter received that day from the property owner's attorney.

The Town Attorney recapped that at the previous week's committee meeting, the Council had instructed him to contact the attorney for the property owner, Mr. Small, who was present with the property owner. He summarized that the letter received dated February 28th was considered to be the plan received in response to Town Staff's notice, and it stated that they were relying on the insurance company to approve a claim and then remove the property. The Town Attorney related that he had called Mr. Small and advised him that the letter was not the plan that would be accepted by the Town Council, and that the matter was on the Town Council's agenda for discussion. He added that he had additionally discussed that the property was unsecured and that at the very minimum a fence should be erected. He reported that Mr. Small said that he would speak to his client about the matter, and when advised that the plan would not be accepted he had said that he would get back to the Town Attorney on Friday. The Town Attorney reported that he did not hear

back from Mr. Small and that he had called Mr. Small on the day of the Council meeting. He said that Mr. Small was responsive and he immediately sent another letter, but it did not include a timeline for debris removal, but there was a timeline included for the installation of a fence by Rosenbaum Fence Company by April 18th. The Town Attorney stated that it would be the decision of the Town Council whether the plan was acceptable or not.

Mayor Smith asked Mr. Small to come forward.

Mr. Small explained that the homeowners, Lenny and Chrissy Harris, were present at the meeting and reiterated that he was their attorney. He reviewed that the house had burned down when the homeowners were in the process of finishing home renovations and the home was listed for sale. He explained that the owners had left one evening, the fire had started during that night, and it was a total loss, leaving the homeowners devastated. He continued that they then turned the matter over to their homeowner's insurance carrier immediately and have also fully cooperated with the fire department and Virginia State Police. Mr. Small pointed out that fire had occurred at the end of October 2024, and when the homeowners received the letter on January 29th they turned it over to him in order to respond to the Town. He said that the insurance company started making requests for information from the Harris's almost immediately, to which they have cooperated with. He continued that the most recent request from the insurance company's attorney was a letter that asked for approximately 24 separate things that they wanted in preparation for a sworn statement under oath before their attorney, which had now been scheduled for April 14th. He noted that the insurance company was still investigating the Harris's claim, and therefore had they wanted to remove anything from the property they could not do so. Mr. Small reported that the homeowner's insurance would cover somewhere over \$600,000 of the loss, and they were stuck since the insurance company was continuing to demand information. He said that his personal belief was that the matter should have been settled long ago, and the property should have been cleared. He added that if they did not comply with every request from the insurance company, then they would give an excuse for the insurance company to deny the claim. Mr. Small reported that when they received the letter he had called Mrs. Clary to relate that they had thought they were near the end of the process and there was coverage in the policy to cover clearing the property. He said that his response letter had explained that their thought was that the Town knew that there was a plan in place where insurance would cover removal and that explanation was sufficient. He continued that Attorney Riddick had called him and brought up the concern of security of the property. He noted that the Harris's were in a difficult position that they did not want to be in, but when they discussed the use of a fence they had agreed to have one constructed. Mr. Small reported that Rosenbaum Fence Company was well-respected in the area and was aware that time was of the essence. He stated that he was asking the Council to approve the plan that would be to install a security fence, post no trespassing signs, and then allow the insurance claim to be completed before any further destruction of the property. He said that if the Town takes its authority as a blighted property and moves in to destroy the structure before the homeowner's insurance claim was resolved, then they would deny the Harris's the right to recover under their homeowner's insurance policy. He reported that he did not think that was what the determination of a blighted structure was intended to do, and emphasized that the property in question had not been ignored. He pointed out that the total loss was devastating to the homeowners, and carried an emotional toll

as it was the home in which Mr. Harris's parents had lived as well. Mr. Small acknowledged that the structure was not pretty to look at and if he was a neighbor he would want it cleaned up as well, but in that case he would also hope that neighbors understood the issues with the insurance company. He reported that they hoped that the Town Council would approve the current plan to install a 6 foot high security fence that would surround the destroyed part of the property. He added that they would move forward to press the insurance company to resolve the claim and clean the property up. He gave the reminder that it had only been 5 months since the fire, and related that this was the first time in all his years as an attorney that an insurance company gave a homeowner as difficult a time to recover their policy without giving reason. He reiterated that if the Town went forward to remove the blighted property, insurance would not cover them. He assured the Council that the homeowner's were doing everything possible to get the mess cleaned up, they fully understood that it was not pleasant for their neighbors to look at, and they fully understood the concern about security of the property. Mr. Small reported that there had not been security issues that they had been made aware of at the property, and at one time there had been "No Trespassing" signs posted, but without the fence.

Councilman Bowman reported that he was also a neighbor of the property in question. He reviewed that they were asking the Council not to move forward with the blighted property ordinance, but asked if Mr. Small would agree or disagree that if the Council were to take action, he could then forward the information to the insurance company which might prompt them to move along with their process.

Mr. Small reported that he thought that action might have the opposite effect, and that the company may use it to their advantage to decline coverage under the policy.

Councilman Bowman asked if there had been any finding from the investigating entities as to what had occurred that would give the Council pause to think that there may be a remedy to the situation soon.

Mr. Small stated that the fire department reports did not indicate the location of the fire, but the Harris's were told that the location of the fire was presumed to start on the back wall of the living room sometime during the night. He reported that during the fire suppression they had to take down a wall and it was his understanding that the wall impacted the ability to investigate. He noted that he had talked with the Virginia State Police Investigator, and as of then there was, to his knowledge, no information that there was anything untoward about the fire other than it had occurred. He stated that in other words there was no claims that the Harris's were responsible for the fire.

Councilman Bowman questioned when they may get a decision that would move the issue along, and recalled the concerns of Mr. Livengood.

Mr. Small repeated that they were supposed to complete sworn statements with their attorney on April 14th, and though he had not memorized the policy, they had already gone through the step of dealing with the initial adjuster and had given statements to the secondary adjuster. He continued that now they turned the matter over to the attorney and they had provided every bit of evidence requested. He said that it was his hope that after giving their sworn statements, a decision would quickly follow from the insurance company. Mr. Small did not deny that it was a blighted property in the sense that it was a terrible eyesore, but he also understood that the Harris's could

not tear it down until the insurance company was satisfied. He stated that the best way to get the insurance company to move along was to accept the plan he had presented, which included the installation of the fence, and then set the issue out for 90 days.

Councilman Bowman commended the Town Attorney for notifying Mr. Small of what needed to be done and the stop gap measure he had suggested was one step along the way of securing the property. He asked the Town Attorney if the Council declared that it was a blighted property, then would they have 90 days to take action.

The Town Attorney confirmed that number was correct, but suggested that they go into closed session so that they may discuss legal matters further.

Councilman Bowman made a motion to go into closed session to discuss legal matters with counsel. Vice Mayor Harris seconded the motion.

The Town Council went into closed session at 8:45 p.m.

The Town Council returned to open session at 8:56 p.m.

Councilman Bowman made a motion that they reconvene normal session and certify that only discussion of pertinent legal information had been discussed with legal counsel during closed session. Councilman Cutler seconded the motion.

Mayor Smith called for a collective vote. Seven members were on call for the vote, with all members voting aye and none opposed. The motion passed unanimously.

Mayor Smith asked the Town Attorney to advise on how they should proceed.

The Town Attorney said that based on their discussion he would like to recommend that the Town Council adopt the following resolution: the Council would defer action on the pending matter concerning the blighted property at 1502 Magruder Road provided that the owner would agree to the erection of the fence as proposed to include the damaged structure, the debris field, and the swimming pool, and further that the Town shall receive and be copied on correspondence from the owner's legal counsel to the insurance company advising them of the current status of that action pending before the Town Council and the urgent nature attached to it by the Council.

Mr. Small stated that the answer to both of the conditions was yes, and Mr. Harris had made certain of, at his request, that the fence would go completely around the property and include the back deck that was not damaged.

Mayor Smith observed that they had been given a recommendation by the Town Attorney and asked if there was a motion from the Council.

Councilman Bowman made a motion to adopt the recommendation as explained by the Town Attorney and agreed to by the Counsel of the respondent. Councilman Cutler seconded the motion.

Councilman Cutler stated that they needed to ensure that there was actually a plan so that it did not end in a blighted property offence.

The Town Attorney addressed the concern to Mr. Small by notifying him that the concern of Council had been that if they were going to submit a plan that it not simply be that the insurance company would handle the matter, and that they needed to know to the greatest degree possible what the plan was once the claim was approved.

Mr. Small recognized the Council's concern about the timeline involved. He reiterated that it was their hope that once the sworn statement session that was set for April 14th was held they would receive a decision with regard to the insurance coverage not long after. He acknowledged that ultimately if the insurance claim was denied then the homeowner's would have to figure out a way to deal with the blighted property and at least clear it. He said that they appreciated the Council's deference to allow them to at least exhaust the insurance coverage issue. He offered that they would report back to Council within 60 days.

The Town Attorney clarified that the Town Council was deferring action on the issue until May, with the idea that they would be hearing from the insurance company, the fence would be constructed, and they would hear a status report.

Councilman Bowman clarified that they were referencing the Town Council meeting for May which would be held the first Tuesday of the month.

Mr. Small stated that he would be happy to appear at May's meeting and give a status report.

Vice Mayor Harris asked for clarity regarding the second paragraph in the letter. He read "the fire-damaged portion will be surrounded at the above address pending conclusion of the insurance claim." He continued that later in the letter it states that the fence would be erected "on or before no later than April 18th, 2025." He noted that there seemed to be confusion between the two.

Mr. Small stated that they were stating that the fence would be installed no later than April 18th, and Rosenbaum Fence Company knew that it should be done as soon as possible. He clarified that the fence would remain in place until the insurance claim was resolved, as the claim should cover the cost of the debris removal. He stated that they would not remove the fence until the property was cleared. He reported that the contract for the fence had been signed for a year minimum, with it remaining up while the clearing was completed. He said that they would be happy to consult with Mrs. Clary to ensure that the clearing process met with the requirements of the Town.

Mayor Smith confirmed the motion and second. He called for the vote, with seven members on call. Councilman Bowman voted aye, Vice Mayor Harris voted aye, Councilwoman Butler voted aye, Councilman Brooks voted aye, Councilman Cutler voted aye, Councilwoman Bebermeyer voted aye, and Mayor Smith voted nay. The motion passed unanimously.

The Town Attorney addressed Mr. Small and stated that he hoped that he understood that the matter would be on the Town Council agenda for consideration every month until it was resolved.

Mr. Small stated that he fully understood and imparted to the Council that the Harris's were distraught by the whole situation. He promised to be at every Council meeting until the matter was resolved, and in-between to answer any questions that the Town Attorney may have.

Approval of Town Council Summary Minutes from March 4th, 2025

The Town Attorney said that he had reviewed the minutes and there was a correction needed for one speakers name, but otherwise recommended that they be approved.

Councilman Cutler made the motion to approve the summary minutes as revised. Vice Mayor Harris seconded the motion.

Mayor Smith called for the vote. Seven members were on call for the vote. Councilman Cutler voted aye, Vice Mayor Harris voted aye, Councilman Bowman voted aye, Councilwoman Butler voted aye, Councilman Brooks voted aye, Councilwoman Bebermeyer voted aye, and Mayor Smith voted aye. The motion passed unanimously.

New Business:

There was no New Business discussed.

Old Business:

The meeting adjourned at 9:05 pm.

Proposed Budget - FY 2025/2026	Budget Amendment	5/2/2025

Town of Smithfield

Operating Budgets & Capital Improvements Plan

FY 25-26

Town of Smithfield

Memorandum

May 1, 2025

TO: The Honorable Mayor and Town Council

FROM: Michael Stallings, Town Manager *MS*

SUBJECT: FY 25/26 Budget Proposal

Attached you will find my budget proposal for the 2025-2026 Fiscal Year. This budget does not propose any new taxes, and it is balanced without the use of reserves.

REVENUES

Tax Rates

There are no proposed changes to the Real Estate or Personal Property Tax Rates. The Real Estate rate remains at \$0.16 per \$100 in value, and the Personal Property rate remains at \$1.00 per \$100 in value.

There are no proposed increases in any other taxes either.

Other Fees

There are no proposed fee increases contained within this year's budget proposal.

Interest Income

The other noticeable change you will see in this year's budget as compared to last year is the sizable increase in interest income. This is due to the work that our Treasurer is doing with investments. As we have made a significant shift in how we handle our cash reserves, we are realizing an increase in interest income.

EXPENSES

Salary Adjustments

This budget proposal contains a salary increase of 4%. We have made some additional adjustments in public safety to remain competitive with our local market.

New Positions

There are no new positions proposed in this year's budget.

Health Insurance

This is the biggest change to the Town's operating budgets. Our current health insurance carrier proposal came back with a 38% increase in rates (an increase of \$267,914 to the Town and \$66164 to employees). As we normally do, we evaluated all of our options for health coverage. The most favorable option is to join The Local Choice (TLC). TLC is a pool established by the State of Virginia that governmental entities can join. Currently, TLC provides coverage through Anthem, our existing carrier. Going with TLC will still be an increase to both employees and the Town, but a far smaller increase of \$108,326 to the Town and \$38,504 to employees.

Property/Liability Insurance

In previous budgets the cost of property and liability insurance was included in the individual department's budget. This year, I have consolidated the total cost of insurance into one line item in the Non-Departmental portion of our budget. This makes it much easier to see the total cost of our annual insurance policy.

Strategic Planning Initiatives

As Town Council updates it's Strategic Plan, we anticipate that there will be expenses associated with the work plan to put the plan into action. As such, I have allocated \$50,000 in the FY 25-26 to fund the implementation of Town Council's vision. These funds may be used to fund consultants, staff, or other initiatives that Council approves to help move its vision forward.

Water and Sewer Funds

The Town recently had a water and sewer rate study done. The consultants evaluated current rates, current usage, financial position, as well as the current and future needs of both the Water and Sewer systems. The study recommended a water rate of \$8.50 per 1,000 gallons and a sewer rate of \$6.00 per 1,000 gallons. There are no other fee increases in the Water or Sewer Fund.

Adoption Schedule

The FY25-26 budget proposal will be on Town Council's agenda at its May 6th meeting for discussion and any questions that you may have. The Town Council will hold a public hearing on the budget proposal after its May 19th Committee Meetings at 6:30 P.M. Adoption of the budget will be on the June 3rd Town Council meeting agenda.

Please feel free to reach out with any questions or concerns that you may have at any time during this process.

Town Council

Town Council is the legislative and policy making body of the Town government. It is vested with all the authority specified by the State Constitution, applicable State laws, and the Town Charter. Council acts by the adoption of ordinances, resolutions, or motions.

The citizens of the Town of Smithfield elect the seven members of Council in elections that take place every two years in November – the even numbered years. The Mayor is elected by vote of the members of Council. The Mayor and Council serve four-year terms that overlap.

The following is a listing of the Mayor and members of Council:

Michael G. Smith	Mayor
Bill Harris	Vice Mayor
Mary Ellen Bebermeyer	Councilwoman
Jeff Brooks	Councilman
Steven G. Bowman	Councilman
Valerie Butler	Councilwoman
Darren Cutler	Councilman

Town Manager

The Town Manager's Office consists of the Town Manager, Town Clerk, Human Resources Director, Human Resources Administrative Assistant, Safety Officer, Records Management Assistant and Office Aid.

The Town Council appoints the Town Manager, and the Town Manager serves as the Town's chief executive officer. Michael Stallings is the Town Manager. He serves at the pleasure of Town Council. The Town Manager is responsible for implementing the policies established by Town Council and for the general administration of the Town. His duties include, but are not limited to the following:

- Providing Town Council with recommendations on programs, policies, and services for Council's consideration.
- The enforcement of the Town Code and all other ordinances enacted by the Town Council.
- Providing the Town Council and other Town boards and commissions advice and support.
- Attendance and participation in all Town Council meetings.
- To make all contracts on behalf of the Town pursuant to a resolution or an ordinance of the Council.

The Town Council appoints the Town Clerk. Lesley King is the Town Clerk. As the Town Clerk, she is responsible for maintaining the Town's official records and the records retention schedule for all the Town's records according to the Library of Virginia. Specifically, she is responsible for maintaining the records of the Town Council. Her duties include, but are not limited to the following:

- Preparing agendas for monthly Town Council committees and Town Council meetings.
- Attendance at all Town Council meetings to record Council actions.
- Responsible for preparing all meeting minutes of Town Council as well as other Town boards and commissions.
- Maintains the original copies of all ordinances, resolutions, and agreements adopted by Town Council.
- Serves as the Town's FOIA officer.
- Prepares the bi-annual Municipal Mailer to Town residents.

The office also includes a Records Management Assistant and Office Aid who assist the Town Clerk with maintaining records and transcribing meeting minutes.

The Human Resources (HR) Director works directly under the Town Manager. Ashley Rogers is the HR Director. She is responsible for the Town's risk management and safety program, benefits administration, and other HR related functions.

Town Treasurer

The Treasurer is appointed by Town Council and serves under the direction of the Town Manager. Customer service, revenue collection, accounting, accounts payable and cash management are the primary responsibilities of the Treasurer and her staff. Duties include billing and collecting real estate taxes, personal property taxes, business license payments and utility charges as well as financial reporting, account reconciliation, cash investments, payroll processing, annual audit, and department's budget preparation.

Technology upgrades remain a top priority for the department in FY2026. The Treasurer's Department is evaluating software options for tax collection, accounts payable, as well as other functions.

The Treasurer's Department implemented utility billing through Hampton Roads Utility Billing Services in an effort to consolidate utility bills during the 2024-25 fiscal year.

Public Safety

The Smithfield Police Department is one of the largest departments within the Town. It is composed of twenty-seven full-time employees when fully staffed and one part-time employee. Our primary goal is to ensure public safety, maintain law and order, and provide effective and efficient services to our community while being mindful of our fiscal responsibility.

While we are the largest department within the Town the largest portion of our budget is allocated to personnel expenses, including salaries, benefits, and equipment needed to perform our duties. Investing in our officers is essential for maintaining a well-trained, motivated department. Competitive salaries and benefits are crucial in attracting and retaining qualified employees. The Department is organized into three divisions - Administrative, Patrol, and Investigations - collaborating seamlessly to ensure community safety and well-being.

Acknowledging the importance of fostering relationships with citizens to combat crime and improve quality of life, the Department has successfully managed staffing obstacles while upholding exceptional service standards. In 2023, the Department addressed over **20435 service calls**, taking appropriate police actions in each instance. Significant figures include **2627 traffic stops**, **1044 summonses** issued, **1696 warnings administered**, **220 arrests made both felony and misdemeanor**, and over **328 investigations into various criminal offenses**. These numbers presented only reflect a portion of the hours spent while maintaining such a high degree of law enforcement presence to combat criminal activity.

Modern equipment and technology play a vital role in enhancing the department's capabilities of investigating criminal activity. This includes things such as vehicles, body worn cameras, in-car cameras, weapons, software for crime analysis and record keeping just to name a few. It is important to maintain and upgrade the technology used by the department because it enhances officers' awareness, thus improving officer and public safety. All these factors combine to work together to improve decision making to combat criminal activity. This profession is ever changing as changes occur in society therefore the department must continuously train to stay abreast with best practices which

ultimately leads to a safer community.

This narrative reflects our commitment to providing a high level of professionalism as well as police services that prioritize public safety. Our aim is to enhance our effectiveness, while fostering new relationships with the community we serve.

Town of Smithfield Parks & Recreation

Parks and Recreation is a department that has grown quickly over the last several years. The town's parks and properties include the Smithfield Center, Windsor Castle Park, Manor House Events, the Luter Sports Complex, Clontz Park, Hayden's Lane, Main Street Square and scheduling of Special Events. We have 12 employees –8 are full time and 4 are part time.

Opened in 2000, this conference center has been the location for thousands of special occasions –weddings, birthdays, anniversaries, celebrations of life as well as town meetings, senior citizen events and charity fundraisers.

Completed Projects: In FY 25, updated all 3 projectors to new high lumen projectors, renovated the lobby with new tile, updated the Town Council audio system with new audio control board.

Upcoming Projects: In FY 26, we plan to change the lobby paint scheme and fixtures, add lighting to the deck and uplighting around the building, and add equipment for the livestream to continue to make it a top tier production.

Opened in 2020, The Manor House and Grounds offers the interior of the beautifully restored Manor House and outdoor grounds for weddings, anniversaries and formal dinners and the outdoor grounds has been the site for several special events, including 3 large festivals.

Completed Projects: In FY 25, we entered a contract for a professional interior cleaning service which has really lightened the load for our event team (Darlene and Amy).

Upcoming Projects: In FY 26, we plan to add chair rentals for outdoor use for wedding ceremonies and other events.

Opened in 2010, this park has 3 miles of walking trails, a fishing pier, kayak launch and kayak rentals, children's playscape and a dog park, just to mention a few of the amenities. And it is home to the Long Leaf Pine Restoration area and a Living Shoreline.

Completed Projects: In FY 25, the Fishing Pier, Mason Street Bridge Entrance and Ravine Bridge have been completed. The Windsor Castle Foundation has completed work on the park master plan. Next up for the Foundation is to determine their approach to fundraising for all the proposed amenities.

Upcoming Projects: No big projects slated for the upcoming year. Just continuing with maintenance of the park.

Town of Smithfield Parks & Recreation

Opened in fall 2018, this sports facility offers playing fields for all levels of baseball, softball, football and is host to large tournaments. LSC is home to Smithfield Packers Youth Sports (football and cheer programs) and Smithfield Recreation Association (baseball and softball programs).

Completed Projects: In FY 25, the football field concession building, that houses bathrooms, a meeting room and of course delicious concessions was completed in November.

Upcoming Projects: In FY 26, hoping to start the build of the much needed **parks maintenance facility** that will house all maintenance equipment and be the shop for all of our outdoor parks.

Opened in 1994, the Clontz Pier has always been a popular spot for fishing or just enjoying beautiful views of the Pagan River, with the addition of the boat ramp in summer 2019, the park now has added boating access in downtown Smithfield.

Completed Projects: In FY 25, we had to have a portion of the floating dock repaired due to a boat that lost power and collided into the dock.

Upcoming Projects: In FY 26, we hope to have funding to add a put-in pier at the boat ramp to make putting in and taking out boats much easier and safer.

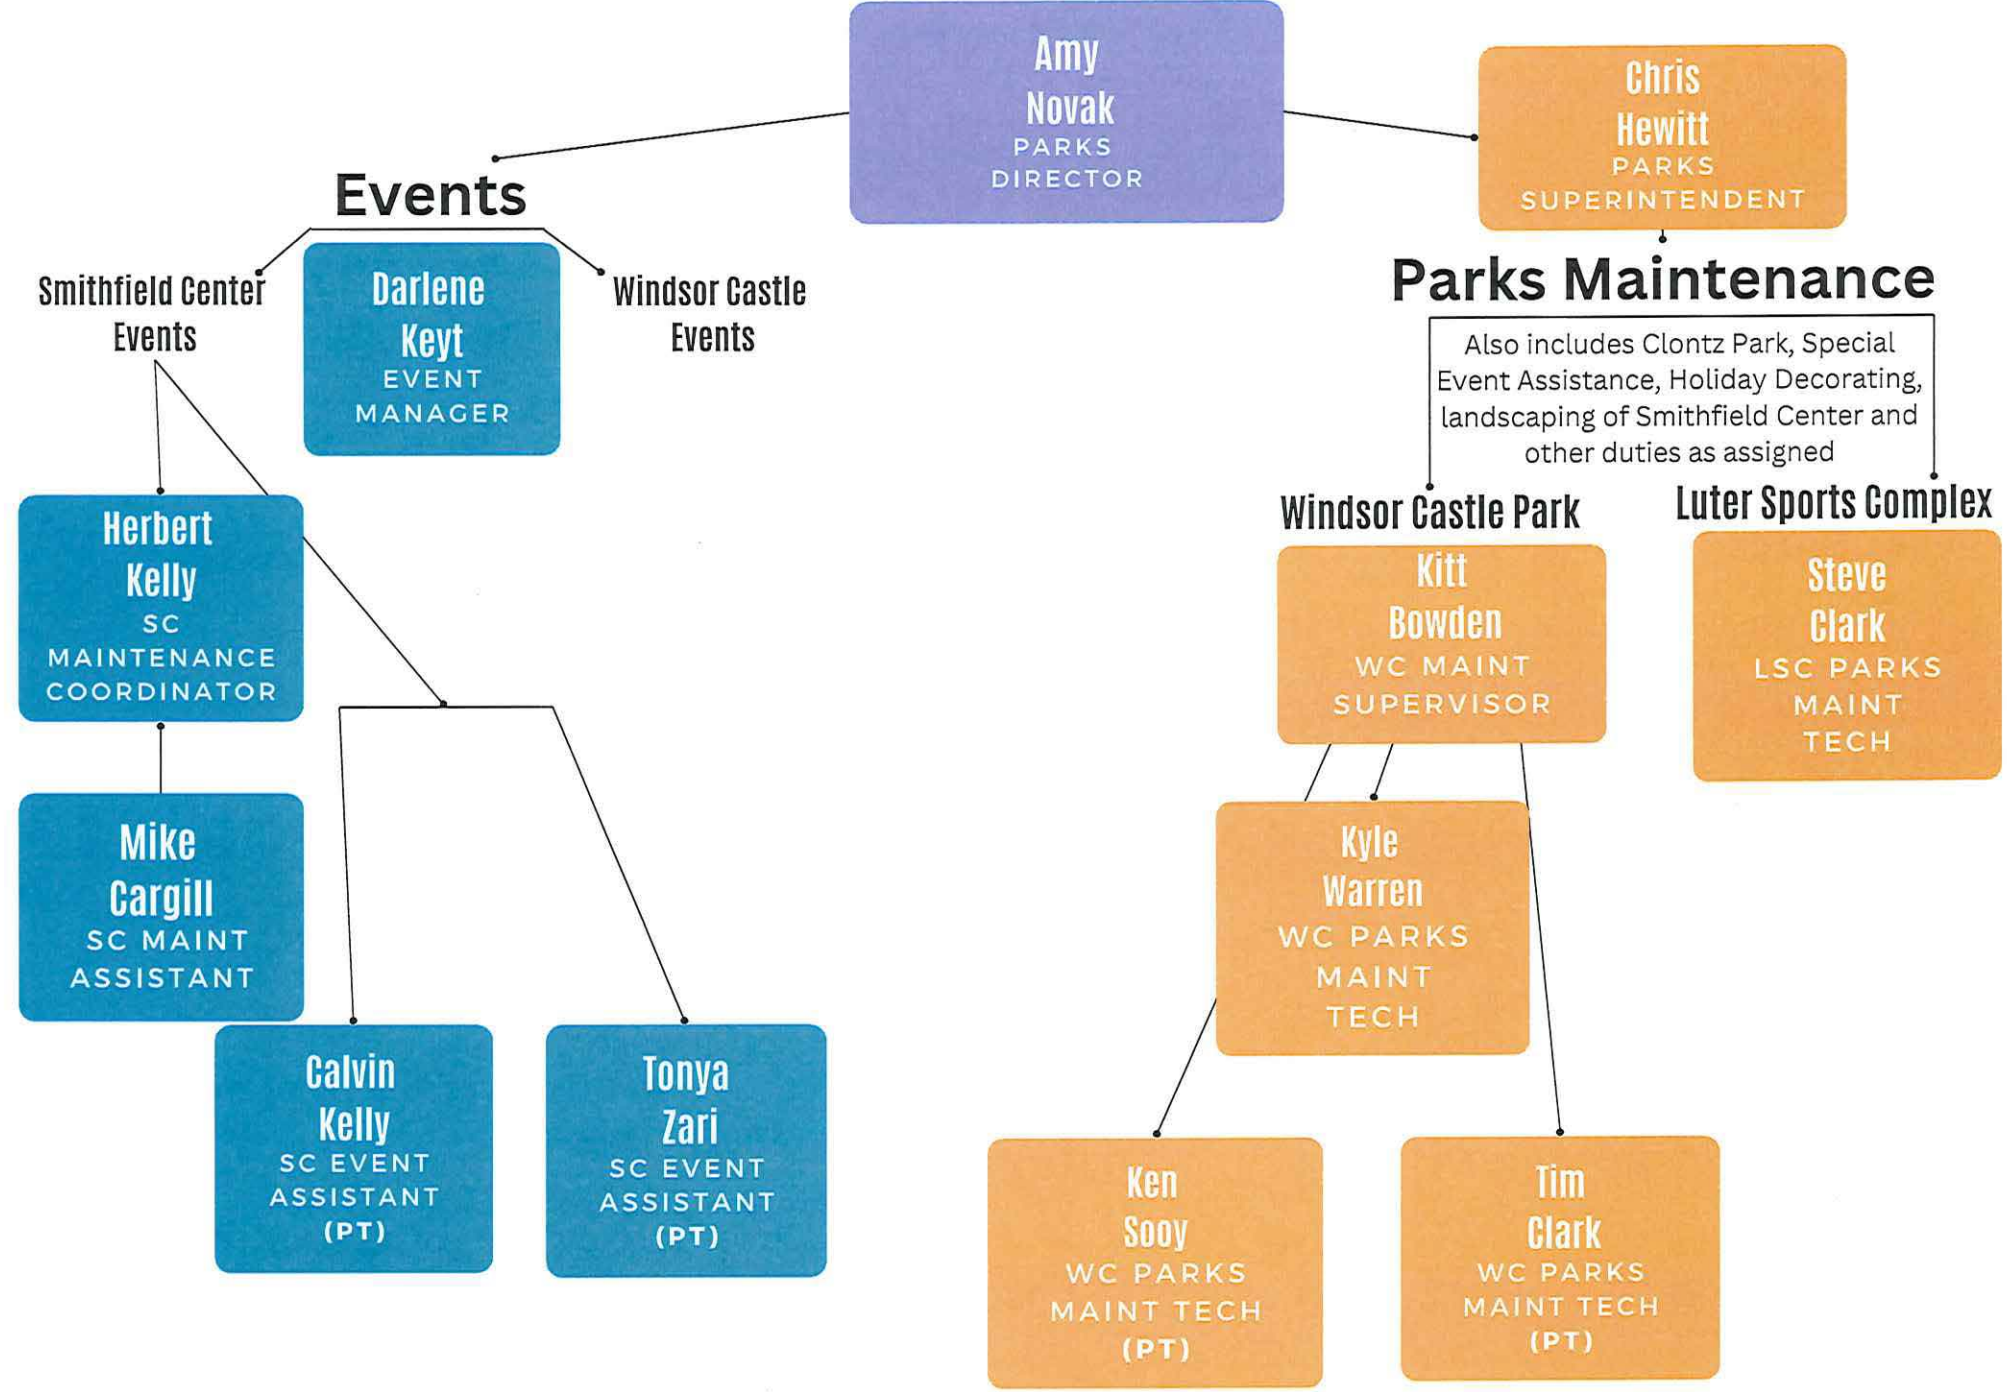

Smithfield is home to over 40 special events each year which includes races, parades, street markets, outdoor festivals, galas and fundraisers. Tourism and other local groups produce the events. Our office manages scheduling of the events and staffing the events with town services, such as police and public works.

Upcoming Budget Request: In FY 26, we hope to purchase road barriers that stops cars from entering closed streets. It is a much needed safety feature during events like the Main Street markets and parades.

SMITHFIELD PARKS AND RECREATION FY 2025

Museum

Overview

- The museum opened in 1976 and is located at 103 Main Street in Smithfield. It is open 7 days a week.
- It currently operates as a hybrid department for both the Town of Smithfield and Isle of Wight County.
 - Staff reports to the Town of the Smithfield.
 - Isle of Wight County maintains ownership of the museum's building and collection. The County has responsibility for the department's HVAC, infrastructure, structural repair and IT functions.
 - Staff has responsibilities to both the Town and the County.
- The Isle of Wight County Museum Foundation, a non-profit organization, supports a number of the museum's initiatives such as storage and new exhibit construction. For the 2024-2025 FY, they donated over \$60,000 for exhibits and special projects.
- Average Annual Stats
 - 8,000 visitors
 - Online, outreach engagement with tens of thousands of groups and individuals
 - 100+ special events, tours and outreach programs
 - 1,700+ volunteer hours

Responsibilities

- **Isle of Wight County Museum.** Oversight and documentation of the collection (20,000+ items) and those tasks pertinent to the museum's daily operation: welcoming and engaging with guests and visitors, exhibit development/improvement, research, signage, publications, video series and conservation.
- **Isle of Wight County Museum Gift Shop.** Stocking and selling of books, apparel, postcards and other merchandise. Tracking of inventory and sales.
- **Promotion, Advertising, Website Development, Social Media Management and Public Relations.**
- **Video Production.** To include our popular series BEHIND THESE WALLS for continued community engagement.
- **Education.** Development of programming for all ages to include lectures, programs, field trips, guided tours, livestreaming events, organizational retreats and online webpages.

- **Outreach.** Development of programming for all ages produced in a mobile format for presentation as field trips, lectures, and guided tours for local schools, civic groups, historical societies, churches, and more.
- **Historic Sites Under Museum Purview.** Interpretation, education, programming, exhibit development, artifact cataloguing and conservation, promotion and further research of these historic sites:
 - Windsor Castle
 - Nike-Carrollton Park
 - Fort Huger
 - Fort Boykin
 - Boykin's Tavern
 - Isle of Wight County Courthouse Complex
- **Town and County Support.** Provide support and assistance to all other Town and County departments. Most notably Town of Smithfield Parks & Recreation, Isle of Wight County Planning & Zoning and Isle of Wight County Parks and Recreation.
- **Community Support.** Provide assistance with or the development of signage, programs, etc. at the request of the community as supportive community partners. Notable recent partnerships include the Blackwater Regional Library, Historic Smithfield, Virginia Commonwealth University, Christopher Newport University, James Madison University, Longwood University, Isle of Wight County Schools, Isle of Wight Academy, VA 250 Commission, Civil War Trails, 1750 Courthouse, Schoolhouse Museum and Virginia Tourism Corporation.
- **Event Hosting.** Hosting of private events including birthday parties, luncheons, reenlistment ceremonies and memorial services as community partners.
- **Community Research and Genealogy.** Support genealogists and other members of the community in their research by providing links, out-of-print books and other resources and assistance.

Staffing

- The museum is open every day and staffed by a full-time director, a full-time curator, a full-time museum assistant and four part-time docents. The Town's custodian cleans the building.

2025-2026 Goals

- Install exhibits at Smithfield Riverside Hospital

- Museum exhibit improvements to include the completion of the exhibits in the Sprigg Wing with a focus on tobacco, colonial settlement, bridges and mills.
- Nike-Ajax missile restoration and exhibition in conjunction with Isle of Wight County Engineering, Public Utilities and Parks & Recreation – based on the Museum’s 2019 Interpretive Plan for the site.
- Develop plans and designs for agriculture and industry exhibits in main gallery including hands-on components.
- Write, design and publish the following books:
 - *ISLE Be Home for the Holidays*
 - *Smithfield Cookbook*
 - *16th Century Isle of Wight: Giles Jones Site*
 - *Nike-Ajax N-75 Site, Carrollton, Virginia*
- Determine timelines for future book projects: Fort Huger, Isle of Wight County Civil War history, Smithfield Peanut and Ham History.
- Finalize British Phone Box interpretation and signage for display on Main Street.

Continuous Goals/Projects

- Organization and improvement of the museum’s collection databases.
- Expand social media campaigns across platforms including video productions in order to expand brand awareness and drive digital interaction.
- Produce regularly scheduled video segments on local history.
- Host special and educational events throughout the year.
- Work with local schools to augment and support curriculum goals.
- Work with Isle of Wight County to assist with signage, interpretation and programming on various projects and sites including Boykin’s Tavern, Isle of Wight County Courthouse Complex, Fort Boykin, Fort Huger and Nike-Carrollton Park.
- Work with Ivy Hill Cemetery on programming, events and interpretation.

- Work with Isle of Wight County Historical Society on programming, events and interpretation of the Historic Clerk's Office.
- Continuous community engagement and educational outreach through many different programming avenues.

Community Development and Planning

Established in 2019, the Community Development & Planning Department is responsible for constant monitoring and enforcement of the Smithfield Zoning Ordinance and Subdivision Ordinance. In addition to implementing the above ordinances, this Department also reviews and decides on all administrative zoning permit applications and waivers, as well as reviews, processes, and produces recommendations to applicable Boards and Commissions on all applications that cannot be decided administratively (the Board of Historic & Architectural Review (BHAR), the Board of Zoning Appeals (BZA), the Planning Commission, and/or the Town Council).

In addition to monitoring and implementing planning, zoning, subdivision, land use, code enforcement, and development-related matters, this Department also administers the Town's localized version of the Chesapeake Bay Preservation Act of 1988, and an erosion and sediment control program for all single-family residential projects. The Community Development & Planning Department works with developers and citizens alike to ensure compliance with applicable zoning ordinances, Town codes, and any other appropriate regulations.

Finally, this Department strives to achieve greatness in developing the Community, throughout Town limits. This year, this Department will update the zoning ordinance to conform with the newly adopted regulations from the General Assembly. This Department is also working on becoming more involved with Transportation Land Use and acquiring potential State/Federal funding.

Public Works

The Public Works and Utilities Department operates utilizing four funds (General Fund, Water Fund, Sewer Fund, and Highway Fund) divided into six budgets (Water, RO Plant, Sewer, Highway, Public Works, and Public Buildings) to operate and maintain the Town's assets and infrastructure. Below please find the budget narrative to accompany the 2025-2026 operating budget for the Public Works portion of the General Fund.

The Town's Public Works and Utilities department uses general funds to fund not only the operation, but also all maintenance and debt service of the system. Staff are responsible for the operation, maintenance, and repair of the Smithfield Lake Dam, 42 Town owned buildings, 63 grounds locations, various parking lots, trash collection, and streetlights across Town limits.

With a staff of 23 full time employees, 20 divide their time between General Fund, Water Fund, Sewer Fund, and Highway Fund operations, while the additional 3 full time employees are primarily dedicated Water Fund operations. As part of the required maintenance, the Town utilizes a staff of 23 full time employees, which are required to divide time amongst various funds accordingly, to ensure the responsible maintenance of all the Town's physical and fixed Public Works related assets. Consequently, the Town's Public Works and Utility employees carefully schedule required work to ensure that General Fund public works activities get accomplished on time while, concurrently, ensuring the safe and efficient operation of the Town's Public Works systems.

Water Fund

The Public Works and Utilities Department operates utilizing four funds (General Fund, Water Fund, Sewer Fund, and Highway Fund) divided into six budgets (Water, RO Plant, Sewer, Highway, Public Works, and Public Buildings) to operate and maintain the Town's assets and infrastructure. Below please find the budget narrative to accompany the 2024-2025 operating budget for the Water Fund. According to fiscal projections, during the 2024-2025 fiscal year, the General Fund will not directly or indirectly subsidize this fund.

The Town of Smithfield operates its water system as an enterprise fund in which the water fund revenues are used to fund not only the operation, but also all maintenance, including the debt service of the system. Staff are responsible for the operation, maintenance, and repair of the Town's reverse osmosis water treatment plant, water storage tanks, emergency wells, and associated 65 miles of underground infrastructure. Furthermore, they are responsible for the reading, repair, and replacement of the Town's 3265 water meters.

As part of the required maintenance, the Town utilizes a staff of 23 full time employees, which are required to divide time amongst various funds accordingly, to ensure the responsible maintenance of all the Town's physical and fixed water related assets. A total of twenty (20) full time staff divides their time between General Fund, Water Fund, Sewer Fund, and Highway Fund operations, while the additional three (3) full time employees are primarily dedicated Water Fund operations. Consequently, the Town's Public Works and Utility employees carefully schedule required work to ensure that public works and utility activities are accomplished on time while, concurrently, ensuring the safe and efficient operation of the Town's water system.

The Town had a consultant perform a rate study for our water and sewer utilities. The consultant evaluated the current rates, current and future capital needs, as well as the current and future operation and maintenance costs. Based off that study, the consultants recommend that water rate be set at \$8.50 per 1,000 gallons. An increase of \$1.50 per 1,000 gallons. This equates to an increase of approximately \$10-\$12 per billing cycle for an average consumer. This budget includes the recommended rate of \$8.50 per 1,000 gallons. There are no other fee changes included in this budget.

Sewer Fund

The Public Works and Utilities Department operates utilizing four funds (General Fund, Water Fund, Sewer Fund, and Highway Fund) divided into six budgets (Water, RO Plant, Sewer, Highway, Public Works, and Public Buildings) to operate and maintain the Town's assets and infrastructure. Below please find the budget narrative to accompany the 2025-2026 operating budget for the Sewer Fund. According to fiscal projections, during the 2025-2026 fiscal year, the General Fund will not directly or indirectly subsidize this fund.

The Town of Smithfield operates its sewer system as an enterprise fund in which the sewer fund revenues are used to fund not only the operation, but also all maintenance, including the debt service of the system. Staff are responsible for the operation, maintenance, and repair of the Town's 28 sewer pump stations, 33 ft. Vac-Con "Vac truck", 13 bypass pumps, and associated 65 miles of underground infrastructure.

As part of the required maintenance, the Town utilizes a staff of 23 full time employees, which are required to divide time amongst various funds accordingly, to ensure the responsible maintenance of all the Town's physical and fixed sewer related assets. A total of twenty (20) full time staff divides their time between General Fund, Water Fund, Sewer Fund, and Highway Fund operations, while the additional three (3) full time employees are primarily dedicated Water Fund operations. Consequently, the Town's Public Works and Utility employees carefully schedule required work to ensure that public works and utility activities are accomplished on time while, concurrently, ensuring the safe and efficient operation of the Town's sewer system.

The Town's Sewer Fund is responsible for the transmission of wastewater from the customer to the Hampton Roads Sanitation District (HRSD) force mains, which then allows HRSD to convey the wastewater to its facilities for treatment.

The Town had a consultant perform a rate study for our water and sewer utilities. The consultant evaluated the current rates, current and future capital needs, as well as the current and future operation and maintenance costs. Based off that study, the consultants recommend that sewer rate be set at \$6 per 1,000 gallons. An increase of \$2.01 per 1,000 gallons. This equates to an increase of approximately \$15-\$25 per billing cycle for an average consumer. This budget includes the recommended rate of \$6.00 per 1,000 gallons. There are no other fee changes included in this budget.

Highway Fund

The Public Works and Utilities Department operates utilizing four funds (General Fund, Water Fund, Sewer Fund, and Highway Fund) divided into six budgets (Water, RO Plant, Sewer, Highway, Public Works, and Public Buildings) to operate and maintain the Town's assets and infrastructure. Below please find the budget narrative to accompany the 2025-2026 operating budget for the Highway Fund. According to fiscal projections, during the 2025-2026 fiscal year, the General Fund will not directly or indirectly subsidize this fund.

The Highway Fund is used to fund not only the operation, but also all maintenance, including the debt service of the system. Staff are responsible for the operation, maintenance, and repair of all Town roads other than the Route 10 Bypass, Church St., Grace St., and portions of Main St. Furthermore, these funds are used to maintain all the Town's 110 miles of drainage and storm water infrastructure.

As part of the required maintenance, the Town utilizes a staff of 23 full time employees, which are required to divide time amongst various funds accordingly, to ensure the responsible maintenance of all the Town's physical and fixed highway related assets. A total of twenty (20) full time staff divides their time between General Fund, Water Fund, Sewer Fund, and Highway Fund operations, while the additional three (3) full time employees are primarily dedicated Water Fund operations. Consequently, the Town's Public Works and Utility employees carefully schedule required work to ensure that public works and utility activities are accomplished on time while, concurrently, ensuring the safe and efficient operation of the Town's Highway system. The Town works closely with VDOT as well as outside contractors to ensure that the roadways and drainage systems within the Town limits are maintained in a satisfactory condition.

The Town receives funding from the Commonwealth of Virginia to carry out this work.

Pay and Compensation Plan

It is important for any organization, either public or private, to have a pay and compensation plan. Such a plan establishes internal equity among the various jobs within the organization. In considering the knowledge, skill, and experience that each position requires, the pay and compensation plan establishes fairness among the ranking of the various job positions. The pay and compensation plan also ensures that the salaries reflect the relative value of each job to the organization. In addition to ensuring internal fairness, an organization's pay and compensation plan should be externally competitive with those in the market place.

This year's budget includes a 4% salary increase for staff. These adjustments will help the Town stay competitive in an ever-changing employment environment and will help us attract and retain staff.

It is essential that all organizations have a pay and compensation plan; not having one is akin to the organization managing its most valuable asset – its employees – “*by the seat of the pants.*”

The following charts are the Town's pay and compensation plan for Fiscal Year 2025-2026.

Five-year Capital Improvements Plan

The following is the proposed Capital Improvements Plan (CIP) for the five-year period covered by fiscal years 2025-2026 through 2029-2030.

A capital expenditure is an outlay of significant value that results in the acquisition of or addition to, a capital or fixed asset. The CIP is not a “wish list,” but it is a near-term, multi-year plan for undertaking and financing capital expenditures and projects. In developing the CIP, the municipal government must consider its ability to fund the plan.

This CIP is a “doable plan” for the Town. It does fit within the Town’s financial capabilities.

- A Resolution Approving And Adopting The Five-Year Capital Improvements Plan (CIP) For The Period Covered By Fiscal Years 2025-2026 Through 2029-2030
- An Ordinance Establishing The Water And Sewer Rate Schedule For The Water And Sewer Systems Owned And Operated By The Town Of Smithfield, Virginia

The Town Manager recommends that Council give these ordinances and resolutions its favorable consideration.

RESOLUTION

A Resolution Approving And Adopting The Fiscal
Year 2025-2026 Operating Budget For The Town
Of Smithfield, Virginia And Appropriating The
Requisite Funds For Said Budget

BE IT RESOLVED by the Council of the Town of Smithfield, Virginia as follows:

Section 1. That the Town Council hereby approves and adopts the document entitled
“Town of Smithfield, 2025-2026 Operating Budget.”

Section 2. In order to provide the requisite funds for said operating budget, the following
sums are hereby appropriated from the following revenue sources to the following fund
categories for the fiscal year beginning July 1, 2025 and ending June 30, 2026:

A. Sums appropriated from:

Fund	Amount
General Fund Revenues	\$14,980,135.00
Water Fund Revenues	3,511,680.00
Sewer Fund Revenues	2,322,900.00
Highway Fund Revenues	1,810,574.00
<i>Total</i>	<u>\$22,625,289.00</u>

B. Sums appropriated to:

Fund	Amount
General Fund Expenditures	\$14,980,135.00
Water Fund Expenditures	3,511,680.00
Sewer Fund Expenditures	2,322,900.00
Highway Fund Expenditures	1,810,574.00
<i>Total</i>	<u>\$22,625,289.00</u>

Section 3. Said appropriations shall be in effect beginning July 1, 2025.

Section 4. The Town Manager is hereby directed and authorized to do all things
necessary to implement said budget.

Section 5. This resolution shall be in effect on and after its adoption.

ORDINANCE

An Ordinance Imposing And Levying Taxes Within The Town Of Smithfield, Virginia Upon Real Property, Upon Public Service Corporation, Upon Personal Property, Upon Machinery and Tools, And Upon Mobile Homes For The Fiscal Year Beginning July 1, 2025, And Ending June 30, 2026

BE IT ORDAINED by the Council of the Town of Smithfield that for the support and operations of the town government, the tax rate on all real property and all tangible personal property shall be as follows:

Section 1. Tax Rates

A. Real Estate

For the fiscal year beginning July 1, 2025 and ending June 30, 2026, upon all real estate and improvements thereon, not exempt from local taxation, there shall be a tax of No Dollars and Sixteen Cents (\$0.16) for every One Hundred Dollars (\$100.00) of the assessed value.

B. Public Service Corporations

For the calendar year beginning January 1, 2025 and ending December 31, 2025, upon all property of public service corporations not exempt from local taxation, there shall be a tax of No Dollars and Ten Cents (\$0.10) for every One Hundred Dollars (\$100.00) of assessed value.

C. Tangible Personal Property

For the calendar year beginning January 1, 2025 and ending December 31, 2025, upon all tangible personal property of every kind and description, not exempt from local taxation, there shall be a tax of One Dollar (\$1.00) for every One Hundred Dollars (\$100.00) of assessed value. This tax shall not apply to household goods and personal effects as set forth in Section 58.1-3504, *Code of Virginia*, if such goods and effects are owned and used by an individual or family or household incident to maintaining an abode.

D. Boat Tax

For the calendar year beginning January 1, 2025 and ending December 31, 2025, upon boats, not exempt from local taxation, there shall be a tax of No Dollars and Zero Cents (\$0.00) for every One Hundred Dollars (\$100.00) of assessed value.

E. Machinery and Tools

For the calendar year beginning January 1, 2025 and ending December 31, 2025, upon all machinery and tools used or employed by any person, firm or corporation in any trade or business, not exempt from local taxation, there shall be a tax of No Dollars and Thirty Seven and One-Half Cents (\$0.375) for every One Hundred Dollars (\$100.00) of assessed value which shall be based upon the fair market value thereof.

F. Mobile Homes

For the fiscal year beginning July 1, 2025 and ending June 30, 2026, upon all mobile homes, not exempt from local taxation, there shall be a tax of No Dollars and Fourteen Cents (\$0.14) for every One Hundred Dollars (\$100.00) of the assessed value.

G. Cigarette Tax

For the fiscal year beginning July 1, 2025 and ending June 30, 2026, upon the sale of all cigarettes in the Town of Smithfield shall be tax of \$0.50 per pack.

H. Meals Tax

For the fiscal year beginning July 1, 2025 and ending June 30, 2026, the meals tax rate shall be 6.25%.

I. Transient Occupancy Tax

For the fiscal year beginning July 1, 2025 and ending June 30, 2026, the transient occupancy tax shall be 6%.

J. Trash Collection Fee

For the fiscal year beginning July 1, 2025 and ending June 30, 2026, the trash collection fee shall be \$87.12 per year per residence.

Section 2. Tax Payments

The abovementioned taxes, with the exception of the cigarette tax, real estate, and meals tax, shall be due and payable on December 5, 2025. A ten percent (10.0%) penalty of the late payments of such tax shall be imposed. In addition to the penalty, the Town shall collect interest at the rate of ten percent (10.0%) per annum upon the principal and penalties of all such taxes not paid by the date due.

Section 3. Severance Clause

In the event that a court of competent jurisdiction declares any portion of this Ordinance invalid, then all remaining provisions shall remain in full force and effect.

Section 4. Effective Date

This ordinance shall be in effect on and after its adoption.

RESOLUTION

A Resolution Approving And Adopting The Five-Year Capital Improvements Plan (CIP) For The Period Covered By Fiscal Years 2025-2026 Through 2029-2030

WHEREAS, in order to ensure that its capital projects are well planned, well designed, and fit within the Town's financial capabilities, the Council of the Town of Smithfield, Virginia annually adopts a five-year Capital Improvements Plan (CIP); and

WHEREAS, it is the Town Council's desire to adopt said CIP.

NOW, THEREFORE, BE IT RESOLVED by the Council of the Town of Smithfield, Virginia as follows:

Section 1. That the Town Council hereby approves and adopts the document entitled *Capital Improvements Plan for Fiscal Years 2026-30*.

Section 2. This resolution shall be in effect on and after its adoption.

ORDINANCE

An Ordinance Establishing The Water And Sewer
Rate Schedule For The Water and Sewer Systems
Owned And Operated By The Town Of Smithfield,
Virginia

WHEREAS, Section 32-33. Service Charges, of Code of the Town of Smithfield, Virginia provides that the Council of the Town of Smithfield shall, from time to time, set a schedule of water rates; and

WHEREAS, it is necessary for the Town Council to establish a new schedule of water and sewer rates to be in effect on and after July 1, 2025.

NOW, THEREFORE BE IT ORDAINED by the Council of the Town of Smithfield as follows:

Sec. 82-31. - Connections and availability.

(a) A connection fee of \$660.00 and an availability fee of \$2,720.00 shall be charged for residential connections to water mains.

(b) The following connection and availability fees shall be charged for connection of commercial or industrial structures to water mains:

<u>Water Meter Size (inches)</u>	<u>Connection Fee</u>	<u>Availability Fees</u>
5/8	\$660.00	\$2,720.00
3/4	700.00	4,360.00
1	1,200.00	7,660.00
1½	2,000.00	13,760.00
2	4,000.00	25,560.00
3	8,000.00	51,660.00
4	14,000.00	80,960.00
6	31,000.00	162,460.00

(c) Upon payment of the connection charge and availability fee, the Town will authorize the contractor to connect to the existing main under Town Inspection, and after Town approval,

provide water service to the property. The cost of tapping the main and of the meter, meter set, meter box, corporation stop, line setter and pipe from the main to the meter will be at the owner's/contractor's/developer's expense.

(d) Connections will not be made to town water mains or service lines by persons other than town employees or the town's approved agent.

Sec. 82-33. - Service charges—Generally

(a) The following service charges for water shall be charged by the town:

(1) For service rendered within corporate limits: The bimonthly rate for water customers shall be \$11.47, plus \$8.50 per 1,000 gallons for all water used during the bimonthly billing period.

(2) For service rendered outside corporate limits: The bimonthly rate for water customers shall be \$11.47, plus \$9.35 per 1,000 gallons for all water used during the bimonthly billing period.

(b) Customer shall pay an application fee of \$60.00 to establish a new account with the town. Contractors shall pay an application fee of \$25.00 for an account during new construction. A fee of \$28.00 shall be paid to transfer water service from one premises to another within the town.

(c) Water customers shall be billed based on usage. New accounts activated in the middle of the billing cycle may be billed in excess of the bi-monthly amount on the first bill if previous occupant has usage that must be billed.

(d) A customer whose water service is discontinued before the end of the billing period shall pay based on usage.

(e) Customers shall be billed on the first day of every other month for bi-monthly water service for the gallons used during the prior bi-monthly billing period.

(f) Where more than one occupant or tenant is served through a water meter, such as in apartments, multifamily dwellings or office buildings, a single water service charge for each use or unit will be billed, either to the owner or his agent or to any one tenant who assumes responsibility for the whole account.

(g) All water bills shall be payable, in full, on the date specified on the bill.

(h) Customers applying for water service shall complete an application and execute a water service contract, in a form prepared and approved by the town attorney, prior to initiation of water service. A separate application and service contract shall be required for each new account.

(i) The following service charges for sewer shall be charged by the town:

(1) For service rendered within corporate limits: The bimonthly rate for sewer customers shall be \$6.00 per 1,000 gallons for all sewer used during the bimonthly billing period in addition to the \$18.62 sewer compliance fee.

(2) For service rendered outside corporate limits: The bimonthly rate for water customers shall be \$6.60 per 1,000 gallons for all sewer used during the bimonthly billing period in addition to the \$18.62 sewer compliance fee.

Sec. 82-36. Discontinuance of service.

(b) Water service discontinued pursuant to this section shall not be reinstated until all delinquent water and sewer bills have been paid or put on a payment plan. Services that have been discontinued will be assessed a \$50.00 service charge, and this must be paid before reinstatement. Payment plans: ½ of the total bill must be paid up front, the remaining ½ will be put on the payment plan.

Section 4. Severance Clause

In the event that a court of competent jurisdiction declares any portion of this Ordinance invalid, then all remaining provisions shall remain in full force and effect.

Section 5. Effective Date

This ordinance shall be in effect on and after its adoption.
